VISION 2017 catalog was designed to provide our customers an easy way to find essential product information along with pricing from a single document. The products are divided into 18 separate product categories (Chapters) in the same way as on the Vision website - visionflyfishing.com

Season 2017 novelties include the "NEW17" logo shown on the right.

NEW17

If a product family has new models for season 2017, or the older versions have been upgraded in any way the "UPDATE" logo shown on the right is included.

UPDATE

NOTE! All Recommended Retail Prices (RRP) are in euros.

Chapter 1: OUTFITS

Releasing a big brown trout should be done in a safe manner.

FISU **NEW**17

AFFORDABLE READY-TO-GO SET

FEATURES:

- Medium fast action four piece Fisu rod
- Modern aluminium large arbour reel with disc brake
- Easy casting floating fly line
- Includes also backing and a leader
- Everything pre-spooled and ready for action
- Packed in Cordura tube with a reel pouch

Code	Item	Length	AFTM	Pcs	RRP
VFK48034	Fisu Outfit	8'	#3-4	4	189
VFK49056	Fisu Outfit	9'	#5-6	4	189
VFK49067	Fisu Outfit	9'	#6-7	4	189
VFK49078	Fisu Outfit	9'	#7-8	4	189
VFK49678	Fisu Outfit	9'6"	#7-8	4	189

STORY: The new Fisu (nickname for a fish in Finnish) kits have medium fast 4 – piece rods with dark green blanks and yellow/green markings, all new elegant aluminium reels with adjustable, smooth disc brakes and easy casting floating fly lines. Aimed at beginners but with such performance that they are an easy choice for even pro guys who want an easy option. There is a full range of sets for small creek fanatics, all the way to large reservoir anglers.

ABBO

HIGH-QUALITY READY-TO-GO SET ESPECIALLY FOR STREAMER FISHING

FEATURES:

- Medium fast action four piece Abbo rod with black EVA foam handle
- Black Abbo die cast aluminum fly reel
- High quality easy to cast Vibe 85 Sink3 fly line
- Includes backing and a leader
- Everything pre-spooled and ready for action
- Packed in cordura tube with a reel pouch

Code	Item	Length	AFTM	Pcs	RRP
VAO4906	Abbo Outfit	9'	#6	4	255

STORY: Originally developed for trophy sized perch hunters in Scandinavia, Abbo(nickname for perch in Swedish) outfit is extremely suitable for general streamer fishing especially with sinking lines. 4-piece 6-weight Abbo rod has a medium-fast action with dark olive blank and black EVA foam handle. Abbo reel is a modified Deep reel with a proven brake system. Fly line (Vibe85) has a 8.5m long Sink3 head and a floating running line. The total length is 27 m. This ready-to-use outfit includes also 20lb backing and 9' monofilament leader. A full-blooded streamer outfit.

GT100

HIGH-END READY-TO-GO SINGLE HAND SET ESPECIALLY FOR TRADITIONAL RIVER FISHING

FEATURES:

- Medium fast four piece GT100 rod
- Reliable black GT56 reel on #5 & GT67 on #6
- Season 2015 novelty two tone Vibe100 floating line with a 10 m head and plenty of 20lb backing and a tapered 9' leader. All pre-spooled.
- Comes with a protective cordura tube with a new type of a reel pouch

Code	Item	Length	AFTM	Pcs	RRP
VGO4905	GT100 SH Outfit	9'	#5	4	395
VGO4906	GT100 SH Outfit	9'	#6	4	395

STORY: A true high-quality ready-to-go set. New GT100 rod is a 4-piece medium fast rod with a graphite colored non-sanded blank. It has a black aluminum reel seat and a half wells handle. The reel is the popular and proven black GT reel. The line in the outfit is a new floating Vibe 100. It has a 10 meter blue colored head and a white running line. Being a part of the Vibe family which is famous for being almost ridiculously easy to cast, it has the same great features as the other members, including durability and slickness due to the integrated silicon particles, easy-to-cast, very little memory, loop at the tip of the line and many other great features. Add a decent amount of 20lb backing and a tapered 9' leader and you have a set which is second to none. It is packed into an easy-to-use protective cordura tube with a new type of reel pouch.

SILVER

HIGH-END READY-TO-GO SINGLE HAND SET ESPECIALLY FOR COASTAL FISHING

FEATURES:

- Strong medium fast action four piece Silver rod
- Proven black Deep reel with a Kust fly line (10 m intermediate tip), 20lb backing and a 9' leader.
- All pre-spooled and ready for action.
- Comes with a cordura tube with a reel pouch.

Code	Item	Length	AFTM	Pcs	RRP
VSO4907	Silver Outfit	9'	#7	4	295

STORY: Silver outfit was developed especially for the Baltic sea trout fishing but can naturally be used in large variety of fishing situations. It includes a totally new medium fast action blue greyish 4-piece Silver rod with aluminum reel seat, full wells handle and a fighting butt. The set has a highly popular black Deep die cast aluminum reel and a two tone Kust fly line, which has 10 meter long pale olive slow intermediate head and integrated orange running line. Plenty of backing and a suitable leader are included. Everything is pre-spooled and ready for action. Packed in a protective cordura tube with a reel pouch.

PIKE 2.0 UPDATE

READY-TO-GO HEAVY SINGLE HAND SET

FEATURES:

- Strong medium fast action three piece Pike rod
- Lightweight Valu graphite reel with Big Daddy intermediate fly line, backing and a pike wire leader.
- All pre-spooled and ready for action.
- Comes with a cordura tube with a reel pouch.

Code	Item	Length	AFTM	Pcs	RRP
VPN3909	Pike Outfit 2.0	9'	#9	3	279

STORY: Pike fishing has been by far the fastest growing part of fly fishing in Scandinavia and Vision has already been on the frontline of this development for many years. In order to continue this process, Vision made some clear improvements to our proven Pike set. Pike 2.0 set has a medium fast action three piece Pike rod, which has a modified lighter handle made out of burl cork. The lightweight die cast Valu reel loaded with our famous Big Daddy intermediate fly line, proper backing and a pike wire leader complete the set. Everything is pre-spooled and ready for the action. The outfit comes in a Cordura tube with a reel pouch. The season 2016 Pike Set will be available as long as they last.

ATOM UPDATE

HIGH-QUALITY READY-TO-GO SET

FEATURES:

- Medium fast action three piece Atom rod
- Valu die cast aluminum fly reel
- High quality easy to cast Vibe85 fly line
- Includes also backing and a leader
- Everything pre-spooled and ready for action
- Packed in cordura tube with a reel pouch

Code	Item	Length	AFTM	Pcs	RRP
VAA3804	Atom Outfit	8'	#4	3	239
VAA3905	Atom Outfit	9'	#5	3	239
VAA3906	Atom Outfit	9'	#6	3	239
VAA3908	Atom Outfit	9'	#8	3	249

STORY: The upgraded Atom kit has a medium fast, 3 – piece Atom rod, a light-weight Valu die cast aluminium reel and a popular easy-to-cast Vibe85 floating fly line. It is a great all round kit for learning the sport but will fulfill the needs of the experienced fisherman too. The kit is ready to fish – the backing, fly line and leader are pre-spooled and the whole kit is packed into a protective Cordura tube with reel pouch.

ATOM DH

HIGH-QUALITY READY-TO-GO DH SET

FEATURES:

- Medium fast four piece Atom DH rod
- Reliable Deep #9-10 reel
- Suitable floating Ace shooting head, floating running line and plenty of 30lb backing and a tapered 15' leader. All pre-spooled.
- Comes with a protective cordura tube with a reel pouch

Code	Item	Length	AFTM	Pcs	RRP
VAA4138	Atom DH Outfit	13'	#8-9	4	419

STORY: Atom DH 4-piece rods with metallic silver finish have a powerful medium fast action well capable of handling all sorts of fly lines. This 13' rod has a uniquely shaped DH cork handle similar to our famous Gtfour Catapult DH rods.

ZULU KIDS

AFFORDABLE READY-TO-GO SET

FEATURES:

- Medium fast action four piece Zulu rod
- Quality Zulu reel
- Easy casting floating fly line, VIBE65
- Includes also backing and a leader
- Everything pre-spooled and ready for action
- Packed in Cordura tube with a reel pouch

Code	Item	Length	AFTM	Pcs	RRP
VZK47656	Zulu Kids Outfit	7'6"	#5-6	4	189

*Great for younger kids.

STORY: Zulu Kids set has a forgiving medium fast, 4-piece Zulu rod, quality Zulu reel and an easy casting floating fly line. It is a great gift for a child but also a very nice set when fishing in constraint spaces so common on narrow creeks surrounded by thick bushes and overgrown trees.

PHOTO: Viljami Huhtala

Chapter 2: SINGLE HAND RODS

Vision friend Hanna Huhtala getting ready for early morning pike fishing in Southern Finland.

ONKI **NEW**17

AFFORDABLE 4-PIECE MEDIUM-FAST ROD

FEATURES:

- Medium fast action
- Light and sensitive
- Four piece rods
- High-modulus Korean graphite (40 tn)
- Green olive blanks with graphite grey markings

Code	Item	Length	AFTM	Pcs	Weight	RRP
VON4763	Onki	7'6"	#3	4		259
VON4804	Onki	8'	#4	4		259
VON4905	Onki	9'	#5	4	83g	259
VON4906	Onki	9'	#6	4		259
VON4907	Onki	9'	#7	4		259
VON4966	Onki	9'6"	#6	4		259
VON4967	Onki	9'6"	#7	4		259
VON4103	Onki	10'	#3	4		259
VON4104	Onki	10'	#4	4	85g	259
VON4106	Onki	10'	#6	4	123g	259
VON4107	Onki	10'	#7	4	125g	259

STORY: Our new full-scale rod series Onki (rod&line in Finnish) consists of 11 carefully created medium-fast rod models to cover most of the situations anglers face when fishing for normal freshwater species on creeks, rivers and on various stillwater/reservoir destinations. Based on our long history with true classics like the 3Zone and the Nite/Nite Catapult, these four piece Korean made high quality rods have green olive blanks with graphite grey screen markings. The quality of high-modulus Korean graphite (40 tn) is something you normally find only in more expensive rods and it enabled us to create a very light and sensitive rod. The rest of the components are of great quality as well. For example the handles have narrow rubber/cork reinforcements to make them more durable. With these rods your money is truly well spent.

BIG DADDY TI **NEW**17

FOUR PIECE BIG DADDY ROD WITH TITANIUM GUIDES

FEATURES:

- Based on our Big Daddy rods
- 9' #9
- Medium fast action
- Four piece rods
- Titanium Recoil line guides by REC
- Titanium stripping guides by American Tackle Company
- Yellow blanks with colorful Big Daddy markings
- Black EVA handle

Code	Item	Length	AFTM	Pcs	Weight	RRP
VBT4909	Big Daddy Ti	9'	#9	4	152g	349

STORY: Our proven Big Daddy rods are a great choice for casting the big, air resistant flies. Their powerful medium fast action is forgiving and pleasant when casting but they have brutal power for fighting monster size pike. Black EVA handles are extremely comfortable when the weather turns nasty. To better serve fanatic pike anglers, Vision will introduce a Big Daddy Ti rod. This 9' #9 is a special model, which will be noticed everywhere due to its bold appearance. The line guides are made of titanium for hard abuse on saltwater conditions. It comes in a special fibreglass rod tube and with a rod cloth. Show your addiction and be proud of it...

XOFLYFISHING.COM

fly fishing gear par excellence

THE XO STORY. The new high-end family was named XO, which, according to Vision product manager Antti Guttorm (FFF's CI, MCI and THCI), emphasises the uniqueness of the range. "Executive officer, eXtra Ordinary and Extra Old (as in cognacs) are all worthy acronym definitions for these unique products," he explains. "These meticulously designed and extensively tested Vision flagships are developed for traditional freshwater fly fishing."

HANDLES: In fly fishing, many anglers think that the rod blank does all the work, but cork grips play a much bigger role than you might believe. Cork grips are an important mechanism for improving the ability to control the rod. In addition to that, having a suitable cork grip in your rod can mean the difference between a enjoyable day of fly fishing, or a day after which your arm hurts really bad. Different cork grip styles fit your hand differently and provide a different feel. Many anglers have never even tried the most common styles of cork grips to find out which one suits them best. We have done it extensively and we decided upon using traditional Reverse Half Wells for the lighter models and Full Wells for the two heavier ones. We have been using those same models for years in our earlier rod series.

REEL SEAT: Our premium XO rods are finished with a light but sturdy precision machined aluminum up-locking reel seat with a Finnish Curly Birch wooden insert, which brings out our heritage from the forests of Finland. The decorative and extremely hard wood of curly birch has been used for centuries by local craftsmen. It is both a valued and valuable timber. Production of top quality curly birch timber requires expertise, and great attention to tree care and thinning.

SERVICE & WARRANTY: This tackle is covered by XO service & warranty from the date of purchase and registration. It does not affect or reduce the owner's statutory rights which cover against manufacturing and material faults during the statutory period. In the event of a breakage, your XO rod's broken part will be replaced with a new one at fixed rate of 79.00€ (per piece). Contact www.xoflyfishing.com/customer-care and simply tell where to ship the needed part. If we need to ship outside the EU an additional cost of 30.00€ will be added. Vision Group is not responsible for possible duties and custom costs when shipping outside EU. The above works for up to three rod parts only. If you need a complete rod please contact our service centre.

TUBE&CLOTH: A black aluminum rod tube with machined bar-stock aluminum collar and caps. Black with a golden XO-VISION logo. Inside the cap there is a cork layer working as a cushion with the Fishing Lion logo. Our premium aluminium XO rod tube is finished with a light elegant rod cloth with individual sections for each rod part. Easy to use and vital for the protection of your premium XO fly rod.

WWW.XOFLYFISHING.COM

BLANKS: First we started with action samples from the best materials available. We found an action that we liked quite quickly but it wasn't enough. We knew we could make it better. We started experimenting with different combinations of materials, components and manufacturing methods. All carbon rods utilise carbon fibres that are bonded together by an adhesive resin. A resin material incorporating silica nano spheres provides several benefits. We spent a lot of time and money to get our hands on the latest silica nano resin, which we then combined with different carbon fibre mixes. The final secret sauce that makes our new XO rods more durable and responsive than any other rod we've made so far was completed. It strengthens the rod significantly by making it more resistant to compression. You'll notice its advantages in the responsiveness and weight to strength ratio of the rod as well as in durability. We also tried a lot of different combinations of components from the rod guides to the reel seat. We tried sanded, un-sanded, painted and unpainted blanks. There was a hell of a lot of prototypes going through our hands and our hands were rough from casting them. We found the perfect combination. In the end we were left with a rod with a natural un-sanded and unpainted blank enforced with our new sauce of nano silica resin.

GUIDES: The two most useful properties of titanium are corrosion resistance and the highest strength-to-density ratio of any metallic element. In its unalloyed condition, titanium is as strong as some steels, but less dense. Titanium can be alloyed with iron, aluminium, among other elements, to produce strong, lightweight alloys for many applications, also including the rod guides of fly fishing rods. We tried many products and got the best action and feeling from the patented single leg REC nickel titanium alloy snake guides and American Tackle Company solid titanium stripping guides. Both made in the USA. Solid Titanium alloy material is feather-light (Up to 64% lighter than like guides in stainless steel), 100% corrosion proof and rod-action flexibility translates into "high performance" that cannot be matched by any stainless material. Patented single leg REC nickel titanium alloy snake guides give minimal friction, higher line speed and longer casting. REC RECOIL guides are made from a special nickel titanium alloy with unique physical properties. RECOIL guides are made from an extremely hard but flexible "Shape Memory" alloy, which does not require plating, cannot corrode in any environment, and returns to its original shape after repeated deformations.

THE XO ROD. We started the rod project in 2013. The goal was to make a rod that exceeds all the rods we've made so far in every aspect. This time we have tried and tested a lot of different combinations of materials and actions. Good enough was not going to cut it – it had to be as close to perfect as possible. We also wanted to add something that reflects our origins in Finland.

- A natural unsanded and unpainted blank for the best action
- Unique silica nano resin combined with a mix of different carbon fibres
- Finnish Curly Birch wooden insert
- Up-locking precision machined aluminum reel seat
- High quality Portuguese AAAA cork with rubber cork reinforcements
- Patented single leg REC nickel titanium alloy snake guides
- Titanium stripping guides from American Tackle Company
- Aluminium tube with engraved metal end caps and a cloth bag
- Designed and developed in Finland
- Own website www.xoflyfishing.com

VXO4967	9'6"	#7	4	96g	745
VXO4107	10'	#7	4	104g	745

THE XO FAMILY. In 2016, the family will consist of two members: a floating WF-type fly line series full of nice, well-considered details and bold material selections and a premium single-hand rod series extensive enough to cover the majority of fishing situations, regardless of the location and techniques that one prefers. We have been shipping rods and fly lines to our distributors all over the world. Now everybody has a chance to experience a special XO moment - and we are not talking about having a sip of expensive cognac. We are talking about fishing with fly fishing tackle par excellence.

VTA4107	Tane	10'	#7	4	105g	345
VTA4908	Tane	9'	#8	4	99g	345

STORY: Tane (nickname for brown trout in Finnish) fly rod series was developed to upgrade our mid-price range. Smooth medium-fast action makes these rods perfect for most of the anglers. Eleven carefully selected length/line weight combinations will cover most of the situations emerging in traditional brown trout fishing from small creeks to large rivers and lakes/reservoirs. Tane flyrods are extremely light even though they are four piece rods. Comes with an elegant glass fibre rod tube and a cloth.

KUST

LIGHTWEIGHT FOUR PIECE MEDIUM FAST ACTION ROD WITH PREMIUM COMPONENTS

FEATURES:

- Fast action
- Four piece rods
- Titanium frame stripping guides
- Dark blue blanks with white markings
- Full wells handles

Code	Item	Length	AFTM	Pcs	Weight	RRP
VKU4906	Kust	9'	#6	4	129g	439
VKU4907	Kust	9'	#7	4	132g	439
VKU4908	Kust	9'	#8	4	135g	439

STORY: This is a range of rods which are especially targeted for coastal fishing for seatrout, sea bass, mackerel, pollock and other northern saltwater fish. These rods have powerful progressive action with relatively fast recovery speed which makes them real joy to cast long day. As they are made for saltwater they feature hard chrome snake guides, Pacific Bay Titanium frame stripping guides and SW-proof reel seat. The handle is full wells shape and made from high quality marble cork. All models have a fighting butt. These rods are 4-piece and come with a triangle shaped rod tube & cloth bag.

MERISUOLA
VISION

MERISUOLA STORY. Saltwater fly fishing is becoming ever more popular also in Europe. Vision has been offering specially designed tackle for saltwater fanatics already for years. When we realised we have something special with the XO prototypes 2 years ago we also realised we could make our dream saltwater rod from these same ingredients. Enter the "Pass Me The Salt"-project. This later on changed to the real and final name Merisuola (Seasalt). First and foremost these rods are a result of our passion for saltwater fly fishing.

