**EXO TI**

Dream high-end spinning reel with breathtakingly light weight. The skeleton design delivers unparalleled rigidity combined with outstanding functionality. Available in the four most popular sizes. From the cute size 20 for trout anglers through to the fully-grown pike and salmon model in size 50. The new edition has been further optimised and impresses with its silky smooth action and indestructible titanium axle.

**STANDARD TECHNICAL EQUIPMENT:**

- Rotor in C4LFT™ Carbon
- Aluminium skeleton housing
- Finely adjustable CSC™ front drag system (carbon drag discs)
- CNC stainless steel handle
- Titanium-nitride-coated line roller with anti-twist system
- Ni-Ti™ indestructible bail system
- Titanium reel shaft
- Perforated aluminium Long Stroke™ spool with ceramic front edge
- Perfect line distribution
- Continuous anti-reverse
- MegaShield™ multi-layer coating

**Reel Engine Design 2.0**  
 Reel Engine Design Technology's aluminum unibody construction provides a rock-solid base so that gears and drive shaft are in perfect alignment. The result? Greater consistency and tighter tolerances for silky-smooth, super-free cranking.

**New CSC™ Drag System**

Our patented multi-drag disc design combines carbon and ceramic washers to perfectly balance smoothness, power, and durability. For light line anglers, a redesigned micro adjustment system provides fine-tuning at low drag settings.

Plasma Arc Ceramic Washers

**SMOKE S3**  
 SERIES THREE

**STANDARD TECHNICAL EQUIPMENT:**

- Razor Rotor Design
- Aluminium skeleton housing
- CSC 2.0 drag system with carbon and plasma coated ceramic washers
- Slimline handle
- Large line roller with anti-twist system
- Ni-Ti™ indestructible bail system
- MaxCast ultra-light skeleton spool
- Performance Tuned Super Slow Spool Oscillation
- Rapid line retrieval
- Dura-Lok Clutch
- Foot Forward™ reel foot for better rod balance

**INSHORE SMOKE S3**  
 SERIES THREE

**SMOKE S3 INSHORE**

Like its freshwater sister, the new Smoke 3 Inshore, which is specially designed for saltwater fishing, also has a new and improved third edition. Perfect mid-sized spinning reels for sea anglers – whether for bass, cod or sea trout. The special production methods and materials ensure extreme corrosion resistance even with frequent use in salt water. And the angler has a chance to appreciate the renowned combination of lightness and stability offered by Smoke reels. The Smoke also impresses with a “braid band”, a specially designed rubber ring on the spool, which enables the spool to be immediately loaded with braided line without firstly having to load backing line onto the spool core. The braid sits securely on the rubber and twisting is completely eliminated.

**STANDARD TECHNICAL EQUIPMENT:**

- Razor Rotor Design
- Skeleton housing in highly salt-water resistant aluminium, with Saltguard 2.0 coating
- CSC drag system with carbon and ceramic washers
- 100% wobble-free stainless steel handle, just screws out without folding over
- Titanium-nitride-coated line roller with anti-twist system
- Ni-Ti™ indestructible bail system
- Reel Engine Design
- Ultra-light skeleton spool
- S-curve line distribution
- Dura-Lok Clutch
- Performance Tuned Anti-Corrosion Bearings

- STANDARD TECHNICAL EQUIPMENT:**
- Rotor produced in aluminium to be completely distortion-free
  - Robust light metal body in skeleton design
  - Finely adjustable, protected Magnum CSC™ front drag system (carbon drag discs)
  - CNC stainless steel handle
  - Non-twist line roller supported by ball bearings
  - Exclusive TiMag™ system: Maintenance-free magnetic bail arm folding system
  - Gears made from a super-hard stainless steel alloy
  - Aluminium spool with hardened front edge for longer casting distances
  - Two-speed oscillation system with LMST™ line distribution
  - with permanent anti-reverse
  - Saltguard multi-layer housing coating
  - Inner bail arm stop

**CABO PT**

This legendary sea reel range has undergone a complete redesign. The main objective was to reduce the weight slightly without making any sacrifices when it comes to rigidity. In doing so, the Quantum reel engineers even managed to improve the performance of drag. In internal tests, the reels delivered up to an incredible 70 lb of drag pressure. All the more reason for sea predators to fear users of Cabo reels.

**NEW**

**VAPOR**

Vapor is the latest generation of fixed-spool reels to take the stage. The reels are available in 4 different sizes, all equipped with the latest Quantum reel technology. Ranging from sizes 15 to 40, the models are ideal for spinning with all conceivable artificial lures and from ultra-light to heavy-duty sport. The highly sturdy yet extremely light reel body conceals robust aluminium gears and rich 9+1 high-end ball bearings, providing a soft and smooth action with no unnecessary play from day one onwards. The bail-arm is made from high-quality titanium and will effortlessly absorb even unwelcome shocks. Meanwhile, the slender line roller is ideally suited to the thinnest, ultra-modern PE line classes without twisting. The precisely adjustable front drag and stylish, ergonomic cork handle round off the timeless design of the XPT reels perfectly.

### ACCURIST SPINNING

The new Accurist Spinning impresses not only visually but also technically as a reel that can withstand the ravages of time. With its innovative design, the reel is not only a modern gem, its technical features will meet the highest demands of spinning anglers. Countless anglers will appreciate the smooth gear action, optimal line distribution even with braided lines, and the finely adjustable front drag system.

#### STANDARD TECHNICAL EQUIPMENT:

- Electronically balanced lightweight rotor (LWR)
- SCR Alloy
- Finely adjustable CSC™ front drag system (carbon drag discs)
- Ergonomic handle and stainless steel components
- Large line roller with anti-twist system
- Ni-Ti™ indestructible bail system
- PT™ gears
- Aluminium spool with hardened front edge for longer casting distances
- S-curve line distribution
- Dura-Lok Clutch
- Foot Forward Stem Design

### IRON PT

A supreme spinning reel tailor-made for using on the sea with salt-water-resistant components throughout. Highly robust design that can withstand use with braided lines for months on end. In a fight, the Inshore's front drag, with Magnum carbon drag discs, means the angler always has control. The spool has a special anti-slip core meaning braid can be directly wound onto the spool.

#### STANDARD TECHNICAL EQUIPMENT:

- Electronically balanced lightweight rotor (LWR)
- Robust light metal body in skeleton design
- Finely adjustable, protected CSC™ front drag system (carbon drag discs)
- Stainless steel handle with EVA handle knob
- Titanium-nitride-coated line roller
- Specially hardened Quantum PT gears
- Aluminium spool with hardened front edge for longer casting distances
- Two-speed oscillation system with LMS™ line distribution
- Continuous anti-reverse
- Saltgard multi-layer housing coating

**STANDARD TECHNICAL EQUIPMENT:**

- Balanced rotor, producing silky smooth action
- Robust nylon housing
- Finely adjustable front drag
- Die-cast aluminium handle
- Anti-twist line roller
- Smooth gears with even line distribution
- Aluminium Long Stroke™ spool
- ABS Nylon spare spool
- S-curve line distribution
- Continuous anti-reverse
- Foot Forward™ reel foot for better rod balance

**ULTRAX FD**

An affordable front-drag reel from Quantum. Slender housing, US Quantum reel technology for novices. Classic all-round spinning reel range for all spinning techniques, from light trout fishing to soft lure sport and spoon fishing for pike and salmon.

**CENTEX**

A renowned name in the Quantum mid-price segment: Centex! Besides the more than rock solid interior, our testers were particularly impressed by the super-slim, compact housing made from fibre-reinforced nylon material. The finely-tuned gears and optimal gear ratio for the reel size enable perfect retrieve action. The handle, which has been newly developed by Quantum, ensures extremely comfortable handling even on long sessions.

**VANTEX**

A fantastic reel series in the Quantum range: The reels impress with their ultra-light weight, highly pleasant, silky smooth gear action and stylish design. With 10 ball bearings, the reel has high-class features for the price segment. The outstanding performance data is achieved using the finest components, such as high-quality drag discs and a rotor in a skeleton design as well as the new ergonomic handle for perfect comfort. Available in all the most popular sizes for freshwater spinning. Whether perch fishing with a size 20 'mini-reel', or using wobblers for pike with a size 40 fighting machine, the Vantex is always a reliable partner.

## DRIVE

A dream high-performance spinning reel range with extremely low production tolerances for an optimal, smooth action and long service life. This type of reel is primarily used with very low diameter braided lines, e.g. for drop shot fishing, soft lure fishing or twitching. That is why it is also available in the smaller sizes 5 and 10 as well as the standard medium sizes. The Drive employs the Reel Engine concept exclusively developed by Quantum, as used in the popular Quantum Throttle.

## THROTTLE

The new "Reel Engine" system developed by the American Quantum engineers is based upon an aluminium housing into which the bushes for the axles are subsequently milled. This guarantees much higher fitting precision, which is reflected in an excellent, smooth action and high robustness of the reel. The reel even copes supremely with retrieving relatively large and heavy lures all day long.

**MR. PIKE THE RELEASER**

Two first-class free-spool reels that do exactly what you expect of them at the crucial moment in an angling session: allow the line to run 'free' and unobstructed on a bite! That is why we have called these fixed-spool reels in the Mr. Pike Range 'The Releaser' because they release the line directly when necessary. The free run can be adjusted depending the current and wind. The reel is available in two sizes: a very small, compact size 420 version for light predator fishing with baitfish for zander or eel. And a large size 460 version for heavy-duty pike sport with a long-cast weight or large float rig! Both models are equipped with 4 high-quality stainless steel ball bearings and the special S-curve line distribution system guarantees optimal retrieval of the main line onto the metal long-cast spool.

**STANDARD TECHNICAL EQUIPMENT:**

- Electronically balanced lightweight rotor (LWR)
- Finely adjustable front drag
- Finely adjustable run control system
- Non-twist line roller
- Robust power gears
- Aluminium Long Stroke™ spool
- Spare spool
- S-curve line distribution
- Continuous anti-reverse

**EXO BAITCASTER**

We set our engineers the challenge of making the Exo Baitcaster as light as they possibly could without compromising on performance. The solution was relatively simple: We called it "metal only where necessary". The finished product is a skeleton design and the lightest Quantum Baitcaster in the company's history. At the same time, the reel is so robust that you can drive a pick-up over it, as you can see on our web site. Available in left and right-hand versions.

**STANDARD TECHNICAL EQUIPMENT:**

- Robust light metal body in skeleton design
- MegaDrag™ stainless steel and carbon fibre drag system
- Ultra-light handle in hardened aluminium and skeleton design with EVA handles
- Titanium-nitride-coated line roller
- PT™ gears
- Ultra-light skeleton spool
- Continuous anti-reverse
- ACS casting drag reliably prevents the line from overflowing

### SMOKE S3 LH 101 HPT

Smoke Baitcasters are among the most widely used top-end baitcaster reels in Europe. That is why the Quantum engineers have now developed the third generation. The spool has been enlarged in relation to the reel to offer greater line capacity and make long-range casting easier. The new "Micro-Adjust ACS4" centrifugal drag system is easily adjustable from the side and enables the angler to cast skilfully over long distances without tangling. The technology injects fun into angling, which will be reflected in your catches.