BLANKS: All carbon rods utilise carbon fibres that are bonded together by an adhesive resin. A resin material incorporating silica nano spheres provides several benefits. We spent a lot of time and money to get our hands on the latest silica nano resin, which we then combined with different carbon fibre mixes. The final secret sauce that makes our new Merisuola rods more durable and responsive than any other rod we've made so far is the one developed for our premium XO rods. It strenghtens the rod significantly by making it more resistant to compression. You'll notice the advantages of it in the responsiveness and weight to strength ratio of the rod as well as in durability. We also tried a lot of different combinations of components from the rod guides to the reel seat. We tried sanded, un-sanded, painted and unpainted blanks. In the end we were left with a rod with a natural un-sanded and unpainted blank enforced with our new sauce of nano silica resin.

GUIDES: The two most useful properties of titanium are corrosion resistance and the highest strength-to-density ratio of any metallic element. Merisuola rods have patented two leg REC nickel titanium alloy snake guides and solid titanium stripping guides. Made in USA.

HANDLES: A properly shaped high-quality handle is a crucial part of any fly rod and especially so in saltwater fly fishing where large and/or heavy flies are used in windy conditions on a regular basis. We selected proven Full wells handles with AAAA Portuguese cork with rubber cork enforcement for our flagship saltwater rods.

SERVICE & WARRANTY: This tackle is covered by Merisuola service & warranty from the date of purchase and registration. It does not affect or reduce the owner's statutory rights which cover against manufacturing and material faults during the statutory period. In the event of a breakage, your Merisuola rod's broken part will be replaced with a new one at fixed rate of 79.00€ (per

piece). Contact our customercare and simply tell where to ship the needed part. If we need to ship outside the EU an additional cost of 30.00€ will be added. Vision Group is not responsible for possible duties and custom costs when shipping outside EU. The above works for up to three rod parts only. If you need a complete rod please contact our service centre.

REEL SEAT: A double nut up-locking precision machined aluminum reel seat for secure and easy locking of your reel. Fighting butt size varies with each rod weight and has a target species branded on the end cap. Collect the whole series: bonefish, permit, and tarpon.

TUBE&CLOTH: A high-quality aluminum rod tube with machined bar-stock aluminum collar and caps. Bright blue with bright orange Merisuola logo. Inside the cap there is a cork layer working as a cushion with the Fishing Lion logo. Our premium aluminium Merisuola rod tube is finished with a bright orange rod cloth with individual sections for each rod parts. Easy to use and vital for the protection of your premium Merisuola fly rod.

MERISUOLA RODS. The backbone of the family consists of four piece lightweight fast action saltwater rods targeted to three classical shallow water species – bonefish, permit and tarpon. Each of these rods is marked with a silhouette of the target fish on the fighting butt and are named accordingly: The BoneCollector (#8), The PermitMaster(#10) and the Tarponator (#12). These rods incorporate everything we have learned during the 20 years of rod design and manufacturing - and then some. We took our time and tested extensively our prototypes all over the world in order to get it right. After some minor improvements we are finally ready to launch these premium rods.

- A natural unsanded and unpainted blank for the best action
- Unique silica nano resin combined with a mix of different carbon fibres
- A double nut up-locking precision machined aluminum reel seat
- Patented REC nickel titanium stripping and snake guides
- Full wells handles with AAAA Portuguese cork with rubber cork enforcement.
- Fighting butt size varies with each rod weight and has a target species branded on the end cap of the FB
- Supplied in a custom aluminum tube with engraved metal end caps together with a cloth bag
- Tested all over the world by sailfish, tarpon, permit, jacks, bonefish etc...

VEE3967	Extreme	9'6"	#7	3	116g	439
VEE3908	Extreme	9'	#8	3	118g	439

STORY: This three piece medium action rod is a perfect combination of lightness, power, sensitivity and looks in one elegant package. These rods have the extreme action for single handed Spey casts. Manufactured from the top-of-the-line Japanese graphite and equipped with the best possible components this deep-blue beauty is ready for action. The rod is delivered in a protective aluminum tube along with a cloth bag.

VIPU

STORY: These 4-piece dark brown rods have clearly medium fast action, which will make them good all-rounders for almost every imaginable situation. Bright yellow screen fits in nicely and the result is an exceptionally harmonic outlook. Lighter class rods have reddish-brown (tiger stripes) wooden reel seats and heavier classes have black metallic reel seats.

MAG

FOUR PIECE FAST ACTION ROD WITH GREAT DETAILS

FEATURES:

- Fast action
- Four piece rods
- Metallic matt olive blank with orange markings
- Half wells in the lighter models, full wells in the heavier models
- 9' models work extremely well with our Vibe 85 fly lines

STORY: The fastest of all Vision rods. These tip action, four piece rods will surprise you with their great balance and looks. Metallic olive finish with some small orange details make these rods stand out from all others.

GLASSIC

OLD SCHOOL SLOW THREE PIECE FIBERGLASS ROD

FEATURES:

- Slow action fiberglass
- Three piece rods
- Reddish brown blanks & white markings
- Half wells / cigar shape handles

Code	Item	Length	AFTM	Pcs	Weight	RRP
VGL3621	Classic	6'2"	#1-2	3	66g	285
VGL3682	Classic	6'8"	#2-3	3	75g	285
VGL3743	Classic	7'4"	#3-4	3	90g	285
VGL3794	Classic	7'9"	#4-5	3	103g	285

STORY: Sometimes it is nice to take things slowly. It goes with casting as well. Vision's new full breed fiber glass rods are new old rods with smooth and slow action. Don't hurry when you fish with these ones. Once you hook a fish, it has very slight chances to free itself - these rods will flex like a rubber band.

VENUS

FOUR PIECE POWERFUL MEDIUM ACTION ROD WITH ERGONOMIC D-SHAPE™ HANDLE

FEATURES:

- Fast action
- Four piece rods
- Grey blanks
- Unique, ergonomic D-shape™ handle

Code	Item	Length	AFTM	Pcs	Weight	RRP
VWS4907	Venus SWS	9'	#7	4	141g	439
VWS4908	Venus SWS	9'	#8	4	148g	439
VWS4909	Venus SWS	9'	#9	4	151g	439
VWS4910	Venus SWS	9'	#10	4	154g	439
VWS4912	Venus SWS	9'	#12	4	186g	439

STORY: Medium fast/fast, full flex action is suitable for all fishing styles and conditions making it easy to deliver long and accurate casts. These rods are built using the highest quality Pacific bay guides and triple anodized aluminum reel seats to withstand the harsh saltwater conditions. Venus SWS has a unique, ergonomic D-shape™ handle which fits your hand like a glove, reducing your need to grip your rod hard. In practice it means that your hand doesn't get tired so easily and that means better concentration on fishing and... more fish! It doesn't get slippery, not even when you have applied loads of sun screen on your tropics trip.

BIG MAMA 2.0

FOUR PIECE MEDIUM FAST ACTION ROD WITH SPECIAL SHAPED EVA HANDLE

FEATURES:

- Medium fast action four piece rods
- Special EVA handle, large fighting but
- Dark green blank with red markings

Code	Item	Length	AFTM	Pcs	Weight	RRP
VBM4908	Big Mama	9'	#8	4	138g	439
VBM4849	Big Mama	8'4"	#9	4	145g	439
VBM4909	Big Mama	9'	#9	4	141g	439
VBM4910	Big Mama	9'	#10	4	148g	439

STORY: Big Mama rods are developed from our Venus rods by our pike fanatic Swedish distributor guy Niklaus Bauer. They have plenty of power to handle monster pike or other nasty creatures. Big Mama rods are 4-piece rods with the EVA D-shape™ handles. They come with a triangle shaped rod tube & a cloth bag. Especially for pike and muskie aficionados worldwide.

BIG DADDY

FOUR PIECE MEDIUM FAST ACTION ROD WITH CORK OR EVA HANDLES

FEATURES:

- Medium fast action
- Four piece rods
- Dark green blanks with yellow markings
- All with full wells and fighting butts

Code	Item	Length	AFTM	Pcs	Weight	RRP
VBF4849	Big Daddy EVA	8'4"	#9	4	152g	285
VBF4909	Big Daddy EVA	9'	#9	4	141g	285
VBF4910	Big Daddy EVA	9'	#10	4	150g	285

VB4909	Big Daddy	9'	#9	4	134g	285
VB4910	Big Daddy	9'	#10	4	140g	285

STORY: Big Daddy rods are great choice for casting the big, air resistant flies. Their powerful medium fast action is forgiving and pleasant when casting but they have brutal power for fighting the monster size pike. Black EVA handles are extremely comfortable when the weather turns nasty. Available with traditional cork handle also.

Chapter 3: DOUBLE HAND RODS

Vision warehouse manager Ari Taina does it again. Now with a new #5 Tool DH.

FAST ACTION FOUR PIECE DH ROD WITH TOP OF THE LINE COMPONENTS

FEATURES:

- Fast action
- Four piece rods
- Olive green blank with orange markings
- Comes in an orange triangular cordura tube and with a cloth bag

Code	Item	Length	AFTM	Grams	Pcs	Weight	RRP
VP4127	Mag	12'6"	#7-8	27-31g	4	255g	589
VP4138	Mag	13'	#8-9	29-34g	4	275g	589
VP4149	Mag	14'	#9-10	31-37g	4	294g	589
VP41510	Mag	15'	#10-11	37-43g	4	310g	589

STORY: These 4-piece olive green rods have fast action. They will surprise you with their great balance and looks. The blanks are made using the latest Japanese high modulus graphite and all components are nothing but the best. Metallic olive finish with some small orange details make these rods stand out from all others.

TOOL UPDATE

MEDIUM FAST / FAST ACTION FOUR PIECE DH ROD

FEATURES:

- Medium fast / fast action
- Four piece rods
- Black matt blank with no markings
- Novel reel seat design
- Comes in a triangular cordura tube

Code	Item	Length	AFTM	Grams	Pcs	Weight	RRP
VTC4115	Tool Cork	11'6"	#5	-	4	150g	489
VTC4117	Tool Cork	11'6"	#7	-	4	163g	489

VTC4149	Tool Cork	14'	#9-10	34-45g	4	-	589
VTC41510	Tool Cork	15'	#10-11	37-50g	4	-	589
VT4127	Tool	12'6"	#7-8	29-35g	4	218g	589
VT4138	Tool	13'	#8-9	31-39g	4	235g	589
VT4149	Tool	14'	#9-10	34-45g	4	262g	589
VT41510	Tool	15'	#10-11	37-50g	4	275g	589

STORY: Tool DH rods have been a kind of an enigma since their introduction two years ago. Black matte blanks together with exceptional reel seats and thin EVA handles give these rods a unique stealthy look. So much so, that some more conservative anglers have avoided even testing these rods. Most of those who have tested have been really happy with the smooth and powerful performance of these rods. However, in order to make them more approachable for everybody we made Tool DH rods also available with cork handles. In addition, we introduced three new models (currently only available with cork handles): 11'6" #5, 11'6" #7 and 11'6" #8. These short light DH rods are excellent tools not only for small waters but also for high water conditions on larger rivers when fish are often coming up very near the bank, not to mention how convenient these short rods are when you are forced to fish under trees or in otherwise restricted space.

SIKS

SIX PIECE MEDIUM FAST ACTION DH ROD

FEATURES:

- Medium fast action
- Six piece rods
- High quality components
- Dark blue blanks with white markings
- Comes in a white triangular shaped cordura tube and cloth bag

Code	Item	Length	AFTM	Grams	Pcs	Weight	RRP
VX613	Siks	13'4"	#7	26-31g	6	264g	679
VX614	Siks	13'8"	#9	34-40g	6	270g	679
VX615	Siks	15'2"	#10	34-40g	6	309g	679

STORY: SIKS rods, introduced in 2012, have a powerful and deep action making them great all round rods. Action-wise they are situated somewhere between the highly popular Cult and Tool series. Siks rods handle modern spey lines, shooting heads and skagit heads with ease. The #7 rod packs down to 74cm and the #10 to 83cm so you can easily pack them inside your travel bag. The rods are made using the very high quality Pacific Bay guides, Portuguese cork rings and wood & aluminum reel seats. The blanks are varnished but non-sanded, to give us the opportunity to build them very light in weight but still strong. For season 2016, we introduced our ultimate DH travel rod, SIKS 13'8" #9 powerhouse. If you can get only one DH rod for your travels, we strongly recommend that you should test this one. You will not be disappointed.

CULT

SLOW/MEDIUM ACTION FOUR PIECE DH ROD

FEATURES:

- Slow-medium fast action
- Four piece DH rods
- Dark brown blanks with white markings
- Comes with dark brown cordura tube

Code	Item	Length	AFTM	Grams	Pcs	Weight	RRP
VU4137	Cult	13'4"	#7	26-31g	4	253g	589
VU4138	Cult	13'2"	#8	29-34g	4	262g	589
VU4139	Cult	13'8"	#9	31-37g	4	283g	589
VU4149	Cult	14'7"	#9	31-37g	4	292g	589
VU41510	Cult	15'2"	#10	34-40g	4	292g	589
VU41711	Cult	17'8"	#10-12	40g+	4	386g	589

STORY: Cult double hand rods have a moderate fast, deep and powerful full flex action. So even they feel softer than our other DH rods and cast far afield, even with huge flies. Casting just feels different, easier. These rods perform extremely well with both Spey lines and shooting- or skagit- heads. The rods are marked with a suggested head weights with bigger variation due to the fact that full flex rod cast a wider range of line weights.

SWITCH

SHORT SLOW/MEDIUM ACTION FOUR PIECE SWITCH ROD

FEATURES:

- Slow – medium fast action
- Four piece DH rods
- Dark brown blanks with white markings
- Comes with dark brown cordura tube

Code	Item	Length	AFTM	Grams	Pcs	Weight	RRP
VSS4116	Switch	10'11"	#6	23g	4	176g	395
VSS4117	Switch	10'11"	#7	26g	4	182g	395
VSS4118	Switch	10'11"	#8	29g	4	188g	395

STORY: With Switch rods you have the benefits of casting like a double hand rod but working the fly like with single hand rods, a real benefit in many fishing situations. These rods with modern shooting heads give you an opportunity to fish certain places much more efficiently compared to if you fished them with long double hand rods or normal single handed rods. These rods are getting more and more popular on coastal fishing too and they are really handy on bigger trout rivers.

VIPU

REASONABLE PRICED MEDIUM FAST ACTION FOUR PIECE DH ROD

FEATURES:

- Slow – medium fast action
- Four piece DH rods
- Dark brown blanks with yellow markings
- Comes with brown cordura tube

Code	Item	Length	AFTM	Grams	Pcs	Weight	RRP
VPU4138	Vipu DH	13'4"	#8	29-34g	4	261g	349
VPU41410	Vipu DH	14'9"	#10	37-47g	4	308g	349

STORY: Too good to be true? Vipu double hand rods complete the very popular range of Vipu single hand rods. These rods have powerful full flex action. They handle all modern fly lines in every fishing situation with ease. The metallic brown blank has nice yellow decoration. A great series for beginners and experts alike.

Chapter 4: REELS

Permit hunting. If you are lucky enough to hook one, you better be prepared.

RULLA CUSTOM **UPDATE**

SPECIAL REEL FAMILY WITH A SPECIAL ATTITUDE

LOHI **NEW17**

Feel the spirit of Salmon (Lohi in Finnish). The magical salmon artwork on the rear side gives you the spirit to catch more than your friend and bigger too. This new elegant reel is best suited for lighter DH rods and switch rods, but can be used for heavier single-hand rods as well. It is a heavy-duty reel with a robust frame, full body rim and powerful brake.

Code	Item	Line	Diam.	Width	Vol.	Capacity	Weight	RRP
VRK2.5	Kust	6-8	90mm	25mm	90cm ³	WF7F+ 150m 20lb Bäckäri*	165g	239

FEATURES:

- Based on Rulla reels
- Large capacity mid arbour reel to host modern lines
- Carbon fibre disc brake system with high precision adjustment
- Quick spool release
- Theme colors for four sizes

STORY: This different looking reel family is closely related to our Rulla reels. They share the same reliable drag system with USA made carbon & stainless steel discs and the same quick spool release. These reels are more solid and stronger, thanks to the full rim frame. Their colour theme goes hand in hand with our rods, Kust is designed for coastal fishing, Big Daddy will tire the big pike in the Baltic Sea and the Ace Of Spey will fight even the biggest salmon and steelhead. For the season 2017 we will introduce Lohi to be used with light double-hand rods or heavy single hand rods.

ART FOR REELS: In 2017 every Kust, Big Daddy and Ace of Spey Rulla Custom reel comes with an additional reel sticker designed by Sakke Yrjölä (see sakkeyrjola.com for details) – customizing your reel has never been easier.

* Note that the capacity is informed with our thin Bäckäri backing
 **Note that the capacity is informed with our extremely thin Dac spun backing

SPARE SPOOLS							RRP
VLC3-001 Ex.spool (XLB3), VLC4.5-001 Ex.spool (XLB4.5)							159

STORY: When we dropped the original XLB from our repertoire after year 2011, we got some angry calls and emails from customers all over the world. They came both from avid salmon anglers and from saltwater fanatics. They just couldn't believe what we had done. All the remaining reels were acquired very quickly from our retailers and some even tried to find second-hand XLB reels to make sure that they have some spare reels for years to come. We told everybody that we are introducing some really cool reels, which could be used basically as replacements for the XLB. Well, looking back, we have to admit that we might have exaggerated a bit. There have been and still are some really good reels suitable for fighting some serious battles, but none of those reels is quite like the XLB. It is such a great feeling to know that you have a reel which will deliver every time in some of the most hostile environments known to fly fishermen.

XLB's formidable brake package is well enclosed and the heart is a solid carbon, stainless steel and Teflon disc trio. It operates smoothly even in those scary occasions when a fish pulls your rod down to a horizontal level and your backing is leaving in an ever increasing speed towards the horizon and the only thing that you can do is tighten your brake click by click and hope that it will stop before something bad happens. The line capacity of these reels will definitely give you some extra time before it happens. When loaded with our thin diameter Dacspun backing, you have a reel to fight a large Pacific sailfish or a colossal jungle tarpon.

These reels balance nicely any proper size double hander, but they are just as well at home when attached to one of those ten or twelve+ weight single hand rods needed to fight any saltwater leviathans. Needless to say the capacity should be sufficient for every salmon angler even when using the longest Spey lines available.

FEATURES:

- The brake is based on our initial train stopping XLB
- Black anodized aluminum
- Full rim
- Mid-arbor spool
- An unique outlook

REMARKS:

In general, many things should be taken into consideration when you are selecting your next reel, but when we really get down to the basics of fighting large fish, only two factors really matter - the size of the train your brake can stop and the length of the cable that you can have stored on your reel. Having tested this reel all over the globe, we can state with absolute certainty that the XLB has those two factors nailed.