#### STANDARD TECHNICAL EQUIPMENT:

- Aluminium X-Frame Design
- Finely adjustable CSC™ front drag system (carbon drag discs)
- Performance Tuned Power Handle
- Precision Performance Tuned Gears
- Oversized Spool Technology
- Dura-Lok Clutch
- ACS casting drag reliably prevents the line from overflowing
- Performance Tuned High Speed Bearings
- Performance Tuned Hot Sauce Lubrication

### SMOKE INSHORE

For multiplier fans among sea spinning anglers, there is now a saltwater-resistant version of the Smoke. The Inshore is made from particularly corrosion-resistant aluminium while the bearings are encapsulated for protection against saltwater.

#### STANDARD TECHNICAL EQUIPMENT:

- Ultra-light aluminium body
- MegaDrag™ stainless steel and carbon fibre drag system
- CNC stainless steel handle
- MaxCast ultra-light skeleton spool
- Continuous anti-reverse
- ACS casting drag reliably prevents the line from overflowing

### VAPOR 101 SPT

A small baitcaster with potential! The Vapor 101 SPT is a low-profile model that impresses with a highly robust yet lightweight body. Equipped with 10+1 high-tech ball bearings for a smooth and steady action. The optimal ACS Infinite Cast Control System enables rollover-free casting of even lightweight baits. The Vapor 101SPT is refined with a ceramic drag system and extremely robust brass gears. The two large, eye-catching cork knobs on the handle ensure an optimal grip while fishing. The Vapor SPT is the slow-speed model optimally suited to retrieving jugged lures such as wobblers and twitch baits.

**STANDARD TECHNICAL EQUIPMENT:**

- Ultra-light aluminium body
- Straight-Line Ceramic Stainless Carbon Drag System
- Performance Tuned Power Handle
- PT™ gears
- Continuous anti-reverse
- ACS casting drag reliably prevents the line from overflowing

### ACCURIST

Extremely attractive range of baitcasters. The colours match the Accurist rods and Accurist spinning reels. Reliable workhorses in the mid-price segment with outstanding performance values. The Accurist is available as a right-handed model or in a left-handed version.

**STANDARD TECHNICAL EQUIPMENT:**

- MegaDrag™ stainless steel and carbon fibre drag system
- PT™ gears
- MaxCast ultra-light skeleton spool
- Continuous anti-reverse
- DynaMag magnetic cast control, reliably prevents line tangles on the cast
- Optional flipping switch line release

**ICON**

Aesthetically designed reel in the mid-price segment whose strengths may not be fully appreciated at first glance. The Icon is equipped with 11 ball bearings, providing an incredibly smooth action. The frame comprises CNC-machined housing, making the reel robust and guaranteeing the angler many years of fishing fun. The finely adjustable centrifugal drag can be quickly adjusted externally when the angler switches baits.

**STANDARD TECHNICAL EQUIPMENT:**

- Solid 1-piece aluminium frame
- Oversized multi-stack drag system
- Perforated aluminium spool
- Continuous anti-reverse
- ACS casting drag reliably prevents the line from overflowing

**ULTREX CAST**

The affordable entry-level option to the Quantum Baitcaster world is designed to match the successful Ultrex rod series. The Ultrex Cast impresses as much as the rods and proves that affordable tackle these days can rival many expensive competitors in terms of comfort.

**STANDARD TECHNICAL EQUIPMENT:**

- Powerful handle
- Powerful gears
- Aluminium spool
- Continuous anti-reverse

**SMOKE S3 SPIN**

Like the phoenix rising from the ashes, the popular Quantum flagship is now available in a new S3 version. This is not smoke and mirrors but a hard-wearing, high-quality rod series of the very highest order. Our rod engineers put their hearts and souls into the elaborate composition of the powerful yet extremely fast rod blank, resulting in a flawless end product. Designed to meet the high demands of modern predator fishing, the rod provides phenomenal feedback in terms of the bottom features of a water. Immediate bite indication allows the angler to strike quickly, even over long distances. It goes without saying that the new S3 series comes with the usual top-quality Fuji components in two rod lengths and different casting weight spectrums to cover the broad scope of modern predator fishing. The model series 35, 55 and 75 are equipped with modern Fuji single-leg rings and are designed exclusively for modern methods of spin fishing. Annoying top-heaviness is a thing of the past thanks to the supplied counterweights for balancing a wide variety of reels. Whether you are targeting pike, perch, asp or zander, all modern predator anglers fishing for these species can put their complete faith in the Quantum Smoke S3 spinning rod series. Design and technology of the highest standard.

**SMOKE S3 SPIN**

Like the phoenix rising from the ashes, the popular Quantum flagship is now available in a new S3 version. This is not smoke and mirrors but a hard-wearing, high-quality rod series of the very highest order. Our rod engineers put their hearts and souls into the elaborate composition of the powerful yet extremely fast rod blank, resulting in a flawless end product. Designed to meet the high demands of modern predator fishing, the rod provides phenomenal feedback in terms of the bottom features of a water. Immediate bite indication allows the angler to strike quickly, even over long distances. It goes without saying that the new S3 series comes with the usual top-quality Fuji components in two rod lengths and different casting weight spectrums to cover the broad scope of modern predator fishing. Annoying top-heaviness is a thing of the past thanks to the supplied counterweights for balancing a wide variety of reels. This model series has been designed especially for modern pike fishing with large lures – all modern predator anglers fishing for these species can put their complete faith in the Quantum Smoke S3 series. The Smoke S3 Spin 105 models are equipped with a total of three strong Fuji double-legged rings starting from the butt ring and are designed for fishing even with the heaviest “big baits”. Design and technology of the highest standard.

VAPOR AGGRESSOR – FINESSE – DETECTOR

Three high-quality rod series covering all disciplines of modern predator fishing. Fast-action blanks with extremely sensitive tip action for optimal feel of the lure! Ultra-light thanks to the use of Toray IM9 high-modulus woven graphite. Every rod is perfectly balanced with no additional balance weights. The baitcaster models also have another special feature, the unique "Smart Trigga™". This slightly angled handle ensures that the rod nestles even better against the forearm to create a harmonious grip! The highly slender EVA handle with integrated screw reel fitting sits easily in the hand, ensuring a flawless feel of the blank. This translates into fatigue-free fishing, improved concentration, better bait control, faster bite recognition, shorter reaction times and, consequently, more fish!

# VAPOR

SMART TRIGGA 5°

14160 255	Vapor Noble Limited	2,55 m	2	5 - 45 g / 1/6 - 1 1/2 oz	1,23 m	139 g	0,5-2,0	extra fast	Fuji	9

**VAPOR NOBLE LIMITED**  
 Your own personalised predator rod! Something quite special that will only come around once, with a serial number on the rod blank. Who wouldn't want that? No sooner said than done – the Vapor 'Noble Limited' is here! 'Limited' because Dietmar has made only 160 blanks of this rod according to his specifications and numbered from 001 to 160. And 'Noble' because the rod is extravagant and rather special. Not necessarily due to its colours but because of brutal facts. Measuring 2.55 m in length with a lightning-fast high-carbon Toray blank, the rod is the perfect partner for fishing with lures from 5 g to 55 g. And all at a rod weight of just 98 g! Equipped with high-end Fuji rings and a Fuji reel holder, the rod sits in your hand like a feather. A unique rod in the truest sense of the word that all anglers should see for themselves.

**VAPOR DETECTOR EXTREME JIGGING**  
 Bites are like electric shocks! And not only because each and every Vapor rod in the Detector series has an extremely sensitive tip action, but also because the high-quality Toray IM9 high-modular graphite rod blank is ultra stiff and extremely fast - in brief, the epitome of 'extreme jigging'! The Detector rods launch rubber baits with ease while the powerful backbone not only absorbs every bite but also stands up to even powerful opponents during a fight. The handles are not too long and are logically adjusted to the respective rod length and casting weight. From the 1.9-metre model for vertical fishing to the 2.75-metre model for jigging from the bank, every rod is perfectly balanced with no additional balance weights. The baitcaster models have another special feature, the unique 'Smart Trigga™'. This slightly angled handle ensures that the rod nestles even better against the forearm to create a harmonious grip! The highly slender EVA handle with integrated screw reel fitting sits easily in the hand, ensuring a flawless feel of the blank. This translates into fatigue-free fishing, improved concentration, better bait control, faster bite recognition, shorter reaction times and, consequently, more fish!

**VAPOR FINESSE LURE & JIG**

Success with shads and small crank lures all comes down to feel, and no rod delivers this better than the Vapor Finesse Lure & Jig . An exceptional Quantum Vapor rod series specifically designed for optimal feel of the lure, from precise detection of the bottom with a jig and sensing the slightest vibrations of a wobbler on the retrieve to unmistakable bite detection! Here, too, the highly-sensitive tip action of the Toray IM9 high-modular graphite rod blank comes into its own. Ultra-light spinning rods with that little something extra. Like all other rods in the Vapor series, the handle is not too long and is logically adjusted to the respective rod length. Classic models of 2.1 metres for the boat, 2.4 metres for street fishing and a special 2.7-metre version for long-range fishing! Every rod is perfectly balanced with no additional balance weights. The 2.1-metre baitcaster model also has another special feature, the unique 'Smart Trigga™'. This slightly angled handle ensures that the rod nestles even better against the forearm to create a harmonious grip! The highly slender EVA handle with integrated screw reel fitting sits easily in the hand, ensuring a flawless feel of the blank. This translates into fatigue-free fishing, improved concentration, better bait control, faster bite recognition, shorter reaction times and, consequently, more fish!

**VAPOR FINESSE LURE & JIG TRAVEL**

The bonus feature of the rod is that it can be easily taken on your travels. Now you no longer need to go without your favourite light, sensitive fishing because you can confidently rely on the Finesse version of the ultra-fast Vapor blank. No more compromises when it comes to drop-shot fishing, light jigging or light crankbait fishing. 4-piece Toray blank, easily stored in hand luggage or a suitcase!

**VAPOR DETECTOR MICRO JIGGING**

Ultra-sensitive, as light as a feather and deceptively powerful! Such are the qualities of these slender Vapor rods in the Detector series. The highly sensitive tip action of the Toray IM9 high-modular graphite rod blank truly comes into its own. No inserted tips guaranteed. Just an all-in-one blank that continues to the point of a needle while also being highly rigid and lightning fast. The 'Micro Jigging' leaves nothing to be desired for genuine lovers of the smallest casting weights. It is the 'feel' of the lure during the sinking phase and when it hits the bottom that makes this rod series so special. Despite the slender tip, the backbone has sufficient power to strike at long-range and to land even large predators with ease. Here, too, the handle is not too long and is logically adjusted to the respective rod length. Classic models of 2.1 metres for the boat, 2.4 metres for street fishing and a special 2.7-metre version for long-range fishing with micro-jigs! Every rod is perfectly balanced with no additional balance weights. The baitcaster model also has another special feature, the unique 'Smart Trigga™'. This slightly angled handle ensures that the rod nestles even better against the forearm to create a harmonious grip! The highly slender EVA handle with integrated screw reel fitting sits easily in the hand, ensuring a flawless feel of the blank. This translates into fatigue-free fishing, improved concentration, better bait control, faster bite recognition, shorter reaction times and, consequently, more fish!