TANK

OLD SCHOOL REEL WITH MODERN DISC BRAKE AND LOUD CLICKER

FEATURES:

- The brake is based on our proven GT reel
- A classic old-school outlook
- Solid and durable
- Anodized aluminum
- Full rim
- Mid-arbor spool

STORY: A great salmon reel doesn't have to be as light as a feather. When used with a long double hand rod, a reel is not just a fly line storage or a brake provider in your fishing set, but also very much a balancing element. The initial brake design was from our highly popular and proven GT reel. The outlook of the reel follows closely classical salmon reel design principles with only few holes on the handle side of the reel to provide some amount of ventilation for fly line and backing after long fishing hours. We wanted to have a full rim for the reel in order to fully eliminate those unfortunate occasions when a thin running line gets jammed between the frame and the spool. The classical color of the reel is an outcome of anodizing the used high quality aluminum. The final touch in our quest for old-school atmosphere comes in the form of absolute kick ass brake sound. Now available also in black.

KELA

SPACIOUS OFFSPRING OF OUR TRUSTY XLA AND FEATHERLIGHT CDC REELS

FEATURES:

- The offspring of two of our classics: the trusty XLA and the weather light CDC
- Large capacity to host modern lines
- New brake adjustment system with high precision control
- New sensitive carbon fibre disc brake based on the reliable XLA
- New handle design for maximum grip
- Two colors: "SilverGrey" and "GreenMachine"

Code	Item	Line	Diam.	Width	Vol.	Capacity	Weight	RRP
VLK1.5T	Kela 1.5 SilverGrey	4-6	85mm	28mm	70cm ³	WF5F+ 70m 20lb Bäckkäri*	139g	359
VLK2T	Kela 2 SilverGrey	5-7	90mm	28mm	82cm ³	WF6F+ 120m 20lb Bäckkäri*	147g	359
VLK2G	Kela 2 GreenMachine	5-7	90mm	28mm	82cm ³	WF6F+ 120m 20lb Bäckkäri*	147g	359

*Note that the capacity is informed with our thin Bäckkäri backing

STORY: The famous XLA is a milestone among Vision reels. Reliable and even more reliable. But it started to look old. Just like its designers. The CDC reel was at same time also very much liked partly because it's really light weight partly because of its nice look. We integrated these two reels together and the result is lightweight, reliable, simple, nice looking and an elegant KELA. It comes in two stunning color combinations: SilverGrey and Green Machine.

VG67B	GT 67 black, "Tinseli"	6-7	89mm	78cm ³	WF7F+ 91m 20lb	145g	229

STORY: Many countries have some special flies, which have become legends, sometimes even outside the country of origin. In order to honor two extremely popular Finnish fly patterns, called Nalle Puh and Tinseli, Vision decided to introduce two special custom-made GT reels (Limited Edition), which are decorated with pictures of these flies. Model #5/6 has a picture of a very famous Finnish dry fly pattern Nalle Puh on its side and model #6/7 has a famous streamer pattern Tinseli as its decoration.

GT

ELEGANT CLASSIC SERIES FOR SMALL CREEKS AS WELL AS FOR THE LARGEST SALMON RIVERS

FEATURES:

- Precision machined bar stock high-grade aluminium
- Triple high gloss anodizing
- Silent retrieve and subdued brake click
- Extra smooth disc brake with large brake effect
- Soft polyurethane handle for maximum grip wet and dry

STORY: Kalu reels are real value for money. Their outlook is from our famous GT reel, just fattened up. They are machined die-cast reels which have eaten a sealed, smooth, drag system consisting of stainless steel and carbon discs. The one turn drag adjustment knob is fully machined and has clear laser markings for drag power. Kalu reels can take more than enough backing with a suitable fly line. Kalu has three colors; brunette, black and yellow.

STORY: Some fisherman felt that to complete the Koma range we needed a cassette reel. Well here it is. Look carefully. It does not look like a cassette reel but there it is. Easy to use and a nice looking reel. The Koma Kasette includes three cassettes and a fabric pouch. They have extremely reliable easy spool locking and a smooth disc drag.

DEEP

AFFORDABLE DEEP ARBOR REEL IN THREE DIFFERENT COLORS

FEATURES:

- Reliable disc brake
- Deep arbour for extra capacity
- Quick spool release
- Available in black, white and yellow

STORY: These reels have a deeper arbour giving you plenty of capacity for your lines. They also have a reliable and smooth disc brake with easy and accurate adjusting. They are strong but still light in weight, thanks to a latest die-cast techniques and materials. Their non-reflecting matt finish and reliable, XLA style spool's quick release, are something that you are not used to find from this price level's reels before.

Chapter 5: **LINES FOR SH RODS**

When fishing from a float tube, it is wise to use those fly lines, which are easy to cast.

XO NEW17

High-floating XO is our most advanced fly line. It has our new STD™ taper making it one of the easiest casting all round fly lines. This provides outstanding control when shooting as well as carrying a long line out at all distances. The STD™ taper also enables roll casts and mends like classic DT line. XO has a super slick and strong HiFlo™ coating. It also features varying hardness coatings in different parts of the line; the head being softer allowing you to push arrow shaped tight loops and the running line being harder for carrying extra-long overhangs and ultimate shootability. Due to XO's long rear taper and the fact that the line casts well no matter how much head is out we felt that the line doesn't have to be two-toned. The fly line has small loops on both ends and clear markings of the line weight near the tip of the line.

- New STD™ taper
- Super slick and strong HiFlo™ coating
- Varying hardness coatings
- Floating. Classes #4 - #9
- Small loops on both ends
- Clear markings of the line weight near the tip
- Head length 16 m. Total length 30 m
- Designed and developed in Finland

MERISUOLA NEW17

Saltwater fly fishing is becoming more and more popular in Europe. Vision has already been offering specially designed tackle for saltwater fanatics for years. Two years ago we decided to put some extra efforts into this field and started the Project Merisuola (Sea salt). The idea was to provide premium tools for devoted saltwater fly fishermen. In the first phase we are introducing Merisuola fly rods and fly lines, which were designed simultaneously to complete each other. The harsh saltwater environment and big, strong and fast fish is a combination, which sets some hard limits especially for fly lines. For that reason, we have spent numerous hours testing and re-designing our Merisuola fly lines before we were confident that the lines were ready for the challenge.

- Reversed compound taper (long rear taper, short powerful front taper)
- Slick and stiff coating for tropical heat
- Low stretch core (transfers casting energy better, firm hook set with hard mouth fish)
- Super strong ready-made loops
- Designed in conjunction with the Merisuola rods
- Head length 12,8m – total length 30m
- Orange running line – blue head

Merisuola rods and lines are approved for: sailfish, bonefish, permit, tarpon, snook, redfish, stingray, pike, seatrout, Atlantic salmon, barracuda, many different tuna species, all kind of trevallies starting with the GT and the list goes on.....

TANE **NEW17**

Tane fly line is available both as a traditional weight forward (WF) line with a 11m head and as a double taper (DT) line. The new coating used in this line is the result of long and extensive testing in Finland and beyond. This slightly thinner than normal WF line has a carefully designed taper that suits most fishing situations giving you nice presentation whether you are overhead casting or spey casting. Tane has a core with a 22% stretch for those delicate situations where thin tippet are needed. Both WF and DT lines have loops on both ends of the line. Total length 30m. Color light olive / mint green.

The beautiful brown trout (tane is a nickname for a brown trout in Finnish) drawing was done by Sakke Yrjölä, who illustrated a massive book Suomen kalat (The Fish of Finland) published in 2015. See sakkeyrjola.com for details.

ULTRA LIGHT NYMPH **NEW17**

Our new fly line is designed for nymph fishing, especially for Polish/Czech/French Nymph techniques. Because of the very thin diameter (only 0.58mm) and new slippery coating the casting is easy. Softness and lack of fly line memory guarantee that you won't miss even the smoothest bite! On both sides of the fly line there are small smooth loops to for attaching the leader and backing. This light beige line was specially designed to meet European standards of competition (minimum diameter 0.55 mm) and the development and design was done together with one of the greatest competition anglers in the world, Pablo Castro Pinos from Spain. The line is 28 m long and level, so you can turn it once the other end of the line starts to show signs of usage. This fly line is must for all nymph fishing lovers!

Code	Item	Head	Length	RRP
VULN	Ultra light nymph	level	28m	49

KUST SH(shooting head) **NEW 17**

The original Kust line has a 10 metre head and 20 metres of floating running line. The line has a slick and supple coating which remains memory free even in cold conditions. The slickness is achieved by adding Teflon® particles to the coating and this way the slickness doesn't wear off either. The low stretch core helps you to feel the takes and it also transfers casting energy far more efficiently than traditional cores. The line is perfect for most situations a coastal angler will face while hunting the elusive seatrout. However, in certain locations, really long casts are required on a regular basis. Casting a 30 metre long Kust line fully out is a job well-done, but more importantly, long casts are sometimes needed to be performed very fast if a faraway school of seatrout is moving fast. There is no time for several false casts. That is the main reason why we are introducing two Kust shooting heads (SH): a clear floater and a light-olive SloMo. When combined with a thin running line, for example our Catapult Flat shooter, the angler gets additional benefit as the running line has much smaller surface area for wave/current disturbances when compared to the integrated running line used in our full length Kust lines. This provides better control of the fly and enables easier detection of subtle takes. The ready-made loops make it easy to attach the shooting head to the leader and to the running line.

When it is all about gentle and precise presentation, go for the full-length Kust line. When it is all about distance and speed of casting, go for the new Kust Shooting Heads.

KUST

Kust line consists of a 10 m head and 20 m of floating running line. The line has a slick and supple coating which remains memory free even in cold conditions. The slickness is achieved by adding Teflon® particles to the coating and this way the slickness doesn't wear off either. The low stretch core helps you to feel the takes and it also transfers casting energy far more efficiently than traditional cores. The readymade loop makes it easy to attach the leader. Kust line with intermediate head gets your fly just under the surface in windy conditions. Kust line with a sink 2 head reaches the correct depth quicker when needed and is good when you're fishing from a drifting boat.

BIG MAMA UPDATE

Big Mama is a perfect line for bulky and heavy flies. The profile is a reverse compound taper with a short front taper to cut through wind. It has a slick and supple coating which remains memory free even in cold conditions. The low stretch core helps you to feel the takes and set the hook and also transfers casting energy better than traditional cores. The ready-made loops make it easy to attach the leader and backing.

BIG DADDY

Big Daddy is a line which is designed for both big and air resistant flies. It has a short, 8.5 meters head with very aggressive front taper giving you really good turnover of bulky flies. The low stretch core, combined with super slick grooved coating with built-in Teflon, transfers the casting energy in the best possible way and gives a clear advantage hooking hard headed fish firmly even at long distances. The short and heavy head is easy to handle and shoot but at the same time the thicker running line gives you an opportunity to aerialize longer line without collapsing your cast.

THE VIBES

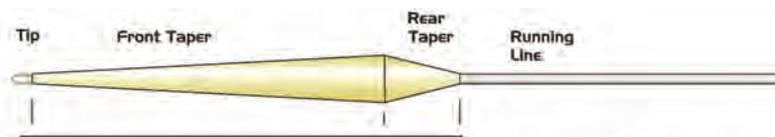

The Vibes are totally new way to choose and use a fly line. They are marked with actual head weights and lengths and we have given our suggestion in which line weight rod they perform best. Our Vibe lines (65, 85, and 125) have a long lasting slick and supple coating which remains memory free even in cold conditions. The slickness is achieved by adding Teflon® particles to the coating and this way the slickness doesn't wear off either. The low stretch core helps you to feel the takes and it also transfers casting energy far more efficiently than traditional cores. For season 2015 we introduced a new member to the Vibe family, the Vibe 100.

VIBE 65

Vibe 65 fly line has only a 6.5 meter long head. It is at its best in places with very limited casting space and performs extremely well with switch and spey style casts. It has a slick and supple coating which remains memory free even in cold conditions. The aggressive front taper turns even heavier weighted nymphs over with ease. The readymade loop makes it easy to attach the leader.

Code	Item	Head	Total	RRP
VK62F	Vibe 65 #2-3/6g floating	6.5m	27m	79

6.5m / 21.3ft	12g / 185gr	27m / 88.6ft	5-6

VIBE 85

Vibe 85 has an 8.5 meter long head. The head's weight is clearly marked in grams and grains for easy comparison and they have also suggestion for ideal rod rating. The 85 is heavier compared to AFTM standard. Therefore, for example line which is suggested for rods 5-6, performs well in stiffer and more powerful #5 weight rods or softer #6 weight rods. Vibe 85 is at its best in places with limited casting space and performs extremely well with switch and spey style casts. It has a slick and supple coating which remains memory free even in cold conditions. The aggressive front taper turns even heavier weighted nymphs over with ease. The readymade loop makes it easy to attach the leader.

VIBE 100

Vibe 100 has a 10 meter / 30.5 feet long head and is therefore a great all-round fly line. It is easy to roll- and spey cast and is a long casting line with overhead casts. It has a slick and supple HiFlo™ - coating which remains memory free even in cold conditions. The low stretch core helps you to feel the takes and it also transfers casting energy better than traditional cores. The readymade loop makes it easy to attach the leader.

ATTACK

A line originally made to be clearly visible, slick and high floating and dressed with good turnover ability to serve both beginners and advanced fishermen. The result was that our pros nearly ripped these lines out of our hands just to cover all situations with different methods of attack. That is why we call this line a real everyday all-rounder.

NITE

Nite is a weight forward line for all-round use with a supple and slick self-lubricating coating. It has a compound type taper and is a two-tone line with a mango coloured head and light grey running line for high visibility. The ready-made loop makes it easy to attach the leader. The Nite line is built on a braided core and it remains memory free in cold water. Available floating in line weights #4 – 8.

Chapter 6: **LINES FOR DH RODS**

A perfect bar of silver from Northern Norway. It just can't get better than this. Rock'N'Roll!

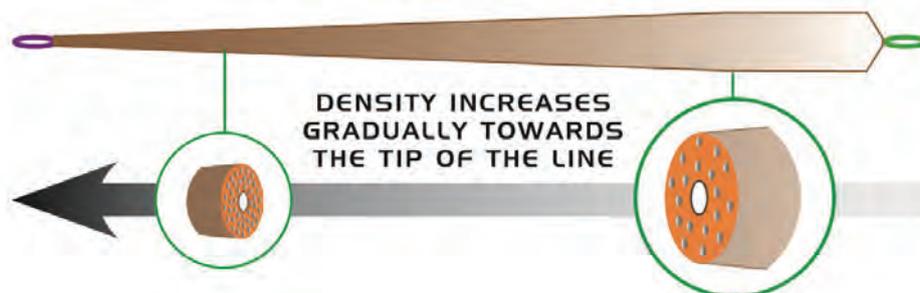

ACE SHOOTING HEADS | Technology & Products

The well-known ACE – shooting heads are now even better. New heads have all the necessary features like super slim and strong loops on both ends, printing on the loops telling which end attach to running line and the weight & the sinking/floating speed of head. They are also built over supersensitive low stretch core so you'll feel even the lightest take.

The biggest and most radical step over the other shooting heads is our **Sliding Density™** construction of the sinking heads. Instead of making the line with two or even three different density materials we've made these lines with continuous change of the density. So for example our Inter to Sink 3 head's density changes gradually from intermediate to Sink 3. This way we have made a line which doesn't have ANY hinging effect during the cast. It flies in a really nice and controlled loop offering extremely good energy transform turning over even really big and heavy flies. With the **Sliding Density™** construction together with the new **Carrot taper** we've been able to make the easiest casting sinking heads on the market, period.

SLIDING DENSITY

The other thing with these heads is the **Down To Earth** colours. We felt that the lines should blend to the colours of the riverbed. So the sinking lines' colours are chosen to be brownish & greenish because that's what the stones and the bottom of the rivers often are. The **Floating Carrot** with its **HiFlo™** - coating rides very high on the surface and with carrot orange colour it is very easy to see and follow exactly where your fly is. The **Clear Float** has a different approach. It is fully transparent so it minimizes the shadow it casts to the bottom. Shortly, you'll spook less and hook more. It floats lower than the Carrot, just about on the surface, so the surface disturbance during the swing is minimal. Lower floating adds also friction when casting so it loads your rod easier.

FLOATING ON THE SURFACE

UPDATE

Floating Carrot

- HiFlo™ - coating
- Visible colour, easy to track when fishing

Clear Float

- Clear low float coating on a clear monofilament core.
- The low float coating reduces the surface disturbance when you're swinging the fly. It also adds friction when you're making the cast helping you to load your rod properly.
- The clear coating doesn't cast similar shadow as the "normal" floating line so you're less likely to spook the fish and more likely to hook them.

ACE SWITCH TIP

Short, easy casting shooting head system for modern Switch rods. Kit includes floating body, floating, intermediate and sink3 tips and they all have loops on both ends. This makes them very easy and quick to change whenever needed. By adding our polyleader to the tip you can fine tune the sinking depth even more. The body will cast also the faster sinking T – tips so this line is very versatile. The body part is 6.1 meters and the tips are 3 meters in length. The heads come in 23g, 26g and 29g in total weight. The short total length makes this line very easy to cast even in most difficult conditions.

ACE SKAGIT | Floating UPDATE

If you need to get down deep, use large and heavy flies and still want to maintain your control, Ace Skagit floating head + T -tip is the line system for you. This floating head range covers line weights for relevant rod lengths and weights. The T-tips range includes three different lengths and each of them has three different weight classes. The tip's length and sinking rate is chosen according to the place you fish, not according what you think the line can cast. All tips come with pre-made loops in both ends to make your fishing nice and easy. All Ace Skagit floating heads are delivered with a suitable T14 tip.

VISIONFLYFISHING.COM

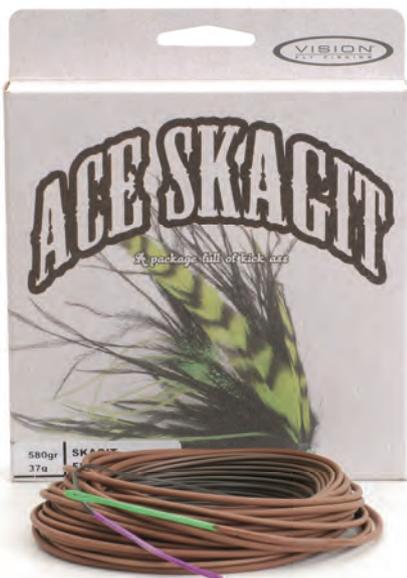

ACE SKAGIT | Intermediate

UPDATE

A floating head is without any question the number one choice for Skagit fishing. It is ridiculously easy to use and it will get the job done in most of the cases. In some places, however, the surface flow is so strong or complex that it will make the sinking of the fly to the killing zone very difficult or the floating head drags the fly too fast when you want to present it slowly. To solve these problems, you need to get the large diameter head under the surface and away from the strongest current layer. Unlike some of our distinguished colleagues in the industry, we feel that leaving a part of the head on the surface is not the right way to proceed and thus our head is fully intermediate. This comes handy especially on some of the Scandinavian rivers which can be truly fast moving and occasionally pretty deep. We might suffer a bit in the maneuverability of the head but we consider that a small price to pay when we can offer our fly just as slowly as we like in diverse conditions.