**VAPOR AGGRESSOR MEDIUM LURE**

Without doubt a genuine all-rounder in this new Quantum rod series, the Vapor Aggressor! The Aggressor amplifies the unmistakable impact of a bite, which is the hallmark of predator fishing with artificial lures, like almost no other rod. The centrepiece of the rod, the Toray IM9 high-modular graphite blank, means that all three Aggressor classes are ideal for use with soft lures, shads and swimbaits and are highly compatible with wobblers, jerk, twitch and topwater baits! The angler feels absolutely everything from the vibration of the lure to even the slightest brush of the bottom, while even the most delicate bites are sensed unmistakably like an electric shock right down to the handle. The three designs of the Vapor Aggressor cover every angling technique and lure size: 'Medium Lure' up to 35 grams, 'Heavy Lure' up to 84 grams and, for the big boys, the 'X-Heavy Lure' up to 140 grams. The IM9 blank makes the rods incredibly light, extremely fast and ultra stiff. Every rod is perfectly balanced with no additional balance weights and sits perfectly in the hand. The three baitcaster models have another special feature, the unique 'Smart Trigga™'. This slightly angled handle ensures that the rod nestles even better against the forearm to create a harmonious grip! The highly slender EVA handle with integrated screw reel fitting sits easily in the hand, ensuring a flawless feel of the blank. This translates into fatigue-free fishing, improved concentration, better bait control, faster bite recognition, shorter reaction times and, consequently, more fish!

**VAPOR AGGRESSOR MEDIUM LURE TRAVEL**

The bonus feature of the rod is that it can be easily taken on your travels. Particularly suitable for the all-rounders among spin fishermen and anglers who want to fish somewhat larger lures now and then. The medium version of the Aggressor offers first-class fishing fun if you want to jig with softbaits, cast out or troll with plugs, but the Aggressor Travel version is also a trouble-free companion for light piking for coalfish and similar in Norway. 4-piece Toray blank, easily stored in hand luggage or a suitcase!

**VAPOR AGGRESSOR HEAVY LURE**

Without doubt a genuine all-rounder in this new Quantum rod series, the Vapor Aggressor! The Aggressor amplifies the unmistakable impact of a bite, which is the hallmark of predator fishing with artificial lures, like almost no other rod. The centrepiece of the rod, the Toray IM9 high-modular graphite blank, means that all three Aggressor classes are ideal for use with soft lures, shads and swimbaits and are highly compatible with wobblers, jerk, twitch and topwater baits! The angler feels absolutely everything from the vibration of the lure to even the slightest brush of the bottom, while even the most delicate bites are sensed unmistakably like an electric shock right down to the handle. The three designs of the Vapor Aggressor cover every angling technique and lure size: 'Medium Lure' up to 35 grams, 'Heavy Lure' up to 84 grams and, for the big boys, the 'X-Heavy Lure' up to 140 grams. The IM9 blank makes the rods incredibly light, extremely fast and ultra stiff. Every rod is perfectly balanced with no additional balance weights and sits perfectly in the hand. The three baitcaster models have another special feature, the unique 'Smart Trigga™'. This slightly angled handle ensures that the rod nestles even better against the forearm to create a harmonious grip! The highly slender EVA handle with integrated screw reel fitting sits easily in the hand, ensuring a flawless feel of the blank. This translates into fatigue-free fishing, improved concentration, better bait control, faster bite recognition, shorter reaction times and, consequently, more fish!

**VAPOR AGGRESSOR X-HEAVY LURE**

Without doubt a genuine all-rounder in this new Quantum rod series, the Vapor Aggressor! The Aggressor amplifies the unmistakable impact of a bite, which is the hallmark of predator fishing with artificial lures, like almost no other rod. The centrepiece of the rod, the Toray IM9 high-modular graphite blank, means that all three Aggressor classes are ideal for use with soft lures, shads and swimbaits and are highly compatible with wobblers, jerk, twitch and topwater baits! The angler feels absolutely everything from the vibration of the lure to even the slightest brush of the bottom, while even the most delicate bites are sensed unmistakably like an electric shock right down to the handle. The three designs of the Vapor Aggressor cover every angling technique and lure size: 'Medium Lure' up to 35 grams, 'Heavy Lure' up to 84 grams and, for the big boys, the 'X-Heavy Lure' up to 140 grams. The IM9 blank makes the rods incredibly light, extremely fast and ultra stiff. Every rod is perfectly balanced with no additional balance weights and sits perfectly in the hand. 14001 185	Pelagic	1,85 m	1	80 g	1,84 m	160 g	1-4	Seaguide	Fuji

**PELAGIC**  
 The Quantum Pelagic is designed for big pike and zander sport. The rod was developed by our team angler Fredrik Harbort. Specimen zander can be hooked securely thanks to the powerful action. The Pelagic has a practically continuous action but is not too stiff, ensuring that ferocious opponents such as particularly big pike are not lost during a fight. Mid-water angling in open water and vertical fishing for big zander are among the rod's particular strengths. However, with its special action, the Pelagic is an all-rounder ideally suited to light jerkbait and swimbait sport for pike, black bass and other predators.

**CABO SPIN**  
 Dozens of seagulls screech above the sea. Thousands of panicking sardines jump out of the water, which seems to be literally boiling. Pure adrenaline! Tuna feed in an insatiable frenzy. In recent years, the Mediterranean has provided this spectacle with increasing frequency, making spinning for hunting tuna one of the most popular angling techniques. These new Blu-Water sea spinning rods have been pushed to the limits in endless rounds of testing. The results are simply fantastic. The extremely powerful high-modulus carbon blanks are reliable partners for breaking the resistance of tuna. At the same time, however, the top section is sufficiently progressive to punch out stickbaits and hard lures effortlessly over long distances.

**IRON HEAVY JIG**  
 The Iron Heavy Jig was developed for use with heavy lures in salt water. Whether you prefer to fish with a pirk-er or soft lure, this rod will bring you countless hours of enjoyment. The firm blank guarantees both excellent bite indication and adequate power for fighting even the most ferocious opponents.

**THROTTLE SPIN**

The new Quantum Throttle Spin is a rod series in the lower price segment that, despite the price, leaves nothing to be desired for the modern spinning angler. With its combination of high-quality components and classy lightweight designs, the rods can compete with many significantly more expensive rods in terms of weight. The classy red and black design with matt elements matches the renowned Throttle spinning reel. The value-for-money combination of a Throttle rod and Throttle reel will impress novices and professionals alike on the water.

**THROTTLE ZANDER JIG**

The popular Throttle Spin rod series has a new addition in the form of a specially designed precision-casting rod. The Throttle Zander Jig offers an ideal casting weight spectrum of 10 g to 60 g and comes in two lengths. The strong and stiff blank has a semi-parabolic action that ensures optimal feedback when jigging. A rod which is optimally tuned to wait promisingly for the typical "zander knock". Even over long distances the modern Throttle Zander Jig offers the possibility to get the strike through successfully. All anglers looking for a zander rod in a modern design cannot look past this "zander stick".

Code	Model	Length	Sections	C.W.	Tr.-Length	Weight	Action

### THROTTLE PIKE LURE

The popular Throttle Spin rod series has a new addition in the form of a specially designed precision-casting rod. The Throttle Pike Lure is specially designed for pike fishing and covers a casting weight spectrum of 25 g to 100 g with a choice of two rod lengths. The rod punches out large lures effortlessly and, thanks to its sensitive tip, enables optimal lure retrieval. The rod's powerful backbone ensures that the all-important strike is always delivered with complete satisfaction. A rod that will impress novices and pros alike. Design and technology of the highest standard. A rod that will impress novices and pros alike.

14217 195	Throttle Jerk	1,95 m	2	35 - 80 g	0,99 m	155 g	extra fast

### THROTTLE JERK

The popular Throttle Spin rod series has a new addition in the form of a specially designed precision-casting rod. The Throttle Jerk is a classic rod for fishing with jerkbaits, wobblers and larger soft lures with a baitcaster reel. A rod with a casting weight spectrum of 35 g to 80 g and a length of 1.95 m provides the ideal basis for this type of active fishing. A rod that will impress novices and pros alike. A rod that will impress novices and pros alike.

1949 265	Zanderkant	2,65 m	2	15 - 90 g	1,37 m	236 g	0,6-1,2

**ZANDERKANT**  
 Zander specialist Sebastian Hänel swears by fast spinning rods for soft lure fishing. He dreamed of a rod with the speed of an arrow, whose springiness could set new standards and reliably convert even the finest drop-back bites. Designed for difficult situations, such as fishing in eddy currents, at long range or at great depths. The Quantum rod engineers have created the perfect rod for these purposes for him.

Code	Model	Length	Sections	C.W.	Tr.-Length	Weight	Guides
14175 180	Drive Felchen	1,80 m	2	1 - 8 g	0,95 m	95 g	8+1

**DRIVE FELCHEN**  
 When it comes to successful whitefish angling with a 'Hegene' (a special style of nymph fishing practised mainly on Swiss and German mountain lakes), you need a perfectly built, lightweight and intelligently designed rod. We have perfectly delivered precisely such a concept in the Drive Spin Whitefish. A whitefish bite is normally just a short little twitch that results in the sensitive rod tip dropping back. That is why we have not only created an ultra-sensitive tip action but also a rubberised bead for better bite detection.

Code	Model	Length	Sections	C.W.	Tr.-Length	Weight	PE Class
14805 300	Mr. Pike Standard Boat	3,00 m	2	250 g / 3,5 lb	1,56 m	305 g	1-2,5

**MR. PIKE STANDARD BOAT**

The typical trolling pike rod! Powerful backbone and parabolic action that guarantees trouble-free casting of your baitfish. The Mr. Pike 'Standard Boat' is far from standard. Unique in the pike rod segment with its trigger design, such special rods for use with multiplier reels are normally only available from rod manufacturers upon request. Thanks to its cushioning blank, the 3-metre rod bends steadily in the rod holder on a bite without offering the predator excessive resistance, guaranteeing that no fish are lost. Equipped with 10 twin-strut rings and a split cork/EVA handle. Additional extras: line clip.

Code	Model	Length	Sections	C.W.	Tr.-Length	Weight
14825 300	Mr. Pike Classic Boat Standard	3,00 m	2	250 g / 3,5 lbs	1,56 m	305 g

**MR. PIKE CLASSIC BOAT STANDARD**

A typical trolling rod for pike fishing with a pike float and free-spool reel but also perfectly suited to trolling with planer boards and large lures. Based upon the popular blank of the Mr. Pike Classic Boat, we have released the Mr. Pike Classic Boat Standard in a fixed-spool reel design by popular request.

Code	Model	Length	Sections	C.W.	Tr.-Length	Weight	PE Class
14815 270	Mr. Pike Old School Zander	2,70 m	2	5 - 20 g	1,41 m	137 g	0,4-0,8
14815 300	Mr. Pike Old School Zander	3,00 m	2	5 - 20 g	1,56 m	152 g	0,4-0,8

**MR. PIKE OLD SCHOOL ZANDER**

A traditional deadbaiting rod range naturally includes a typical zander rod. In the Mr. Pike 'Old School Zander', we have developed a rod in true Dutch style in lengths of 2.7 m and 3 m. The blank is extremely sensitive, which is a huge advantage when legering to register the highly cautious bites. The rod also has a very special test curve, which guarantees risk-free casting of the deadbait while also easily cushioning the thrashing head movements of zander during a fight. Equipped with 6 and 7 rings and cork/EVA handles with integrated screw reel fittings. Extras: line clip.

Code	Model	Length	Sections	C.W.	Tr-Length	Weight	PE Class
14800 360	Mr. Pike Classic Bank	3,60 m	2	200 g / 3,5 lbs	1,86 m	358 g	1-2,5

**MR. PIKE CLASSIC BANK**  
 As if made by 'hand': Classic, simple and to the point in terms of action - the Mr. Pike 'Classic Bank'! A typical English pike rod for all-round baitfish angling. Whether long-range legering with an inline or side-mounted lead or fishing tight to the bank with a finely balanced float rig, the 'Classic Bank' captivates with a perfect test curve in a fight, ensures that the baitfish lands trouble-free in the water (with no pull-outs) and impresses with sufficient power on the strike, even over long distances. The simple 3.6 m carbon-fibre blank is equipped with 5 long-cast, twin-strut rings and, thanks to the slender handle, sits perfectly in the hand or fits any buzzer bar. Extras: line clip.