We have developed an interchangeable tip version out of the Slide Spey line. This is the ultimate salmon fly line for the fisherman who wants to cover all different fishing situations with just one very versatile line. It comes with 4 different tips; floating, clear intermediate, sink 3 and sink 7. Tips have loops on both ends so they are easy and quick to change and they also allow very easy attachment to the monofilament- or polyleader. Slide Spey Tip has different colour running line and the full floater has dark grey casting marker showing you the ideal casting spot.

ACE HEAD AND TIP WALLETS

To make sure that it is easy and safe to have all necessary heads and tips with you while you are fishing, we introduced two wallets, one for the tips and one for the heads. Both wallets are black/white colored and the larger Head wallet includes the Ace of Spey theme decorations. Both wallets have light mesh walls to divide them into sections for individual heads or tips.

Chapter 7: RUNNING.BACKING

Big Russian brown trout will often test the quality of your backing line.

ACE CONTROL - RUNNING LINE

This is a perfect running line for the ones who want to know where their fly is. This monofilament core running line has an orange HiFlo™ - coating with dark green markers in 5 m intervals. So you can easily see how much you have line out and if you get a take it's easy to cover that lie again as you know how far it was. The monofilament core makes it slightly stiffer compared to our other ACE running lines so you're less likely to get tangles. It has a big loop at the front and smaller at the back and it's made over a 30lb core with total thickness of 0.039".

Code	Item	Strength	Length	Color	RRP
VRLC39F	Ace Control	30lb+	30m	Orange with dark green marks	49

CATAPULT FLAT SHOOTER - RUNNING LINES

If you are looking for the maximum distances and ready to pay attention to controlling your runningline, this is your choice. This super slick shooter type running line has very slow stretch giving you the ultimate feel on your fishing and it has very low memory. It is so slick that in real fishing situation you have to remember to brake it a bit at the end of your cast to create some head and leader straightening friction. The spool has 100 meters so it rigs several reels, or just one if you're really good...

Code	Item	Strength	Length	Color	RRP
VRL35	Catapult Flat shooter	35lb/15,9kg	100m	Fl.yellow	33
VRL50	Catapult Flat shooter	50lb/22,7kg	100m	Fl.yellow	33

ACE²-RUNNING LINES

A set of floating running lines to cover all your needs. These running lines don't have any memory whatsoever so there's no need to stretch them before use. We have a ready-made loop at one end for smooth and easy attaching to your shooting head.

Code	Item	Strength	Length	Diameter	Color	RRP
VRL27F	ACE ² floating	20lb/9,1kg	30m/98ft	.027"/0.69mm	orange	39

BÄKKÄRI - BACKING LINES

Bäkkäri is a new extensive (12 products) backing family for the season 2013. It consists of strength categories 12, 20 and 30 lbs. Available depending on the strength in 50m, 100m, 150m, 200m, 250m and 2500m spools. Extra thin, highly visible and very difficult to get cutting into itself even when put under heavy stress during a fight with a big fish. If you don't find a proper backing for your particular needs (heavy saltwater fly fishing excluded) we are very surprised.

Code	Item	Strength	Length	Color

VB20036	Dacspun	36lb/16,3kg	200m/220yds	Fl.green/white
VB2028	Dacspun	28lb/12,7kg	2000m/2200yds	Fl.orange/white
VB2036	Dacspun	36lb/16,3kg	2000m/2200yds	Fl.green/white

THE DIFFERENCE. Dacspun is extremely thin backing line. Above you'll see the difference between Dacspun(left) and a traditional dacron based backing(right). Both spools have exactly 100 m of backing.

PHOTO: Pasi Visakivi

Chapter 8: LEADERS.TIPS

Chrystal clear waters of Slovenia require frequently long leaders.

PRISMA FLUOROCARBON - LEADERS

Code	Item	Tip	Length	Strength
VFP0	Prisma Fluorocarbon 0X	0.28mm	9' / 270cm	5.3kg/11.7lb
VFP 1	Prisma Fluorocarbon 1X	0.26mm	9' / 270cm	4.4kg/9.7lb
VFP 2	Prisma Fluorocarbon 2X	0.24mm	9' / 270cm	3.5kg/7.7lb
VFP 3	Prisma Fluorocarbon 3X	0.21mm	9' / 270cm	2.7kg/5.9lb
VFP 4	Prisma Fluorocarbon 4X	0.18mm	9' / 270cm	2.2kg/4.8lb
VFP 5	Prisma Fluorocarbon 5X	0.16mm	9' / 270cm	1.8kg/4.0lb
VFP 6	Prisma Fluorocarbon 6X	0.14mm	9' / 270cm	1.3kg/2.9lb
VFP 7	Prisma Fluorocarbon 7X	0.12mm	9' / 270cm	1.0kg/2.2lb

High-quality fluorocarbon leader for fishing in ultra-clear, slow moving waters.

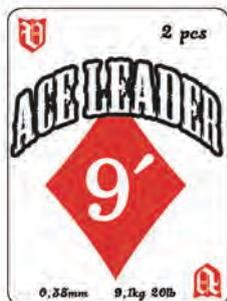

ACE - LEADERS

Code	Item	Tip	Length	Strength
VAL631	Ace leader	0.31mm	6' / 182cm	6.3kg/15lb
VAL634	Ace leader	0.34mm	6' / 182cm	8.2kg/18lb
VAL638	Ace leader	0.38mm	6' / 182cm	9.1kg/20lb
VAL643	Ace leader	0.43mm	6' / 182cm	11.3kg/25lb

Designed to accompany the Ace Of Spey Shooting Heads and Vision speyline. The short 6 feet leader is designed to give maximum turn over for big flies. It can be used with fast sinking shooting and Skagit heads to take your fly really deep. This is also good base to build your own pike leader by adding a piece of wire at the tip.

! Two (2) pcs per package.

Code	Item	Tip	Length	Strength
VAL931	Ace leader	0.31mm	9' / 274cm	6.3kg/15lb
VAL934	Ace leader	0.34mm	9' / 274cm	8.2kg/18lb
VAL938	Ace leader	0.38mm	9' / 274cm	9.1kg/20lb
VAL943	Ace leader	0.43mm	9' / 274cm	11.3kg/25lb

Designed to accompany the Ace Of Spey Shooting Heads and Vision speyline. 9 feet version is at its best with single hand fishing for bigger fish. It is also good choice for slower sinking shooting heads.

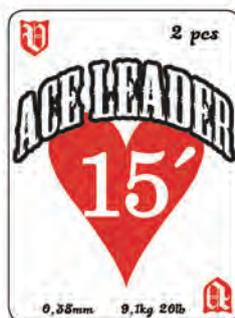

! Two (2) pcs per package.

Code	Item	Tip	Length	Strength
VAL1231	Ace leader	0.31mm	12' / 365cm	6.3kg/15lb
VAL1234	Ace leader	0.34mm	12' / 365cm	8.2kg/18lb
VAL1238	Ace leader	0.38mm	12' / 365cm	9.1kg/20lb
VAL1243	Ace leader	0.43mm	12' / 365cm	11.3kg/25lb

Designed to accompany the Ace Of Spey Shooting Heads and Vision speyline. The 15 and 12 foot leaders are great for all around salmon and steelhead fishing.

! Two (2) pcs per package.

Code	Item	Tip	Length	Strength
VAL1531	Ace leader	0.31mm	15' / 457cm	6.3kg/15lb
VAL1534	Ace leader	0.34mm	15' / 457cm	8.2kg/18lb
VAL1538	Ace leader	0.38mm	15' / 457cm	9.1kg/20lb
VAL1543	Ace leader	0.43mm	15' / 457cm	11.3kg/25lb

Designed to accompany the Ace Of Spey Shooting Heads and Vision speyline. The 15 and 12 foot leaders are great for all around salmon and steelhead fishing.

! Two (2) pcs per package.

NANO MONO - LEADERS

Code	Item	Tip	Length	Strength
VOL0	Nano Mono 0X	0.28mm	9' / 270cm	7.2kg/15.9lb
VOL1	Nano Mono 1X	0.26mm	9' / 270cm	6.7kg/14.8lb
VOL2	Nano Mono 2X	0.23mm	9' / 270cm	4.8kg/10.6lb
VOL3	Nano Mono 3X	0.20mm	9' / 270cm	3.7kg/8.2lb
VOL4	Nano Mono 4X	0.17mm	9' / 270cm	2.7kg/6.0lb
VOL5	Nano Mono 5X	0.15mm	9' / 270cm	2.3kg/5.1lb
VOL6	Nano Mono 6X	0.13mm	9' / 270cm	1.7kg/3.7lb
VOL7	Nano Mono 7X	0.11mm	9' / 270cm	1.5kg/3.3lb

Nano Mono leaders offer you two options for that special moment when you are facing the greatest challenge of the day. These shorter (2.7m) leaders for bit easier fisheries are available in 0X – 7X. This is a brand new innovation in monofilament tippet and leaders. It is really something new and different from our famous Extreme tippet. If you like soft and strong line, the Nano Mono is your choice. It has extremely high knot strength and it is totally memory free. It has more stretch than our Extreme tippet making it act like a shock tippet, simply helping you to land more trophy size fish.

Code	Item	Tip	Length	Strength
VOLL4	Nano Mono Long 4X	0.17mm	13'5" / 411cm	2.7kg/6.0lb
VOLL5	Nano Mono Long 5X	0.15mm	13'5" / 411cm	2.3kg/5.1lb
VOLL6	Nano Mono Long 6X	0.13mm	13'5" / 411cm	1.7kg/3.7lb
VOLL7	Nano Mono Long 7X	0.11mm	13'5" / 411cm	1.5kg/3.3lb

Nano Mono leaders offer you two options for that special moment when you are facing the greatest challenge of the day. These longer (4.11m) ones for those vary wild fishes on crystal clear mountain streams are available in 4X – 7X. This is a brand new innovation in monofilament tippets and leaders. It is really something new and different from our famous Extreme tippet. If you like soft and strong line, the Nano Mono is your choice. It has extremely high knot strength and it is totally memory free. It has more stretch than our Extreme tippet making it act like a shock tippet, simply helping you to land more trophy size fish.

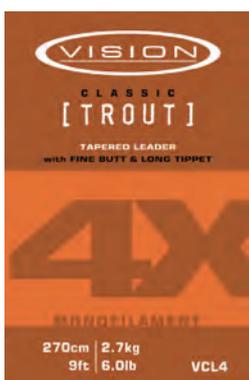

TROUT - LEADERS

Code	Item	Tip	Length	Strength
VTL0	Trout 0X	0.30mm	9' / 270cm	6.8kg/15lb
VTL1	Trout 1X	0.27mm	9' / 270cm	5.7kg/12.5kg
VTL2	Trout 2X	0.24mm	9' / 270cm	4.5kg/9.9lb
VTL3	Trout 3X	0.21mm	9' / 270cm	3.5kg/7.7lb
VTL4	Trout 4X	0.17mm	9' / 270cm	2.5kg/5.5lb
VTL5	Trout 5X	0.16mm	9' / 270cm	2.0kg/4.4lb
VTL6	Trout 6X	0.14mm	9' / 270cm	1.5kg/3.3lb
VTL7	Trout 7X	0.11mm	9' / 270cm	1.0kg/2.2lb

These leaders are very powerful with long butts for the perfect turnover of large flies in all conditions.

CLASSIC TROUT - LEADERS

Code	Item	Tip	Length	Strength
VCL0	Classic Trout 0X	0.30mm	9' / 270cm	6.8kg/15lb
VCL1	Classic Trout 1X	0.27mm	9' / 270cm	5.7kg/12.5lb
VCL2	Classic Trout 2X	0.24mm	9' / 270cm	4.5kg/9.9lb
VCL3	Classic Trout 3X	0.21mm	9' / 270cm	3.5kg/7.7lb
VCL4	Classic Trout 4X	0.17mm	9' / 270cm	2.5kg/5.5lb
VCL5	Classic Trout 5X	0.16mm	9' / 270cm	2.0kg/4.4lb
VCL6	Classic Trout 6X	0.14mm	9' / 270cm	1.5kg/3.3lb
VCL7	Classic Trout 7X	0.11mm	9' / 270cm	1.0kg/2.2lb

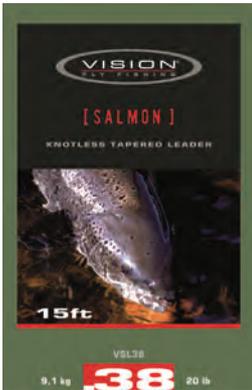

Leaders with thinner butts and long thin tips, ideal for small flies and long drag free drifts.

SPRING CREEK - LEADERS

Code	Item	Tip	Length	Strength
VSC2	Spring creek 2X	0.23mm	12' / 360cm	4.5kg/10lb
VSC3	Spring creek 3X	0.20mm	12' / 360cm	3.6kg/8lb
VSC4	Spring creek 4X	0.18mm	12' / 360cm	2.6kg/5.8lb
VSC5	Spring creek 5X	0.15mm	12' / 360cm	1.9kg/4.4lb
VSC6	Spring creek 6X	0.13mm	12' / 360cm	1.5kg/3.4lb
VSC7	Spring creek 7X	0.10mm	12' / 360cm	1.0kg/2.4lb

In clear waters your classical 9ft leader can be too short. Our 12 feet long Spring Creek leader is tapered to work with dries and smaller nymphs when presentation and invisibility is the key for hooking a fish.

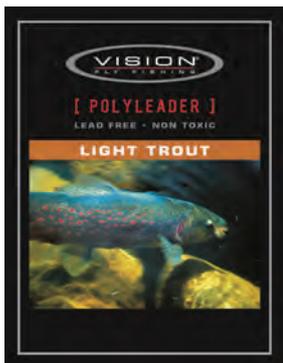

Code	Item	Tip	Length	Strength
VSL24	Salmon 0.24mm	0.24mm	15' / 450cm	2.9kg/6.5lb
VSL26	Salmon 0.26mm	0.26mm	15' / 450cm	4kg/9lb
VSL31	Salmon 0.31mm	0.31mm	15' / 450cm	5kg/11lb
VSL34	Salmon 0.34mm	0.34mm	15' / 450cm	6.3kg/14lb
VSL38	Salmon 0.38mm	0.38mm	15' / 450cm	9.1kg/20lb
VSL43	Salmon 0.43mm	0.43mm	15' / 450cm	11.3/25lb

Perfectly balanced for salmon fishing. The Salmon leader has a long heavy butt that allows turnover of large salmon flies and streamers. This leader has a profile that has been especially developed to suit modern double-handed fishing techniques. The thinner tippet models will also suit stillwater trout fishing.

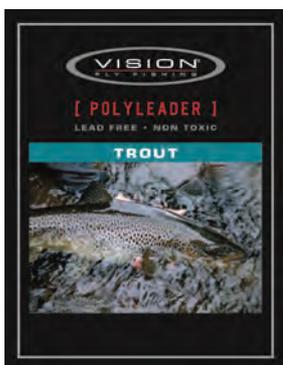

LIGHT TROUT – POLYLEADERS

Code	Item	Tip	Length	Strength
VPL1	Light Trout Floating	0.25mm	5' / 152cm	5kg/11lb
VPL2	Light Trout Intermediate	0.25mm	5' / 152cm	5kg/11lb
VPL3	Light Trout Slow Sink	0.25mm	5' / 152cm	5kg/11lb
VPL4	Light Trout Fast Sink	0.25mm	5' / 152cm	5kg/11lb
VPL5	Light Trout Extra Fast Sink	0.25mm	5' / 152cm	5kg/11lb

Polyleaders consist of a thin tapered monofilament core with a flexible polymer coating on the outside. This is why they are more durable and turn over better than normal leaders. The loop in the leader eases the change of leader to either floating, intermediate or sinking.

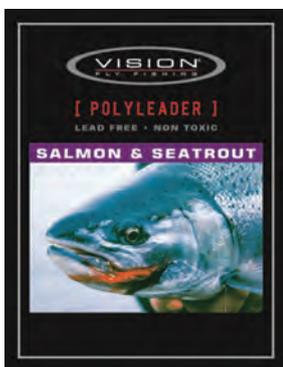

TROUT - POLYLEADERS

Code	Item	Tip	Length	Strength
VPT1	Trout Floating	0.30mm	8' / 244cm	7kg/15.5lb
VPT2	Trout Intermediate	0.30mm	8' / 244cm	7kg/15.5lb
VPT3	Trout Slow Sink	0.30mm	6' / 183cm	7kg/15.5lb
VPT4	Trout Fast Sink	0.30mm	6' / 183cm	7kg/15.5lb
VPT5	Trout Extra Fast Sink	0.30mm	6' / 183cm	7kg/15.5lb

Polyleaders consist of a thin tapered monofilament core with a flexible polymer coating on the outside. This is why they are more durable and turn over better than normal leaders. The loop in the leader eases the change of leader to either floating, intermediate or sinking.

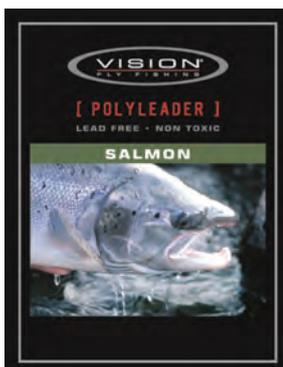

SEATROUT & SALMON - POLYLEADERS

Code	Item	Tip	Length	Strength
VPS0	Seatrout & Salmon Floating	0.40mm	10' / 305cm	11kg/24.4lb
VPS1	Seatrout & Salmon Intermediate	0.40mm	10' / 305cm	11kg/24.4lb
VPS2	Seatrout & Salmon Slow Sink	0.40mm	10' / 305cm	11kg/24.4lb
VPS3	Seatrout & Salmon Fast Sink	0.40mm	10' / 305cm	11kg/24.4lb
VPS4	Seatrout & Salmon Extra Fast Sink	0.40mm	10' / 305cm	11kg/24.4lb

Polyleaders consist of a thin tapered monofilament core with a flexible polymer coating on the outside. This is why they are more durable and turn over better than normal leaders. The loop in the leader eases the change of leader to either floating, intermediate or sinking.