Code	Model	Length	Sections	C.W.	Tr-Length	Weight
14820 360	Mr. Pike Classic Master	3,60 m	2	200 g / 3 lbs	1,86 m	345 g

**MR. PIKE CLASSIC MASTER**  
 Whether heavy legering with a leger boom, pear lead and baitfish or float fishing with plenty of weight on the line, the blank of a pike rod must cope with all of this without losing the precious baitfish on the cast. What's more, it also has to reliably set the hook even over long distances. The Mr. Pike Classic Master with traditional cork handle and UK rings ticks all of these boxes.

**MR. PIKE DROP BACK INDICATOR**

Even large pike can sometimes be prudish! They often just play with your baitfish, scarcely moving off the spot. The Mr. Pike Drop Back Indicator prevents these fish from devouring your baitfish unnoticed! A vigilant bite indicator that does not miss a thing. It is mounted on the rear bank stick. The twist-on connector fits any stick diameter. The bite indicator is the plastic egg that you can open and adjust internally with weights according to the wind and current. The arm moves freely, indicating both runs and drop-back bites. A finely adjustable plastic clamp can also be adapted to the main line diameter, ensuring that the line is pulled off without resistance. With snaplight insert. Includes: 2 plastic bite indicators with line clamps (bright white and fluorescent orange), 3 counter-weights and a stainless steel bar with a screw clamp.

### EXOFIL

Exofil is a High Tech Monoline with a nano fluorocarbon surface coating, which creates an ultra smooth surface and ultimate high abrasion resistance. Highest quality Japanese Polyamid ensures maximum strength linear and knot strength as well. Inside of the line is a molecular compressed core compound copolymer which reduces the stretch. The low stretch of Exofil makes it perfectly suitable for modern spin fishing with soft and hard lures.

### QUATTRON PT

Quattron has been a firm favourite with anglers for years. Many thousands trust this monofilament which enjoys an unquestioned place at the top of the line market. Incredibly, our product developers have even managed to improve the formula yet again to produce an even more capable Quattron. The Quattron PT (PT = Performance Tuned) is the ultimate monofilament, without rival in terms of strength, wear resistance, knot strength, durability and so on. You can rely implicitly on Quattron PT. Countless tests testify to that fact. The line has received the EFTTA (European Fishing Tackle Manufacturer Association) seal of approval, which confirms the correctness of the stated performance parameters. Test it for yourself and be amazed.

### QUATTRON SALSA

Transparent red line with outstanding qualities. The red coloration, which makes the line easy to identify and recognise above the water for the angler, disappears at a depth of 1.3m. The line is then invisible to fish. The Salsa is also highly resistant to friction and a true workhorse, especially for sea fishing and trolling. Available in economic 250g spools with high capacity.

### FLUORO CARBON PREDATOR

A newly developed, high-quality fluorocarbon leader material made in Japan that combines optimal breaking strain with high durability and honest stated diameters. Q-Fluoro Carbon is very supple, excellent for tying and, thanks to its refraction index, the material is practically invisible to fish in the water. Anglers who demand top quality without compromises, particularly when it comes to leader material, will appreciate Q-Fluoro.

Supplied without line.

### LEADER DISPENSER BAG

Special leader pocket with dispenser function. Not only is unwanted unwinding of expensive leader material in the bag a thing of the past, you can also pull off and cut the desired length as required. Space for five spools of leader material and compatible with our Quantum EXO FC spools or steel leader spools. Material: Polychlorid

**ULTREX SUPER 8 BRAID**

This line is not just any braid. Ultrex stands for ultra performance. Better performance than even spoiled spinning and sea anglers could dream of. The 8-strand braid produces an incredibly round line that moves extremely softly through the rod rings on casting and retrieval. The elasticity has been reduced to a minimum ensuring the angler always has optimal contact with his bait or opponent, while the sensational strength of the Ultrex makes it an unassailable adversary for any scaled specimen.

This line is not just any braid. Ultrex stands for ultra performance. Better performance than even spoiled spinning and sea anglers could dream of. The 8-strand braid produces an incredibly round line that moves extremely softly through the rod rings on casting and retrieval. The elasticity has been reduced to a minimum ensuring the angler always has optimal contact with his bait or opponent, while the sensational strength of the Ultrex makes it an unassailable adversary for any scaled specimen.

Code	Ø	Length	BS	Colour

**SMART XTR BRAID**

Quantum Smart XTR Braid is a braided line with an innovative coating that hardly increases the line's diameter. The process conserves the thin diameter of the base material, allowing the angler to enjoy the line's softness fully when fishing. Distant casts can be performed easily. The blue color is specially designed to be virtually invisible to the fish against the sky. This makes the Quantum Smart XTR Braid a great choice for general spin fishing and for targeting wary fish in clear water, in particular.

**MINNOW GIPSY FD SU**

New Minnow Wobbler from Quantum. The Minnow Gipsy is available in three sizes, each with three different depths, covering a huge range of modern angling techniques. From fishing on very light tackle in streams for orfe to deep trolling for zander, this series covers it all. Eight attractive designs ensure optimal visibility of the lure in any water colouration, any weather and at all times of day. Supplied with two ultra-sharp treble hooks as well as two single hooks with a large eye, giving the angler the option of switching to a single-hook rig. Equipped with balls for directional stability, the wobbler flies straight and far without rotating on the cast. The Minnow Gipsy is a floating wobbler, available in three different depths. FD SU = Flat Diver SUSpending D SU = Diver SUSpending DD SU = Deep Diver SUSpending

**TOP GIPSY F**

New two-piece stickbait with two interchangeable tails in soft plastic in colours to match the design. The Top Gipsy dances to light twitches of the rod in a walk-the-dog action across the surface of the water, driving predators wild. The 7.5 cm and 10 cm sizes cover perch, asp and pike sport perfectly. Eight attractive designs ensure optimal visibility of the lure in any water colouration, any weather and at all times of day. Supplied with two ultra-sharp treble hooks as well as two single hooks with a large eye, giving the angler the option of switching to a single-hook rig.