SALMON - POLYLEADERS

Code	Item	Tip	Length	Strength
VPS01	Salmon Floating	0.50mm	14' / 427cm	18kg/39.7lb
VPS02	Salmon Intermediate	0.50mm	12'6" / 381cm	18kg/39.7lb
VPS03	Salmon Slow Sink	0.50mm	10' / 305cm	18kg/39.7lb
VPS04	Salmon Fast Sink	0.50mm	10' / 305cm	18kg/39.7lb
VPS05	Salmon Extra Fast Sink	0.50mm	10' / 305cm	18kg/39.7lb
VPS12	Salmon Intermediate	0.50mm	5' / 152cm	18kg/39.7lb
VPS13	Salmon Slow Sink	0.50mm	5' / 152cm	18kg/39.7lb
VPS14	Salmon Fast Sink	0.50mm	5' / 152cm	18kg/39.7lb
VPS15	Salmon Extra Fast Sink	0.50mm	5' / 152cm	18kg/39.7lb

Polyleaders consist of a thin tapered monofilament core with a flexible polymer coating on the outside. This is why they are more durable and turn over better than normal leaders. The loop in the leader eases the change of leader to either floating, intermediate or sinking.

ACE TAPERED TIPS

Code	Item	Length	Color	RRP
VSKT10F	Ace Tapered tip Floating	10' / 305cm	white	26,90
VSKT10CF	Ace Tapered tip Clear Floating	10' / 305cm	clear	26,90
VSKT10I	Ace Tapered tip Intermediate	10' / 305cm	clear	26,90
VSKT10S2	Ace Tapered tip Sink 2	10' / 305cm	brown	26,90
VSKT10S3	Ace Tapered tip Sink 3	10' / 305cm	brown	26,90
VSKT12F	Ace Tapered tip Floating	12' / 365cm	white	26,90
VSKT12CF	Ace Tapered tip Clear Floating	12' / 365cm	clear	26,90
VSKT12I	Ace Tapered tip Intermediate	12' / 365cm	clear	26,90
VSKT12S2	Ace Tapered tip Sink 2	12' / 365cm	brown	26,90
VSKT12S3	Ace Tapered tip Sink 3	12' / 365cm	brown	26,90
VSKT15F	Ace Tapered tip Floating	15' / 450cm	white	26,90
VSKT15CF	Ace Tapered tip Clear Floating	15' / 450cm	clear	26,90
VSKT15I	Ace Tapered tip Intermediate	15' / 450cm	clear	26,90
VSKT15S2	Ace Tapered tip Sink 2	15' / 450cm	brown	26,90
VSKT15S3	Ace Tapered tip Sink 3	15' / 450cm	brown	26,90

In order to complete our Skagit range, we designed a set of optimized tapered tips including obligatory Floating, Clear Floating, Intermediate and Sink3 tips. For season 2015 we introduced additional Sink2. When combined with a Floating or an Intermediate Skagit head, the angler can basically cover all the layers from the surface down to the depth were T-tips will become the number one option. All tips are equipped with ready-made loops.

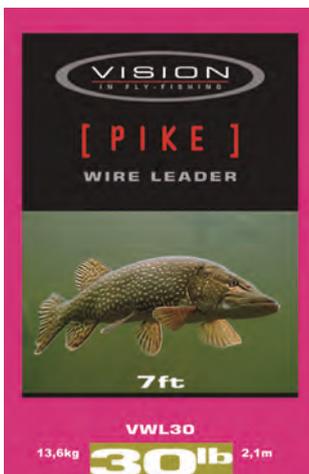

ACE T-TIPS

Code	Item	Weight per feet	Length	Color	RRP
VSKT10	Ace T-tip	10 grain	10' / 305cm	black	26,90
VSKT14	Ace T-tip	14 grain	10' / 305cm	black	26,90
VSKT17	Ace T-tip	17 grain	10' / 305cm	black	26,90
VSKT10-12	Ace T-tip	10 grain	12.5' / 380cm	black	26,90
VSKT14-12	Ace T-tip	14 grain	12.5' / 380cm	black	26,90
VSKT17-12	Ace T-tip	17 grain	12.5' / 380cm	black	26,90
VSKT10-15	Ace T-tip	10 grain	15' / 450cm	black	26,90
VSKT14-15	Ace T-tip	14 grain	15' / 450cm	black	26,90
VSKT17-15	Ace T-tip	17 grain	15' / 450cm	black	26,90

The Ace T-tip family includes three different length categories: 10ft, 12,5ft and 15ft. Each of the categories has three different weight classes: T10, T14 and T17. All tips come with pre-made loops on both ends to make your fishing nice and easy. Each tip has weight and length printed on one end for easy identification.

PIKE - WIRE LEADER

Code	Item	Tip	Length	Strength
VWL30	Pike wire 30lb	0.24mm	7' / 210cm	13.6kg/30lb

Vision Pike leader is made from our Wireline tippet material and tapered heavy duty monofilament leader. They are attached with tippet ring. This makes it easy to change the wire tippet when needed. The overall length of the leader is 7 feet. Includes one extra tippet ring.

Chapter 9: TIPPETS.LOOPS.RINGS

Vision product manager Antti Guttorm hunting some wary Austrian mountain brown trout.

SPACEFLUORO TIPPETS **NEW**17

The SpaceFluoro product family has a wide range of diametres suitable for competition anglers, streamer fanatics and saltwater/pike bums for both fresh and saltwater environments. In addition to being nearly invisible, this new high-tech fluorocarbon tippet material has a big bunch of other highly valuable features, some of which are listed below:

- Dense and uniform material cuts the surface tension and sinks well
- Medium stiff fluorocarbon with exceptionally high knot and tensile strength
- Easy to tie with low memory
- Highly abrasion resistant due to smooth surface
- Tolerates UV light and harmful chemicals better than nylon tippets
- Great turnover in windy conditions

NOTE: This stuff lasts forever in nature, so please do not throw there.

SpaceFluoro might not be the cheapest tippet material on the market and it sinks pretty fast, making it not the best option for all round dry fly fishing, but when it comes to any fishing taking place subsurface, regardless of whether you are after some tiny brookies with miniature nymphs, big brownies with large streamers or any of those saltwater torpedoes, the SpaceFluoro family pretty much has the model for you. SpaceFluoro, like all other Vision tippet materials, come colour coded, snap together & rotate spools with line retainers. From 0.50mm the material is on larger spools to prevent unwanted bending.

Code	Item	Diameter	Length	Strength
VCT0	SpaceFluoro 0X	0.28mm	50m	6.0kg / 12lb
VCT1	SpaceFluoro 1X	0.26mm	50m	4.9kg / 11lb
VCT2	SpaceFluoro 2X	0.23mm	50m	4.2kg / 9.0kg
VCT3	SpaceFluoro 3X	0.21mm	50m	3.5kg / 7.7lb
VCT4	SpaceFluoro 4X	0.18mm	50m	2.9kg / 6.4lb
VCT5	SpaceFluoro 5X	0.16mm	50m	2.4kg / 5.3lb
VCT6	SpaceFluoro 6X	0.14mm	50m	1.9kg / 4.2lb
VCT7	SpaceFluoro 7X	0.12mm	50m	1.5kg / 3.3lb
VFT30	SpaceFluoro 0.30	0.30mm	30m	7.0kg / 15lb
VFT32	SpaceFluoro 0.32	0.32mm	30m	7.7kg / 17lb
VFT35	SpaceFluoro 0.35	0.35mm	30m	9.0kg / 20lb
VFT38	SpaceFluoro 0.38	0.38mm	30m	10kg / 22lb
VFT40	SpaceFluoro 0.40	0.40mm	30m	10.9kg / 24lb
VFT45	SpaceFluoro 0.45	0.45mm	30m	12.8kg / 28lb
VFT50	SpaceFluoro 0.50	0.50mm	20m	15kg / 33lb
VCT60	SpaceFluoro 0.60	0.60mm	20m	20kg / 44lb
VCT70	SpaceFluoro 0.70	0.70mm	20m	25kg / 55lb
VCT90	SpaceFluoro 0.90	0.90mm	20m	35kg / 77lb

PRISMA - FLUOROCARBON TIPPET

Code	Item	Diameter	Length	Strength
VFT0	Prisma fluoro OX	0.28mm	50m	5.9kg
VFT1	Prisma fluoro 1X	0.26mm	50m	5.0kg
VFT2	Prisma fluoro 2X	0.23mm	50m	4.7kg
VFT3	Prisma fluoro 3X	0.21mm	50m	3.4kg
VFT4	Prisma fluoro 4X	0.18mm	50m	2.8kg
VFT5	Prisma fluoro 5X	0.16mm	50m	2.4kg
VFT6	Prisma fluoro 6X	0.14mm	50m	1.9kg
VFT7	Prisma fluoro 7X	0.12mm	50m	1.5kg
VFT31	Prisma fluoro 0.31	0.31mm	30m	6.8kg
VFT33	Prisma fluoro 0.33	0.33mm	30m	7.5kg
VFT36	Prisma fluoro 0.36	0.36mm	30m	9.4kg
VFT39	Prisma fluoro 0.39	0.39mm	30m	10.3kg
VFT42	Prisma fluoro 0.42	0.42mm	30m	11.4kg
VFT46	Prisma fluoro 0.46	0.46mm	30m	12.5kg
VFT49	Prisma fluoro 0.49	0.49mm	30m	14kg

Prisma is the fluorocarbon in our range. It has great knot strength and it is easy to tie, thanks to a special coating and slightly bigger stretch. It is still hard material so it gives you great turnover if you are using heavily weighted flies and because of fluorocarbon's density it sinks, making it ideal for wet fly use.

! Prisma, like all other Vision tippet materials, come in colour coded, snap together & rotate spools.

NANO MONO - SOFT MONOFILAMENT TIPPET

Code	Item	Diameter	Length	Strength
VOT0	Nano Mono OX	0.28mm	50m	7.2kg
VOT1	Nano Mono 1X	0.26mm	50m	6.7kg
VOT2	Nano Mono 2X	0.23mm	50m	4.8kg
VOT3	Nano Mono 3X	0.20mm	50m	3.7kg
VOT4	Nano Mono 4X	0.17mm	50m	2.7kg
VOT5	Nano Mono 5X	0.15mm	50m	2.3kg
VOT6	Nano Mono 6X	0.13mm	50m	1.7kg
VOT7	Nano Mono 7X	0.11mm	50m	1.5kg
VOT8	Nano Mono 8X	0.09mm	50m	1.0kg
VOT30	Nano Mono 0.30	0.30mm	50m	8.2kg
VOT33	Nano Mono 0.33	0.33mm	50m	10.3kg
VOT36	Nano Mono 0.36	0.36mm	50m	12.9kg
VOT40	Nano Mono 0.40	0.40mm	50m	13.8kg
VOT43	Nano Mono 0.43	0.43mm	30m	15.8kg
VOT47	Nano Mono 0.47	0.47mm	30m	17.2kg
VOT52	Nano Mono 0.52	0.52mm	30m	19.5kg

Nano mono tippet material performs best when you need to use small flies with delicate presentation. It has superior knot strength and it is very easy to tie. It has more stretch than our other tippet materials so it acts also like a shock absorber, a great feature when using thin tippets. Because of this stretch you can even use thinner tippets than before because there are less sudden breakages.

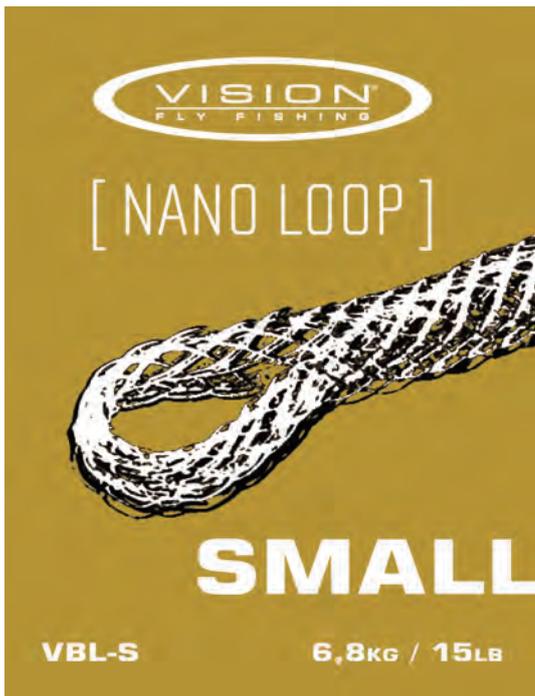

EXTREME - MONOFILAMENT TIPPET

Code	Item	Diameter	Length	Strength
VET0	Extreme OX	0.28mm	50m	7.0kg
VET1	Extreme 1X	0.26mm	50m	6.2kg
VET2	Extreme 2X	0.23mm	50m	5.2kg
VET3	Extreme 3X	0.21mm	50m	4.4kg
VET4	Extreme 4X	0.18mm	50m	3.2kg
VET5	Extreme 5X	0.16mm	50m	2.8kg
VET6	Extreme 6X	0.14mm	50m	2.2kg
VET7	Extreme 7X	0.12mm	50m	1.7kg
VET31	Extreme 0.31	0.31mm	30m	8.2kg
VET33	Extreme 0.33	0.33mm	30m	9.3kg
VET37	Extreme 0.37	0.37mm	30m	12kg
VET41	Extreme 0.41	0.41mm	30m	14.6kg
VET44	Extreme 0.44	0.44mm	30m	17.2kg
VET47	Extreme 0.47	0.47mm	30m	18.8kg
VET52	Extreme 0.52	0.52mm	30m	22.4kg

Extreme has been in our range forever and why not, it is great tippet material. Very reliable and that's what you want. It is ideal choice for heavier use when you want to use monofilaments because it has relatively low stretch and it is stiffer than the Nano Mono.

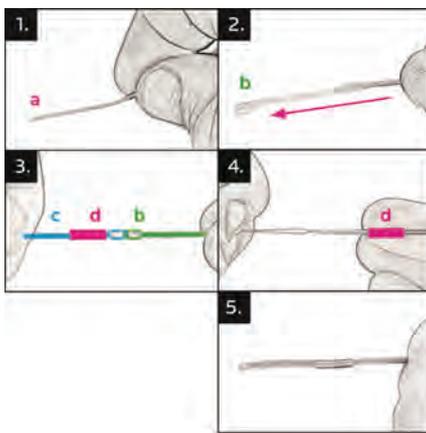

NANO LOOP - BRAIDED LOOP FAMILY

Code	Item	Strength
VBL-S	Nano Loop Small	6.8kg/15lb
VBL-M	Nano Loop Medium	11.4kg/25lb
VBL-L	Nano Loop Large	16kg/35lb
VBL-XL	Nano Loop XLarge	20.4kg/45lb

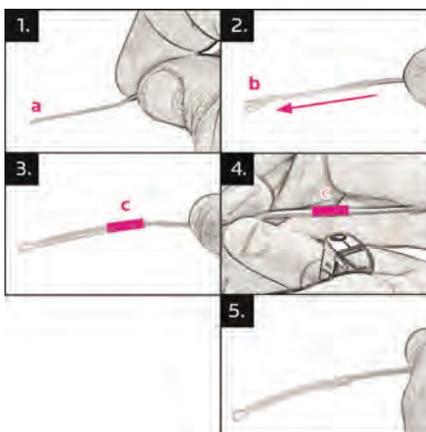

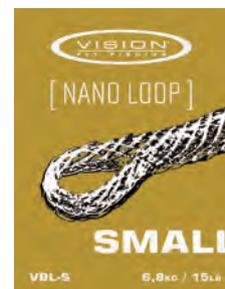

Custom-made braided loop family out of our proven Vision Nano mono material. Four sizes to cover all possible line weights. Small in size, these loops go easily through the guides and enable long casts and will not get stuck when fighting that colossal fish of a lifetime.

! 4 pcs / packet

Nano loop instruction

1. Cut the flyline tip **a** to an angle.
2. Slide the flyline inside, all the way to the loop **b**.
3. Thread the loop **b** with provided monofilament **c** and put the tubing **d** on the monofilament.
4. Pull the tubing **d** on top of the braided loop all the way to the end. Secure with a drop of superglue.
5. You are ready to attach the leader with a loop to loop connection.

Nano loop instruction

1. Cut the flyline tip **a** to an angle.
2. Slide the flyline inside, all the way to the loop **b**.
3. Pull the shrink tube **c** on top of the braided loop all the way to the end.
4. Heat the shrink **c** tube with the lighter. Observe the shrinking and stop heating when the tubing has shrunk tightly over the braided loop. Secure with a drop of superglue.
5. You are ready to attach the leader with a loop to loop connection.

WIRELINE - WIRE TIPPET

Code	Item	Length	Strength
VWL15	WireLine 15lb	6m	6.8kg / 15lb
VWL20	WireLine 20lb	6m	9.1kg / 20lb
VWL35	WireLine 35lb	6m	15.9kg / 35lb

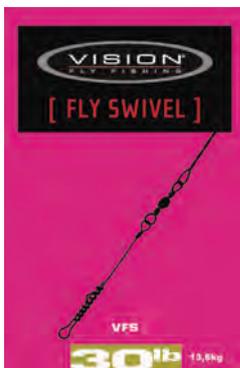

This soft, plastic coated wire is designed for pike, barracuda and other type of toothy "friends". It can be easily looped with a melted loop or tied with a normal clinch knot. The 6 meters spool is enough for several leaders. There are three different breaking strengths; 15, 20 and 35lb.

TIPPET RINGS

Code	Item	Strength
VTR	Tippet Rings, small 12kg	12kg
VTRM	Tippet Rings, big 20kg	20kg

Vision tippet rings make leader making easier and faster. Tie the end of your leader onto one of these and then tie your tippet length to the ring. They are also great for tying droppers to leader or when you want to attach fluorocarbon to monofilament. They weigh almost nothing, so they do not affect turnover or the leaders floating/sinking properties. Our tippet rings are also available in bigger sizes with 20 kilo breaking strength. You may now enjoy these in salmon and pike fishing too. 10pcs/bag.

Code	Item	Strength
VFS	Fly Swivel 30lb	13.6kg / 30lb

If you have ever fished for pike with fly you have definitely had thoughts how to connect your fly to the wire leader easily. This is the easy and secure option. Attach one of these at the end of your wire and you can change your fly quickly without having to cut the wire all the time. This is light enough so it doesn't disturb your fly's movement and the barrel at the end prevents most of the line twist which is often caused by these bird size pike flies. Package has 10 swivels.

Chapter 10: **WADERS**

Coastal seatrout fishing requires proper wading gears.

SCOUT

We think that Vision Scout waders are the most comfortable waders to wear. Period. They are made from a special fabric featuring revolutionary 37.5® Technology and proven ultrasonic welding technology. Durable, comfy and good-looking waders with a bunch of well-thought-out details. Get yourself a pair and you will always Be Prepared.

THINK BIG OR GO HOME. To continue at the forefront of wader development in the world and to secure our leading role in Europe, year 2017 will see some big changes in our wader strategy. We have felt that most of the modern high-end waders are heavy, stiff and their breathability capabilities are not what they used to be. We wanted to change that and feel that wonderful “Do-I-have-waders- on-or-not?” –feeling when we wade into a cold mountain river or “Why-don’t-I-sweat-at-all” when we hike to the next sweet spot somewhere kilometres away. To achieve these ambitious goals, we have already worked for two years to introduce a totally new

generation of waders. Scout waders are a pleasure to wear, will stay waterproof even when used actively for a longer period of time in highly challenging conditions and which will transfer your sweat from your body faster than any other pair of waders. Based on extensive testing all around the world, we can happily inform that we have achieved those objectives. 37.5® Technology combined with Ultrasonic welding technology is a winning combination, which is very hard if not impossible to beat. So, get your Scout waders and you’ll be prepared.

NEW 17

FULLY WATERPROOF CHEST POCKET: YKK Aquaseal® zipper protects your valuables while you are wading. The pocket is divided into three open compartments.

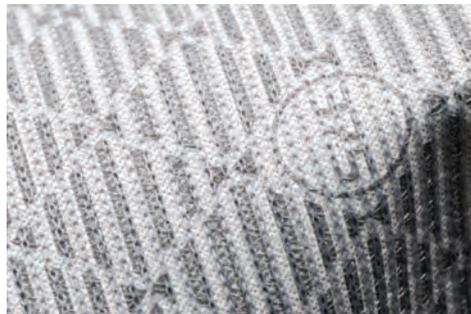

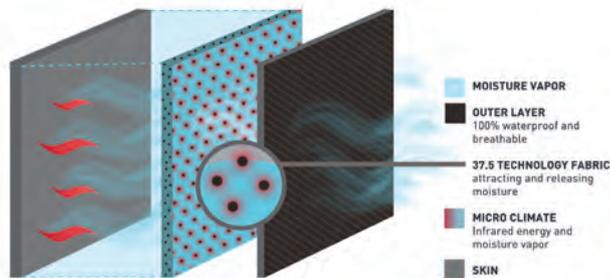

Note: The pocket is waterproof if and only if closed completely.

MULTI-FUNCTIONAL FLIP POCKET: A specially designed flip pocket provides two zipped pockets and one additional pocket with velcro fastening. Plenty of space for small-medium size fly boxes and some accessories.

37.5® TECHNOLOGY. Scout waders are the only waders using the revolutionary 37.5® Technology. 37.5® Technology works with your body to balance heat and moisture, creating a personally regulated microclimate of comfort. Hydrophilic active particles attract water molecules even in the vapour stage. They absorb the body's IR energy giving water a reason to leave the particle. Active parti-

cles add an immense amount of surface area to the fabric and this allows fabric to evaporate more water exponentially faster. By actively responding to body temperature, these particles use energy from the body to accelerate drying rates – up to five times faster! In short – you'll feel more comfortable than ever before in waders.

FEELS COMFY: 37.5® Technology works with your body to balance heat and moisture, creating a personally regulated microclimate of comfort.

ULTRASONIC SEAM TECHNOLOGY. Scout waders are made with our Ultrasonic technology seams, meaning that there's no stitch hole in the seams. We have welded two fabrics into one, making the seam itself waterproof. This weld is then double taped with our own E-tape to give it strength in extreme conditions. You know, sometimes you need run and jump after hooking the fish of your lifetime. From the usability point of view, the main differences between traditional and ultrasonic seamed waders, are the flat seams. There is actually no noticeable difference between the plain fabrics and the seam. Only the additional water-

proof inside tape will create a small increase to the thickness. This is quite the contrary to normal seams in waders, where you have a bulky seam with three (3) layers of fabrics plus the additional inside tape(s). In numbers, we can state that an ultrasonic welded seam is always at least 67% percent thinner when compared to normal seams. The bulkiness of a traditional seam causes also a serious non-usability related problem; the big difference in thickness between the plain fabrics and the seam creates a sort of a hinge (joint), which increases considerably the level of abrasion.

NO HOLES: Ultrasonic welding produces flat, durable and inherently waterproof seams (the upper seam), which are then additionally secured with an inside waterproof tape. Traditional seams (the lower seam) are made by folding the fabrics and stitching them together. They will become waterproof only after they are taped inside once or twice. The result is a bulky seam.

THE DEVIL IS IN THE DETAILS. Scout waders feature our curve NoSeam cut which gives you the ultimate freedom of movement. The wader's lower part is slightly heavier, but still soft fabric giving them enough wear resistance and the upper part is thinner fabric to maximise the breathability and lightness. They are made with features like a big,

fully waterproof chest pocket with a YKK Aquaseal® zipper, hidden accessory hooks under the braces, a flip pocket with 3 – compartments, built in gravel guards and an adjustable high density belt and braces. The neoprene socks are higher density neoprene making them even more comfortable and warm to wear compared to normal ones.

- Latest fabric featuring 37.5® Technology and ultrasonic welding technology.
- Fully waterproof chest pocket with YKK Aquaseal® zipper
- Seam optimization secured with our new E-Tape
- 3 – compartment flip pocket
- Heavier bottom fabric, lighter upper fabric
- High density wading belt and braces
- Curved NoSeam cut for perfect fit
- Matching color belt and braces
- D-loops and drying loops
- Built-in gravel guards
- Ultimate comfort

SYMBOLS AND TERMS

F4™, F3.5™ and F3™ - Vision F-series fabrics

Vision F-series fabrics are a new generation of moisture permeable and waterproof fabrics that have innovative features using micro fibre technology and high-density fabric weaving technology. Look at our hang tags and stickers on our garments. There have long been too many myths surrounding breathability. If you have tried several types of garments you know that the myth and the reality do not always match. **All waders and wading jackets.**

Ultra technology

These new-era waders have been made with ultrasonic welding technology, which joins fabrics without any stitch holes. This enables extremely light waders with durable non-bulky seams (although they are naturally taped inside for extra strength). **Scout and Kura waders.**

37.5® Technology

37.5® Technology works with your body to balance heat and moisture, creating a personally regulated microclimate of comfort. Hydrophilic active particles attract water molecules even in the vapour stage. They absorb the body's IR energy giving water a reason to leave the particle. Active particles add an immense amount of surface area to the fabric and this allows fabric to evaporate more water exponentially faster. **Scout waders.**

Double sealed seam

In order to guarantee the waterproofness, we are double securing the seams in some of our waders. It might be done with either taping the seam twice or with some other means, such as with ultrasonic welding plus a tape. **Scout, Ikon family and Kura waders.**

Multi-layer construction

Widely used approach in wader designs. The lower part of the waders has more layers than the upper part. More layers will provide better durability but will reduce breathability somewhat (**Ikon waders**). In the Ultra family waders (**Scout and Kura**), the same effect has been achieved by making the lower part more durable by using more tightly woven fabrics.

NoSeam™ - leg cut

All our waders have our developed NoSeam™ leg cut that totally eliminates critical vertical seams inside the lower leg part. This cut also keeps most of the loose fabric outside the leg making these waders twice as hardwearing. **All waders.**

Riri® Storm™

Storm™ front zipper makes getting in and out of the wader much easier as well as being handy when nature calls! They are guaranteed to be waterproof and made in Switzerland by RIRI®. **Ikon Zip waders.**

Riri® Aqua Zip®

Aqua Zip® zipper is highly water resistant. Made in Switzerland by RIRI®. **Opas 3P jacket.**

YKK® Aquaseal®

AQUASEAL® zipper from YKK is perfect to be used in waders. Combining VISLON® technology with a new innovative seal between the zipper elements, AQUASEAL® allows a smooth and easy operation. Waterproof if and only if when closed properly. **Scout waders.**

YKK® Aquaguard®

YKK® Aquaguard® zippers provide water resistant protection thanks to their PU-coating. These zippers slide easily and are widely used as the main zippers for jackets and pockets. As they are also highly wind proof they allow a technical and sleek looking finish on your garment without extra storm flaps. **Ikon, Kura and Havu waders. Opas, Atom and Kura jackets.**

Fabric info sticker

The information tag. Tells you all the information you need about the used fabrics. Includes the following info: country of origin, fabric description, fiber content, dye/print method, coating/laminate description, breathability, waterproofness, yarn, density and weight. **All waders and wading jackets.**

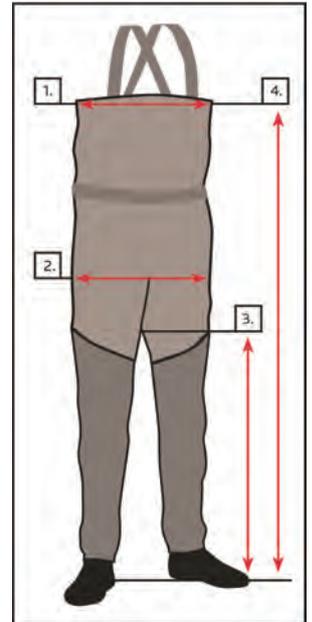

HOW TO CHOOSE THE CORRECT SIZE?

It is important to have the right size of waders to get their maximum performance. For example, if your waders are too small it will stress the seams too much and create a great risk of leakage. The first step in choosing is to find out your type of waders. We have grouped them for Standard, King, Long and Short sizes. If you are of average build, start with Standard sizes. For slimmer and taller builds try Long and for heavier builds use King sizes.

SPECIAL SIZE TABLE FOR HEAVY HAVU WADERS (in cm):

HOPPER

Affordable great looking waders with high-end waders' functionalities. They feel comfortable due to their lightweight construction and material selection. Large front pocket provides plenty of space for accessories. Incorporates all the normal goodies such as matching color belt and braces, built-in gravel guards, drying loops etc.

Code	Item	Sizes	RRP
V8700	Hopper	#XS - #XXL	189

FEATURES:

- Lightweight 4 – layer construction
- Waterproof and breathable F3 fabric
- A large pocket with three sections laminated inside with a water resistant YKK Aquaguard zipper in front
- Matching color belt and braces with olive green details
- D-rigs & accessory loops
- Traditional flip pocket with a zipper
- Built-in gravel guards
- Neoprene feet with left and right side design
- Drying loops

SPECIAL DETAILS:

Traditional inside flip pocket with a zipper.

A large pocket with three sections laminated inside with a water resistant YKK Aquaguard zipper in front.

KURA

The first member of the new ULTRA waders family. These new-era waders have been done with ultrasonic welding technology, which joins fabrics without any stitch holes. This enables extremely light waders with durable non-bulky seams (although they are naturally taped inside just to make sure).

Code	Item	Sizes	RRP
V8900	Kura	#XS - #XXL	299
V8900	Kura Long	#ML - #XLL	299
V8900	Kura King	#MK - #XLK	299
V8900	Kura Short	#MS - #LS	299

FEATURES:

- Ultrasonic welding for flat and durable seams
- Lightweight, packs in a small space
- Waterproof & breathable F3.5™ fabric 3 layer construction
- Three water resistant front pockets with YKK®'s AquaGuard zippers.
- Tool holder pocket in front
- Inner mesh pocket
- Matching colour stretchable wading belt with two belt loops
- Adjustable, matching colour braces
- Built in gravel guard with lace hooks
- Built in drying loops
- Neoprene feet with left and right side design
- Curved NoSeam cut for perfect fit D-loops

HEAVY HAVU

Heavy Havu waders have a thick and heavy 5 – layer fabric on the inside and bottom area to give you the ultimate wear resistance and a well breathing and lightweight 4 – layer fabric elsewhere. They include a novel cut which eliminates the seams from the crotch to a minimum and increase the overall durability of the waders. A large front pocket with a tunnel type hand warmer pocket gives plenty of room for essential gear. Incorporates all the normal Vision waders goodies such as matching color belt and braces, built-in gravel guards, drying loops etc. Due to the new cut, the sizes differ a bit from the older models. Please, see the Heavy Havu table at the end of this chapter.

Code	Item	Sizes	RRP
V8802	Heavy Havu	#S - #XXL	249

V8802	Heavy Havu King	#MK - #LK	249
V8802	Heavy Havu Short	#MS - #LS	249

FEATURES:

- Thicker and more durable 5 layer fabric in the lower rear part and on the side of legs
- Waterproof and breathable F3.5 fabric
- New cut design minimizes seams in the crotch area
- A large zippered front pocket with a tunnel type hand warmer (pocket)
- Curved NoSeam™ cut for perfect fit
- Matching color belt and braces
- D-loops
- Built-in gravel guards
- Drying loops

IKON 2.0 UPDATE

The upgraded IKON 2.0 waders are here. The original development was based on our legendary Extreme waders. After several minor (and some bigger) improvements and after tens of thousands of sold Ikon, Ikon Zip and Ikon Guiding waders, we can now state, that our upgraded Korean made Ikon 2.0 waders are a real bargain when you consider their track record and their features. The 3/6 layer construction with our new F3.5 fabric offers you the most durability and comfort while wading. New E-Tape seam tape provides more elastic seams and thus prolongs the lifetime of these great waders. Stretchable belt, water resistant front pocket, built-in drying loops and specially designed feet and back take these waders to a new level of technology. Pick your favourite from standard, short, long or small socks models.

V3590	Ikon 2.0 King	#MK - #LK	225
V3590	Ikon 2.0 Small Sock, 36-38	#SXS - #SM	225

FEATURES:

- Waterproof & breathable F3.5™ fabric
- 3 layer upper, 6 layer bottom
- Matching colour stretchable wading belt with two belt loops
- Adjustable, matching colour braces
- Built in gravel guard with lace hooks
- Inner pocket
- Water resistant front pocket
- Built in drying loops
- High back design
- Neoprene feet w left and right side design
- New elastic E-Tape
- Korean made

IKON 2.0 ZIP UPDATE

The upgraded Korean made IKON 2.0 waders were developed based on our legendary Extreme Zip waders and have been improved on all the attributes a wader can have including the proven Waterproof Riri Storm 10 zipper. The 3/6 layer construction in F3.5 fabric offers you the most durability and comfort while wading. New E-Tape seam tape provides more elastic seams and thus prolongs the lifetime of these great waders. Stretchable belt, water resistant front pocket, built-in drying loops and specially designed feet and back take these waders to a new level of technology. Pick your favourite from standard, long, king or short models

FEATURES:

- Waterproof & breathable F3.5™ fabric
- Built in gravel guard with lace hooks

SUBZERO 2.0 **UPDATE**

Subzero waders are designed for maximum warmth. They are manufactured from hardwearing, high quality 5mm. neoprene rubber that is very supple, lightweight and flexible. In addition it does not become hard and uncomfortable with time. All seams are triple sewn and taped for extra durability. The broad neoprene shoulder straps distribute weight equally and comfortably. For season 2017 we upgraded the waders by changing the colour, the paddings on the knees and most importantly the actual neoprene in order to make them even more comfortable to use.

Code	Item	Sizes	RRP
V3200	Subzero 2.0 5mm	#S - #XXL	169

FEATURES:

- 5 mm neoprene
- All seams triple sewn and taped
- Broad neoprene shoulder straps

Chapter 11: WADING BOOTS

For all conditions - fly fisherman's safety shoes.

SPRINTER

Code	Item	Size	RRP
V3107	Sprinter with Gummi rubber sole	#7 - #13	169

STORY: Ready, steady, GO! Fly fishing maybe be considered as the Quiet Sport, but sometimes you have to hike long distances or move fast in order to hook a proper fish or two. For those conditions we developed new Sprinter wading shoes. Lighter, leaner and with lower cut they resemble and feel very much like modern hiking boots. Strong construction with carefully selected materials together with proven Gummi sole (stitched through) make them a full-blooded wading shoes capable of surviving even the toughest wading environments with flying colors. A comfortable hiking shoe with respectable wading functionalities or a hardcore wading boot with great hiking capabilities. Either way, we are very proud of them.

FEATURES:

- Lower cut, more like a modern hiking shoe
- Strong PVC & nylon construction
- Comfortable fit
- Gummi sole with raised front which is also stitched through
- Can be studded with Vision tungsten studs

Super hard tungsten tip with four pointed crown design. Easy to mount with provided tool. NOTE, the midsole must be minimum of 13mm thick; otherwise the tip can puncture your wader's sock.

Code	Item	RRP

* for Sprinter and Hopper Gummi / all felt soles

TUNGSTEN STUDS

HOPPER UPDATE

Code	Item	Size	RRP
V2080	Hopper with felt sole	#6 - #14	109
V2081	Hopper with Gummi sole	#6 - #14	149

FEATURES:

- Felt sole stitched through to secure it
- Lightweight
- Made out of strong nylon
- Minimal amount of seams for longer life
- Comfortable neoprene lining
- Gummi sole stitched through to secure it
- Can be studded with Vision Tungsten studs

STORY: Hopper wading boots are very light in weight and remind you more of the hiking shoes. They are made out of strong nylon material and reinforced with rubber bumper. The shoe opens up wide so it is very easy to put on and the nylon lace loops hold the laces while you tighten them up. High design with neoprene cushioning maximizes the comfort and support. For year 2016 we introduced improved Hopper wading boots with our revolutionary Gummi rubber soles. We raised one-piece rubber bumper around the shoe and the Gummi sole with raised front is stitched through to secure it. For 2017 we'll do the stitching for the felt sole as well.

Gummi sole stitched through as well

FEATURES:

- Lightweight but solid
- Made out of synthetic material for minimal water absorption
- Optimized seam placement
- Comfortable neoprene lining in the ankle part
- Proper protection for the toe and heel areas
- Durable nylon shoe laces
- Available in addition to full felt soles with novel Gummi rubber soles and low profile tungsten studs and with plain Gummi soles.

Code	Item	Size	RRP
V3110	Loikka with felt sole	#6 - #13	139
V3111	Loikka Gummi rubber sole & tungsten studs	#6 - #14	209
V3112	Loikka Gummi rubber sole	#6 - #14	169

STORY: In 2013 we presented wading boots called Loikka. They were the outcome of 15 years of evolution – our dream boots. The foundation of these fully synthetic boots lies on the highly popular Mako boots, but they include several essential improvements. The front part of the boot is now well protected by a special “rubber shield”. The number and positioning of always vulnerable seams is optimized. The ankle part gives a proper support and is lined with comfortable neoprene. Its design is based on our ultra-comfortable Hopper wading boots. This means that the boot is extremely easy to put on and take off. Shoe laces go through nylon loops on the lower part and reduce thus the number of metallic staples, which can in worst case wear the laces and rust when used in saltwater conditions. Loops enable fast and easy tightening of laces with less energy.

However, having stated all the above, the biggest improvement of them all, can be found from the sole part of these boots. After a long period of development and testing, we were able to introduce a brand new rubber sole, called **GUMMI**. This material is clearly softer and stickier than for example widely used Vibram. As a result we now have a material, which is providing a unique level of traction. To make sure that the sole stays glued to the bottom of the boot, we extended the sole to cover the front part of the shoe giving thus good protecting for toes. This way we can prevent the way too common phenomena, where something sharp goes between the sole and the boot and eventually causes sole separation. The final touch in our pursuit for superior traction is achieved by including well tested and proven low profile tungsten studs to the sole. Loikka wading boots are naturally also available without the studs and with a felt sole, These boots are meant to be used in the hardest imaginable conditions. You just can't abuse them. Go and give your best shot.

Gummi rubber sole & tungsten studs

Chapter 12: **WADING ACCESSORIES**

A lonely fisherman wades out in order to cover the sweet spot of the pool.

SUBZERO SOCKS

Code	Item	RRP
V2071	Subzero sock 35-38	29
V2072	Subzero sock 39-42	29
V2073	Subzero sock 43-46	29

These knee high extra thick socks keep you warm for sure. You can also use them in warmer weather thanks to the Merino wool's excellent breathability and moisture permeability. Technical weaving provides a better fit while wading. Subzero has a strong Polyamide outer surface for hard usage

SUPPORT BELT

Code	Item	RRP
V1010-S	Support belt 28/34"	38
V1010-M/L	Support belt 34/40"	38
V1010-XL	Support belt 40/50"	38
V1010-XXL	Support belt 46/60"	38

Easily adjustable well-padded support belt is fitted with two D-rings. It gives you ample support to make your fishing day even more enjoyable. Four sizes to cover everybody.

FELT SOLE

Code	Item	RRP
V1100	Felt sole	22

Thick felt soles are made from tight fibre 100% polyester felt.

WADER BELT

Code	Item	RRP
V1301	Wader belt	18

A must for safety! This durable elastic belt flexes when you move. The quick-release YKK -buckle made of sturdy Delrin® has no projections to catch your line.

GRAVEL GUARD

Code	Item	RRP
V1300	Gravel guard	24

The neoprene gravel guards will fit over any boot and stay put. The neoprene is nylon faced on the inside, and the outside is a brushed, loop fabric making the Velcro closure system infinitely adjustable. They are designed individually for left and right foot. They can also be hooked securely to your wading shoes to avoid riding up.

NEOPRENE SOCKS

Code	Item	Sizes	RRP
V1302	Neoprene cover sock	#M - #XXL	17

These socks have the same double-seamed design as on our Stockingfoot waders making them fit well without a bulky feel. They are designed to be worn wet wading or over stocking foot waders for extra support and protection. The advanced cut makes them easy to pull on and off.

WADING STAFF

Code	Item	RRP
V9909	Wading staff	65

The seven section wading staff made of strong aluminium is reliable. It straightens out automatically when removed from its holder. It has an ergonomically shaped EVA-handle and double elastic strap for a good grip wet and dry. This handle is also much more durable than traditional cork handles. Total length as open 59" and closed 10".

SHOELACES

V1305

V130R

Code	Item	RRP
V1305	Shoelaces	5.90
V1305R	Shoelaces Big Daddy	5.90

Sometimes a sharp rock will cut your lace into pieces or you'll realize while tightening old laces that you should have saved that extra energy to gym. No problemos. Extra pair of shoelaces is always a good companion on your fishing trips, near or far.

Chapter 13: JACKETS.TROUSERS

Conditions on a remote Irish lough can change very quickly.

LOHI JACKET **NEW17**

STORY: Lohi (salmon in English) is a waterproof and breathable wading jacket. The cut of the jacket is based on our Kust jacket, but the fabric is slightly thicker. The jacket includes standard Vision wading jacket features, such as strongly curved sleeves, hand warming pockets on the sides (no fleece because of frequent deep wading), adjustable Velcro wrist cuffs and a hem drawstring and a large fully adjustable hood to fit nicely over a cap or a beanie. In addition, Lohi has some special features: the fleece lined collar is slightly oversized, the inside chest pocket has a pass for headphones and both outside pockets are equipped with internal D-rings. There is a removable integrated sunglass wipe on a cord inside the left chest pocket.

FEATURES:

- Waterproof and breathable F4 fabric
- YKK® AquaGuard® VISLON® main zipper
- Strongly curved sleeves with incut cuffs
- Two outside chest pockets with D-rings inside
- A chest pocket inside the jacket with pass through for headsets
- Outside pockets are armed with YKK water resistant zippers
- Sunglass wipe clipped in to the D-ring of the left chest pocket
- Oversized fleece lined collar for hard core weather
- Fully adjustable hood
- Adjustable hem drawstring seals out bad weather
- “Forestjack” texture makes sure that this jacket will be noticed.

Little Parts. Big Difference.

Code	Item	Sizes	RRP
V6530	Lohi jacket, green/black	#XS - #XXXL	259

DETAILS:

Two chest pockets inside the jacket with pass through for headsets

The hem of the jacket is easily adjustable with two speed tighteners.

Adjustable Velcro wrist cuffs inside the sleeves.

YKK® AquaGuard® VISLON® main zipper

Sunglass wipe on a cord clipped in to the D-ring of the left chest pocket.

VENE JACKET

STORY: Vene (*boat in English*) is our first jacket designed especially for boating activities in mind. Waterproof and breathable of course, but with a bit more durable fabric to tackle the harsh marine conditions. The jacket includes standard Vision wading jacket features, such as strongly curved sleeves, adjustable Velcro wrist cuffs and hem drawstring and large fully adjustable hood to fit nicely over a cap or a beanie. In addition, Vene has some special features: the fleece lined collar is slightly oversized, the hand warming pockets on side are with zippers, inside chest pockets have passes for headsets and all outside pockets are equipped with internal D-rings. Sunglass wipe on a cord inside left chest pocket and reflective prints are safety features when boating. Lumberjack texture will make sure that this jacket will not go unnoticed.

FEATURES:

- Waterproof and breathable F4 extra durable fabric
- YKK® AquaGuard® VISLON® main zipper
- Strongly curved sleeves with incut cuffs
- 2 big side pockets with zippers and with micro fleece lining to keep the hands warm and cozy
- 2 outside chest pockets with YKK water resistant zippers
- 2 chest pockets inside the jacket with pass through for headsets
- 2 big mesh pockets inside the jacket
- D-rings inside all of the 4 outside pockets for keeping everything from boat keys to small accessories safe and handy
- Sunglass wipe on a cord clipped in to the D-ring of the left chest pocket
- Oversized fleece lined collar for hard core weather
- Large fully adjustable hood
- Adjustable hem drawstring seals out bad weather
- Reflective prints for safety

OPAS 3P JACKET

Light shell type orange jacket made from excellent waterproof & breathable F4 fabric is stripped from everything else other than essential features. This technical jacket with slightly slimmer cut includes a novel pocket design which enables the use of different types of carry systems - two front pockets are both equipped with dual vertical zippers on both sides of the pocket. Main zipper is highly water resistant RIRI's Aqua Zip and the jacket includes standard Vision wading jacket features, such as strongly curved sleeves and fleece lined high collar.

Code	Item	Sizes	RRP
V7391	OPAS 3P Yellow	#M - #XXL	259

FEATURES:

- Novel innovative front pocket system for carry systems
- Technical jacket with slightly slimmer fit
- Waterproof & breathable F4 fabric
- Riri's Aqua Zip main zipper
- YKK zippers on pockets
- Strongly curved sleeves
- D ring in the back for hanging a net
- Fleece lined high collar for wind protection

KURA JACKET

Kura jacket is a slim fit three-layer jacket, made from F3.5 fabric. It has a roomy barrel pocket on each side and soft hand warming pockets. It doesn't have internal lining preventing breathability or making it slower to dry. Jacket has one exterior napoleon pocket with a zipper. Its main zipper is made by YKK®, which combined with dual storm flaps will provide excellent water and wind protection also in the zipper area. Small pockets on top of the barrel pockets are equipped with YKK® Aquaguard zippers. It has Velcro adjustable cuffs and adjustable helm to keep the cold air out. 3-way adjustable hood keeps your head dry and protects from rogue flies...

Code	Item	Sizes	RRP
V6330	Kura, light brown	#S - #XXL	198

Chapter 14: **VESTS.BAGS.TUBES**

Vision friend Antti Vappula with a nice brown trout from Finland.

MEGA BRA

FEATURES:

- Strong ripstop material
- Six zippered front pockets
- Two zippered pockets inside and one on the rear
- Five mesh pockets
- Mesh lining for comfort
- Large expandable rear pocket
- 4x D-rings in front and D-ring for landing net on back
- One YKK buckle and a zipper for closing
- Two integrated zingers

Code	Item	RRP
V3575M	Mega Bra, military green	119

Suitable for all of us who appreciate volume, beauty and functionality. A cross-breed between a fly fishing vest, a chest pack and a small day pack. Mega Bra has six zipper pockets in front, two inside and one in the back. Additionally, it has five mesh pockets and one large expandable rear pocket roomy enough for example for your shell jacket and lunch. Mega Bra has two integrated zingers and five D-rings (one for attaching your landing net). It is easily adjustable for every size and a short front YKK zipper and a buckle secure it when needed. The inside material of the vest is a strong mesh enabling proper ventilation. This multi-purpose combo is easy to put on and extra padding in the back makes it comfortable to wear during long fishing days.

MYCKET BRA

FEATURES:

- Strong ripstop material
- Two large zippered front pockets
- 3x Tippet pockets in front
- Large zippered mesh pocket in front
- 4X Pockets for pin on reels
- Large zippered rear pocket
- D-ring for landing net on back
- YKK buckles and zippers
- 2x D-rings in front
- Front and back parts can be easily separated (clips)
- The front can be used individually or attached to a back pack
- Includes separate, adjustable, padded neck strap with D-loop
- Includes separate, adjustable, waist strap

Code	Item	RRP
V3577M	Mycket Bra, military green	79

This old favorite is very versatile. You can use the front individually with provided neck and waist straps or you can easily attach it to our Aqua Day Pack or almost any other back pack.

MINI BRA

Code	Item	RRP
V3578M	Mini Bra, military green	49

Made out of strong ripstop material. Small in size, but big enough for the day's flies and accessories. We gave it new colors and better materials. The main compartment takes one big fly box and the smaller compartment accommodates a small box or plenty of tippets, leaders and other accessories. The front mesh pocket is handy for items, which have to be easily reachable. Neck and back straps can be removed if you prefer to hang it on your Aqua Day pack's or wader's D-rings. The Mini Bra can also be used on a wading belt. The neck padding has useful D-ring to hang the net.

LOVE HANDLES

FEATURES:

- Strong ripstop material
- Two large zippered front pockets
- Large zippered mesh pocket in front
- Two built in retractors
- YKK buckles and zippers
- Two plastic clips in front
- Two bottle mesh bags and two plier pockets
- D-ring for landing net on neck cord

Code	Item	RRP
V3579M	Love Handles, military green	69

Love handles is not only a traditional belt bag but you can also use it at chest height as it has an adjustable neck cord. There are two plastic clips that can be used to attach the bag onto our waders' D-loops or to the front of our Aqua Day Pack. This bag is wide enough on the sides to give you support with a heavier load and keep it steady. There's a D-ring in the neck cord to attach your landing net.

CARIBOU VEST

FEATURES:

- Comfortable rib knit collar
- Mesh lining for comfort
- Four large zippered front pockets
- Six pockets with velcro closure on front built in pin on reels
- Large zippered rear pocket
- D-ring for landing net on back

Code	Item	Sizes	RRP
V3366	Caribou vest, khaki	#XS-#XXL	95

Code	Item	Sizes	RRP
V3367	Caribou vest, green	#XS - #XXL	95

The Caribou vest has plenty of pockets, all well positioned and equipped with heavy-duty high quality zippers or velcro. The nylon outer layer is durable and highly water-resistant. The shoulders have an extra layer made of a porous flexible material that distributes the weight perfectly.

AQUA GEAR BAG

Code	Item	RRP
V5311	Aqua Gear Bag	29

A small multi-purpose bag which can be used for carrying a camera, small fly boxes or any other smaller accessories. For camera use there's a protective, removable neoprene lining. The flat outside pocket takes easily couple of extra leaders or a tippet spool. With the belt loop this is easily added to your normal wading belt or even as an extra to our Aqua- or Love Handles. This bag is waterproof IF AND ONLY IF closed well and securely.

Measures 11.5cm x 7.5cm x 15cm

AQUA HANDLES **UPDATE**

Code	Item	RRP
V5310G	Aqua Handles. green	59
V5310	Aqua Handles	59

A great all-round bag for active fisherman. Enables you to have the most needed fly boxes, tippet spools, line clippers etc. around your waist for quick use. The adjustable waist belt has small pockets which have in built bottle / accessory pockets which you can pull out only when needed, keeping the bag sleek and simple otherwise. The smaller water resistant outside pocket keeps your tippet spools and leaders easily available. This bag is waterproof IF AND ONLY IF closed well and securely.

Measures 29cm x 12cm x 18cm

AQUA SLING

Code	Item	RRP
V5312	Aqua sling	109

Aqua Sling gives you freedom to fish. It is totally out of your way until you need it and then with just one quick move you have full access to two compartment bag. Both compartments have inside pocket leaves with zipper pockets for smaller items. Main compartments are big enough for water bottles, several fly boxes, cameras etc. With YKK's highly water resistant AquaGuard zippers it keeps your gear dry even in bad weather.

AQUA DAY BAG UPDATE

Code	Item	RRP
V5308G	Aqua Day Bag, green	109

Aqua Day Pack is a totally waterproof backpack for your day trip to a fishing destination. It has a thinner and softer material than in the original previous generation. It has inner and outer mesh pockets for smaller items and an elastic nylon string outside. You can easily expand this bag by attaching our Love Handles, Mycket Bra or Mini Bra to the shoulder straps' D-rings. Waterproof roll-down closing with quick-release buckles for easy use. This bag is waterproof IF AND ONLY IF closed well and securely.

Measures 50cm x 29.2cm x 17cm

AQUATUBE

Code	Item	RRP
V5309	Aquatube	129

A real carry all bag which keeps all your stuff dry. With its wide entrance you can easily throw in even a 4-piece rod tube and the one piece main compartment accommodates your week's fishing gear without problems. Carry handles and wide, well-padded shoulder strap makes it comfortable to carry around. Water resistant outside pocket is handy for smaller items which you need to have quickly in hand. This bag is waterproof IF AND ONLY IF closed well and securely.

Measures 82cm x 30cm x 30cm.

ALL IN ONE

FEATURES:

- Small covered pocket on the top for name card
- Adjustable shoulder strap with shoulder pad
- Heavy duty 2" wide cordura carrying straps with velcro connector

Code	Item	RRP
V5100B	All in one, black	59

Constructed of tough and durable Oxford polyester cloth, this bag offers the features you need. It has a large main compartment for clothing with a U-shaped zippered entry for dry storage. Mesh storage pockets inside the main compartment with elastic retainer straps hold tackle. Two generous end compartments with drain holes and mesh uppers hold wet waders and boots for drying. The bag is also equipped with a large side pocket for accessories.

Measures: 81.3cm x 32.3cm x 34.3cm

HARD GEAR BAG

Code	Item	RRP
V5757B	Hard gear bag, black	59

This bag is a real multi-purpose bag for the enthusiastic fly fisherman. It can be used as a spacious reel bag, accommodating a big bunch of differently sized fly reels but thanks to its genius inner wall system you can modify it as you like, according to your needs. In addition to reels you can make a supportive space for your digital SLR or video camera. Or you can use it as a big fly tying bag when travelling. The soft divider gives extra protection when the bag is closed and its numerous zipper pockets keep your small accessories in order and easily accessible. The moulded bottom part is waterproof up to the rivets and stitches, so it can easily be left on the bottom of your boat.

Measures 46cm x 32cm x 18cm

WADER BAG

Code	Item	RRP
V5303	Wader bag, black	49

Our innovative wader bag is combined with a car seat cover which can be also used when changing into waders. The mesh made top enables your wet waders and shoes to dry while stored in the bag.

Measures 44.5cm x 30cm x 32cm

TRAVEL TUBES

Code	Item	Length	RRP
VTT82	Vision Travel Tube 82	82cm	49
VTT110	Vision Travel Tube 110	110cm	49

Code	Item	Length	RRP
VTTR74	Vision rod&reel tube 74	74cm	34
VTTR95	Vision rod&reel tube 95	95cm	34

This is a great tube for the destination angler who wants to carry several rods in one tube. These are available in four different lengths; 82cm for 4-piece rods up to 10ft, 110cm for 3-piece rods up to 11ft, 140cm for 4-piece DH rods up to 17ft and 160cm for 3-piece DH rods up to 15ft (each length is the maximum length for a rod part) and their inside diameter is 10cm. There is a carry on handle, adjustable shoulder strap, address card pocket and protective end caps on both ends. Separate cloth bags are available in two different sizes to cover all 4 tubes.

Two new versions feature a reel pouch so you can have your fishing kit ready to go all the time. The reel pouch is padded to protect your reel from impacts. Both have a carry on handle and an address card pocket. The 74cm model is for 4-piece rod up to 9ft + fly reel and the 95cm model is for 3-piece rods up to 9ft + fly reel. The zippers are strong and original YKKs.

Chapter 15: LAYERING

Vision friend photographer Pasi Visakivi posing with his late-season trophy.

Thermal Pro®

Polartec® Thermal Pro® gear is the most visually dynamic and technically advanced of the Polartec® insulation fabrics. Available in a variety of unique surface textures and patterns - many of which are designed to enhance performance — Polartec® Thermal Pro® materials are great styling options for virtually every end use. New high loft versions have achieved the highest warmth-to-weight ratios of any fabric Polartec® has ever offered. Other versions have the look of traditional wool with all the performance benefits of fleece. Polartec® Thermal Pro® is our most diverse family of fabrics. **Thermal pro overall and Thermal pro jacket.**

PRIMALOFT.

PrimaLoft® insulation form a tight collection of air pockets that trap heat from your body and keep the cold out, providing excellent warmth to weight ratio. PrimaLoft® fibers have been engineered to be ultra-fine and mimic the softness of goose down. The fibers were developed to be water resistant to stay drier and maintain insulating properties. Specially developed fiber finishes repel water and keep the insulation drier even if water is forced into the insulation. Ultra-fine fibers make it more compressible.

FIRST SKIN SET

This thermal and cooling underwear set is perfect in all conditions as the only layer under your waders or in colder conditions combined with our mid-layer insulation fleece. They are made out of Bamboo and Micro polyester. This construction provides temperature control and excellent moisture transfer. Thanks to its bamboo fibres it is also naturally odour free. The technical cut with flat seams provides maximum comfort.

Code	Item	Sizes	RRP
V1119	First skin layer set, olive/grey	#S - #XXL	69

SUBZERO PRIMALOFT PANTS | 40g

Casual looking highly breathable PrimaLoft® pant. We chose 40g PrimaLoft® Sport Insulation because we felt this provided the best warmth to breathability ratio when you use these under your waders. Very comfortable against the skin or with our First Skin underwear when you need a bit of extra layering for those cold early season days.

Now your visit to the gas station before fishing doesn't have to end when a kid says; "Look ma that man is walking around in his underwear".

Code	Item	Sizes	RRP
V3666	Subzero 40g pants, brown	#S - #XXXL	115

FEATURES:

- 30 denier nylon rip stop shell fabric with DWR/ Cire/ light coating treatment
- Lightweight 40g PrimaLoft® Sport Insulation provides excellent warmth and compressibility
- Highly breathable and quick drying
- Casual look and cut
- 2 hand pockets in front and 2 back pockets

SUBZERO PRIMALOFT JACKET | 60g

Challenged only by goose down, Nature's ultimate insulation material, PrimaLoft® has gained huge numbers of loyal followers in various outdoor activities. Subzero jackets were our first endeavors into the world of this wonder fiber. Both jackets are equally suitable to be held under a wading jacket for insulation as they are to be held as the outside layer. They are highly wind and water resistant, can be packed in a very small space and in case of getting wet they dry quicker than a down jacket. Polyester rip stop shell fabric provides additional water and wind protections. These jackets have a full length center front zipper. Elasticized cuffs and an adjustable hem seal out wind and trap warmth. 60g version is very light and comfy and has no removable hood. A great jacket for any outdoor activities when the temperature is not ridiculously low.

Code	Item	Sizes	RRP
V3331	Subzero Light Jacket Black	#XS-#XXXL	149

FEATURES:

- 25 denier polyester rip stop shell fabric with DWR treatment
- Lightweight 60 g PrimaLoft® Sport insulation provides excellent warmth and compressibility
- Full length center-front zipper allows for easy ventilation
- One chest pocket on the outside and one inside.
- Elasticized cuffs and adjustable hem seal out wind and trap warmth
- Mesh bag

THERMAL PRO JACKET

Warm and well breathing layering jacket for the coldest months. Made from the same Polartec® Thermal Pro® fabrics as our trousers and overall. This grey colored jacket has full length center front zippers, two zippered side pockets and zippered left chest pockets. Elasticized cuffs prevent cold air from getting in. A basic, but well-shaped design for a comfortable fit and a warm, soft feel. Multi-purpose jacket for both fishing and after-fishing activities.

Code	Item	Sizes	RRP
V5050	Thermal pro Jacket,	#S - #XXL	110

THERMAL PRO OVERALL

Our very popular Thermal Pro overall is the best value mid layer fleece available. Its simple design hides a technical item of clothing with a complicated cut. As standard fleece stretches in only one way, we cut it in pieces to position both vertical and horizontal stretch wherever needed for better fit and function. Instead of using normal straps that have no thermal qualities and are bulky under the waders, we made ours to fit and feel snug while offering the needed stretch. Keeping wading shoes in mind, we made the cuffs high and tight. This will prevent bulky ankles and give maximum comfort.

Code	Item	Sizes	RRP
V5004	Thermal pro overall, grey	#S - #XXXL	89

Chapter 16: CLOTHING

Vision/Fly-dressing Niklaus Bauer with a trophy-sized coalfish.

SAVING THE NATIVES

Inspired by a proposal made by *Jasper Pääkkönen*, highly valued spokesperson for endangered fish species, an avid and skillful fly fisherman and an actor currently starring in the History Channel TV series Vikings, Vision initiates a special *Save the Natives* –fund. Vision will annually make a donation to a selected project aiming to improve the conditions of endangered native trout and/or Atlantic salmon stocks in Europe. The money comes directly from the annual sales of the appropriately named Save the Natives apparel product family including currently a T-shirt and a cap.

THE 2016-2017 RECIPIENT

The first donation goes to Finland and more precisely to a stream conservation society *VIRHO* operating actively for example all around the Vision Headquarters located in Hyvinkää some 50km from capital Helsinki. The upper reaches of River Vantaa are situated just few kilometers from the HQ and the well-being of that particular native sea-run brown trout stock is naturally very important to everybody working for the company - regardless whether they are fly fishermen or not.

VIRHO - FINNISH SOCIETY FOR STREAM CONSERVATION

Virho has restored a great number of trout and salmon spawning and living habitats in streams since 1990. The work has mostly been done delicately by hand and is based on voluntary work. In addition, Virho has constructed several fish passages. River Vantaa which streams through Helsinki is an excellent example of this successful work. Nowadays, trout naturally reproduces in this wide watershed, which has made stocking of trout unnecessary in the river system.

www.virtavesi.com

THE GODFATHER GETS IT: Jasper Pääkkönen receives a high-end Vision XO fly rod (serial number 001) from Vision's product manager Antti Guttorm as a token of appreciation for his participation in company's product development and testing as a long-term Vision World Team member and for his relentless battle for the endangered native trout and Atlantic salmon stocks in Finland and beyond. The cap is a season 2017 model from the Save the Natives product family.

A SUCCESS STORY: Big sea-run brown trout spawning in a small tributary of River Vantaa near the capital Helsinki. Photo: Ari Laine

CO-OPERATION BETWEEN VISION AND PURE WASTE.

Starting from season 2017 two Finnish companies, Vision Group Ltd. and Pure Waste have begun co-operating in the spirit of saving natural resources and especially our endangered wild salmon and trout stocks. Pure Waste textiles makes ecologically sustainable and premium quality 100% recycled yarns, fabrics and ready-made garments. The products are entirely made out of recycled textile waste and offer the consumer the same quality and comfort as those made out of virgin materials. To meet the growing demand for ecological fabric solutions they utilised their long expertise in sustainable design and developed a global textile recycling and manufacturing supply chain. They source textile waste on a global scale and

recycle it into fabrics and yarns. Because their products are made entirely out of discarded waste they can guarantee their ecological sustainability, a value that guides all of their work. For instance, using recycled cotton saves 11,000 litres of water per kilogram, which would otherwise be required to produce the water intensive cotton crops. In addition to the ecological sustainability of their products, their quality is also of crucial importance to the company. By monitoring in detail their source materials and the recycling process they are able to ensure that the quality of their products fulfills all the standards required by their clients and end-customers.

MADE OF 100% RECYCLED TEXTILE WASTE.

15% of produced cotton is wasted every year during the clothing manufacturing process, enough waste to produce 3 t-shirts for each person on the planet.

This equals 38.5 billion litres of fresh water. With this amount we could provide drinking water to 25 million people yearly.

PURE WASTE
100% RECYCLED TEXTILES

Our products are made of textile waste, leftover from the clothing manufacturing process.

We turn the fabrics into products that save huge amounts of fresh water.

We first sort the waste by colour then we refiber and spin it into new yarn.

This allows us to produce fabrics without dyeing and without use of fresh cotton.

SEE PUREWASTE.ORG FOR FURTHER DETAILS

GRAND SLAM **NEW17**

A classical T-shirt for a fisherman. Features fishing art by a Finnish artist Sakke Yrjölä (see sakkeyrjola.com), who just recently (2015) co-authored an impressive Suomen kalat (The Fish of Finland) book. If you catch an Atlantic salmon, brown trout and a grayling in one day you have completed the Scandinavian Grand Slam. Not an easy task by any means. Manufacturer Pure Waste Ltd from recycled materials.

WILLA BEANIES

Code	Item	RRP
V2943	WILLA Subzero Beanie, Dark olive	45
V2944	WILLA Subzero Beanie, Burnt orange	45
V2945	WILLA Light Beanie, Dark olive/light olive	39
V2946	WILLA Light Beanie, Red/grey	39
V2947	WILLA Bill Beanie, Dark olive	45

Willa Beanies are all made out of 100% Bluesign approved merino wool with the best available Schoeller yarns and are hand crafted in Europe. Subzero Beanies are warm enough for the coldest possible conditions. They include an anti-itch head band for those who are sensitive even to the finest merino wool. The head band is made of Polycotton yarn (a technical highly breathable and light yarn). On top of being itch free it also ensures that moisture is transferred to the outer Merino Wool. The wool has the wonderful effect of insulating well even when wet. Light Beanies are pure merino wool and slightly thinner than Subzero beanies. Dark Olive Bill Beanie has a cap for extra protection and street look. One size fits most heads.

Chapter 17: SUNGLASSES

Vision product manager Antti Guttorm swimming with a tarpon in Florida.

Fishing glasses are a very important piece of fly fishing equipment. Not only do they protect your eyes but they also greatly enhance your chances of spotting fish. Wading becomes safer when you actually see where you are putting your feet. Our exclusive range of polarized eyewear offers all levels of performance and style. They are all made in France.

We expanded our sunglass range. On top of looking good the Mirrorflite series offers a bit of extra protection from the sun with the mirror coating reflecting more sun rays away from the user's eyes. All Mirrorflite models come with a hard protective case. Made in France.

Bat

Large frames with big lenses and side windows for maximum visibility. Proper sun glasses for fishing.

Midge

Elegant frames for everybody with narrow head and desire to use one pair of sun glasses for fishing and all other activities.

Tuna

Classic style with modern lenses. Looks like straight from the streets of Havana in the early 1950s.

Kust

Your number one choice if you go saltwater fishing on shallow flats. This lens and mirror combination is the choice for most of the professional shallow water saltwater guides.

Boulder

A generic model suitable in addition to fishing also for various sports activities. Brown is the color at the moment.

Kapu

Traditional model for fishing. Works also in the urban environment.

Superstar

Big lenses in frames combining old and new design. With these you'll definitely get noticed.

Upi

Modern classic look that makes you enjoy a day on the water or a beer on the terrace.

Code	Item	Lenses	Frames	RRP
VWM01	Bat sunglasses	Bronze with Disco mirror	Black	69
VWM02	Midge sunglasses	Bronze with Disco mirror	Black	69
VWM03	Tuna sunglasses	Bronze with Dark Gold mirror	Light tortoise	69
VWM05	Kust sunglasses	Bronze with Emerald Green mirror	Dark tortoise	69
VWM07	Boulder sunglasses	Bronze with Dark gold mirror	Transparent Chocolate Brown	69
VWM09	Kapu sunglasses	Bronze with Disco mirror	Black	69
VWM11	Superstar sunglasses	Bronze with Disco mirror	Black outside, Cream inside	69
VWM13	Upi sunglasses	Bronze with Dark gold mirror	Matte black	69

POLARFLITE

Our Polarflite shades includes a wide collection of frames with Activ tri-acetate cellulose lenses. They give 100% protection from UVA-, UVB- and UVC light. They effectively block both visible light and the light reflected from water surface reducing the aligned, partially polarized glare. They are finished with hardcoat scratch- resistant surface. These lenses will not absorb haze and will stay constant with a low haze value of 0,4%. A perfect choice for all-round shades. These standard polarized plastic lenses have all the optical qualities needed for fishing. They are also very light. The 2by4 is designed to be worn with the glasses. Pouch included. Made in France.

Polarflite™ lens colours

The lens colour determines how much light will pass through a lens. To keep vision optimal you need less light in sunny conditions and more in cloudy weather. **Yellow:** These lenses actually work as light enhancers. Good for dusk and low light as well as for overcast days and evenings. **Brown:** A superb all-round constant density lens. It provides the best combination of true colour transmission and contrast. The optimal performance is achieved in medium bright to bright conditions.

Polarflite™ SLIDE Sunglasses

Retro style frames with a new gradient brown polarized lens. The lenses are darker on top and lighter almost clear at the bottom. Great for lowlight conditions.

NECK CORD

Our neck cord comes with floatants which will keep your sunglasses on the surface should you drop them in the water. Fits most frames.

Code	Item	RRP
VFN	Float neck Cord	8

Chapter 18: ACCESSORIES

Vision World Team member Jasper Pääkkönen getting ready for his jungle adventure.

NANO SILICON FLOAT

Code	Item	RRP
V0910	Nano Silicon float 20ml	9

Nano Silicon is a nontoxic, silicon floatant that doesn't leave an oil slick on the water. Thermally stable it will not harden or become too thin in differing weather conditions.

Available in 20 ml easy to use transparent bottles equipped with small chains. No need for additional bottle holsters.

Apply a drop to your fly before you cast and reapply as needed. Made in U.S.A.

CDC FLOAT

Code	Item	RRP
V0912	CDC float 20ml	9

CDC was designed especially to float CDC flies although it works great on all dry flies. Non-toxic and temperature stable it is great for all weather conditions.

Available in 20 ml easy to use transparent bottles equipped with small chains. No need for additional bottle holsters.

Apply a drop to your fly before you cast and reapply as needed. Made in U.S.A.

ULTRA FLOAT 2

Code	Item	RRP
V0901	Ultra float ²	5

Ultra Float ² is much improved. It now floats better and is easier to use. A universal non-sticky floatant which can be applied with your fingertips. Colour and scent free. Removes any remnant of human odour from the flies.

BRUSH & FLOAT POWDER FLOAT

Code	Item	RRP
V0915	Brush & Float	9

Fine powder floatant with a brush in the cap. Use it for dry flies or creating realistic looking air bubbles on nymphs, pupas or wet flies.

Code	Item	RRP
V0903	Powder float	9

The very best floatant for small and medium flies. Prolongs the life of your flies and removes fish slime and blood. Rinse your flies in water before applying Powder Float, put them in the box, shake a couple of times and presto! They are ready for use again. The double-sided bottle makes this much easier compared to traditional bottles. It also has a loop to attach the bottle to your pin on reel.

SPRAYS

Code	Item	RRP
V0917	Nano Fly spray	10
V0916	Spray & Cast	12

NANO FLY SPRAY: Permeates nearly every kind of fly body material, and gives your flies a water-repellent treatment. Give the fly a couple of false casts after application.

SPRAY&CAST: Fly line treatment spray. One of the easiest line treatments to use on the market. Simply spray it on the line and go fishing.

STRIKERIGHT

Code	Item	RRP
9511	StrikeRight strike indicator	7.50
9512	StrikeRight, small size	7.50

StrikeRight indicators are 30% lighter than other foam indicators, so they float higher and are easier to see and cast. Because they are aerodynamically shaped at both ends, they cause less wind resistance when casting. StrikeRight indicators are easy to apply and remove, and they are reusable. Each package includes six pieces.

FERRULE WAX

Code	Item	RRP
V0913	Ferrule wax	5

Protects rod joints and prolongs thus the lifespan of your dear friend.

STRIKE INDICATOR

NOW YOU SEE IT – NOW YOU DON'T. STRIKE!

With our Strike indicator system you get the feather light presentation of a traditional yarn indicator without the kinks in the leader. There are no knots required to make this indicator which means your leader won't get damaged. It is very easy to use with the tool that comes with the kit. Thread the leader through the silicone tubing with the tool and place the yarn in the loop of the leader. Tighten from both ends of the leader and the silicone tube will slide over the yarn. Now you can trim it to desired size. See pictures for the instructions. Trim it small to get the sensitivity required in slower currents and light nymphs. Trim it big for the chop and heavy nymphs. The indicator is also adjustable to get the nymphs to the right depth. You can remove the indicator easily and the tube is reusable.

Kit includes tool, silicone tubing and yarn.

Code	Item	RRP
V9501	Strike indicator	18

FEATURES:

- Easy to use
- No knots required – no damage to the leader
- Adjustable
- Easy to remove
- Can be trimmed to desired size
- Good presentation
- Best yarn available
- 2 colors of yarn – white & orange

FORCEPS UPDATE

KAKADU CUTTER & DE-BARBER

Small tool, which is perfect for cutting wires and thick fluorocarbon tippets. Can be used for safe de-barbing of fly hooks and attaching split shots to your leader. Comes with a handy holster. Overall length 4.1" / 10.5cm. **Item code V9039.**

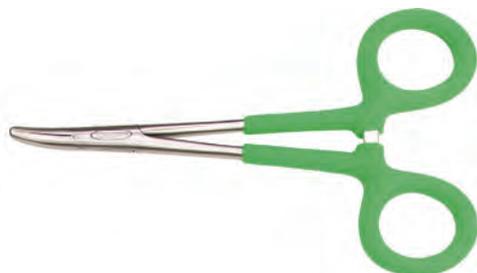

CLASSIC forceps

These are traditional forceps with straight jaws. The jaw surface is flat from the tip part to protect the fly when unhooking your catch and serrated from the back, offering good grip whenever heavier twist and work is needed. There's also a needle at the back of the jaws for cleaning the fly eyes. The grip has soft, bright green coating for comfortable use. Overall length 6" / 15cm. **Item code V9010.**

CURVED forceps

These are curved tip versions of the Classic forceps. The jaw surface is flat from the tip part to protect the fly when unhooking your catch and serrated from the back, offering good grip whenever heavier twist and work is needed. There's also a needle at the back of the jaws for cleaning the fly eyes. The grip has soft, bright green coating for comfortable use. Overall length 6" / 15cm. **Item code V9011**

PRO forceps

Pro forceps fit comfortably into your hand, thanks to their mitten style shape. They are very easy and quick to use. The straight jaws have flat tips with serrated back portion with needle. The built in scissor blades will cut even the heaviest tippet material with ease. Overall length 6.5" / 17cm. **Item code V9040**

MEGA forceps

These are designed for serious Big Mama hunters. The additional length and strength is great when unhooking toothy monsters. Behind the fly friendly jaws we have added extra sharp and long lasting Tungsten Carbide scissors. The scissor blades are made from extra high quality German Tungsten Carbide allowing you to cut even the wire leaders with ease. Soft bright green handles are comfortable even when it's really cold. Overall length 8" / 21cm. **Item code V9042**

ZINGERS

Code	Item
V9018	Carabine zinger
V9019	Rotozinger

Finally zingers that work better and never easily loosen. Our Carbine model does not have the classic pin. It is attached with a clip. The Roto model has a super strong pin and to avoid stress it also rotates. All zingers have durable nylon wires with a safety locking tool clip.

NIPPERS

Code	Item
V9022	Samurai blade nipper with pin
V9024	Black nipper with pin

V9022. These exceptionally fine tools cut perfectly and easily any monofilament up to 100lb. The needle is so sharp it will clean hook eyes as well as straighten wings, hackles, wind knots, picking, dubbing etc. **Made in Japan.**

V9024. New affordable black nipper with pin for everyday use. Suitable for those of us who prefer stealth approach.

AQUA - FLY BOXES **UPDATE**

High-quality waterproof boxes for those of us how value our flies and want to keep them safe and dry.

AQUA Medium has two separate sections with identical foams especially suitable for small and medium size flies. The transparent cover plastic of the other side is decorated with Vision fishcamo pattern.

AQUA Large has equally two sections, but with different foams. The other side of the box is suitable for small and medium size flies (individual holes) and the other one for flies with larger hooks (straight cuts). The transparent cover plastic of the other side is decorated with Vision fishcamo pattern.

AQUA Salt. Waterproof fly box perfect for flies with hooks. Foams on both sides.

AQUA Big Mama. Big waterproof fly box perfect for big flies (including poppers) with hooks. Foams on both sides.

AQUA Big Daddy. Large transparent waterproof fly box perfect for big tube flies. No foam.