**JUNKER D S**

The Junker is a new realbait in a whitefish design. With a completely natural action and five designs from natural to bright colours, the lure is a true weapon for pike and zander. Both the 18 and 24 cm sizes are perfectly suited to casting as well as trolling from a boat. Fitted with an ultra-sharp treble hook plus a double hook that holds to the body with a magnet but can come away during a fight to prevent the fish from shaking out the lure.

Made by  in America

**SOFTBAITS**

Quantum's product developer Dietmar Isaiasch together with the established American company Mann's Bait introduce an entirely new brand of ultra-soft shad with more play, more attraction and more catches! Available in two varieties: Q-Fish – the effective no-action version with a forked tail. And the Q-Paddler - the first-class rear-blade model with a high-frequency action. As an unmistakable hallmark of quality, the Mann's logo is stamped on the back of the shad together with the Quantum lure name and lure size. In addition, the hook hole indicates the optimal exit point for the relevant jig hook. Not only does this ensure optimal action of the soft lure, it also minimises missed bites by folding up perfectly when the lure is sucked in.

**HARDBAITS**

The dream team – Quantum expertise meets the unique product quality of Mann's – Made in America! Wherever predators may lurk, this wide range of Mann's wobblers always offers the right model for all water depths. An intelligent ratio of steel ball-bearings in the rigid plastic body ensures irresistible vibration and stability on the retrieve. The powerful diving blade and multiple coating with epoxy resin make these hard lures indestructible in both freshwater and saltwater. High-quality flat steel spring rings and needle-sharp, Japan-type high-end treble hooks complete the package. The diving depth on Mann's wobblers is stated in feet, not metres! Each digit, therefore, represents one foot or 30 centimetres. So, the 30+ dives to at least 9 metres (30 cm x 30 = 9 m). And the 1-Minus models run very close to the surface, or within 30 centimetres! The diving depth card on the rear of the packaging explains this clearly.

**Q-FISH 13**

The soft lure with the 'forked tail'! Improved, even more attractive and faithful to the template for many no-action soft lures – the original Mann's Fine-Fish. The unmistakable slender body design with the flat back creates the vital twitching when jigging during the sinking phase. And the distinctive U-shaped forked tail, is not spread widely or tapered towards the outside but maintains its shape and tail thickness. The aim is to create a moment of inertia that imitates injured prey. Practical tip: vertical fishing, jigging, drop shot, Texas and Carolina rig Available in one irresistible design: Q-Fish 13 (13 cm).

**Q-PADDLER**

Yet another shad with a wagging tail? No. The Paddler is based upon the natural, slender design of a no-action soft lure with a flat rear section that creates the high-frequency swaying of the lure. The wide head guarantees perfect stability of the jig and enticing water displacement even with the slightest twitch. What's more, the paddle-shaped tail is set at an angle that always creates striking wagging to and fro regardless of the retrieve speed and jump height without over-twisting! Available in five versions: Q-Paddler 8 (8 cm), Q-Paddler 10 (10 cm), Q-Paddler 12 (12 cm), Q-Paddler 15 (15 cm) and Q-Paddler 18 (18 cm).

**Q-PADDLER**

Yet another shad with a wagging tail? No. The Paddler is based upon the natural, slender design of a no-action soft lure with a flat rear section that creates the high-frequency swaying of the lure. The wide head guarantees perfect stability of the jig and enticing water displacement even with the slightest twitch. What's more, the paddle-shaped tail is set at an angle that always creates striking wagging to and fro regardless of the retrieve speed and jump height without over-twisting! Available in five versions: Q-Paddler 8 (8 cm), Q-Paddler 10 (10 cm), Q-Paddler 12 (12 cm), Q-Paddler 15 (15 cm) and Q-Paddler 18 (18 cm).

**MANNIAC**

The zander magnet among sinking wobblers! With a length of 7.5 centimetres and a weight of 18 grams, this is the ideal sinking wobbler for vertical fishing and aggressive jigging. Retrieved at speed, however, the Manniac becomes an asp and pike killer during the warm season. Equipped with the unique 'Acc-Trac-System'!

**BABY 1-MINUS**

Like its big brother, the little Baby 1-Minus is a veritable secret weapon on all shallow and very weedy waters! A depth of 1 foot, or 30 centimetres, is the limit for the Baby 1-Minus. A totally reliable hard bait with plenty of buoyancy. Ideal for casting and calm retrieval. With its compact design, the little Baby 1-Minus wobbler also flies as true as a rocket, even in heavy side winds.

**BABY 8-MINUS**

Small, stout and completely reliable when it comes to fishing off weedy bottoms on not too shallow waters. The 8-Minus can reach a dive depth of 2.4 metres when pushed and, thanks to its ample buoyancy, is also ideal for extremely shallow retrieves. A genuine all-rounder! Perfect for casting and calm retrieval. Like all of the stout Minus wobblers, with its compact design, it also flies as true as a rocket, even in heavy side winds.

**STRETCH 1-MINUS**

Like the stout surface lure, the cigar-shaped Stretch 1-Minus Wobbler is a hit on all shallow and very weedy waters, where predators prefer lures that emit far weaker vibrations! 1 foot means a guaranteed 30-centimetre swimming depth and no deeper. This Stretch 1-Minus version also floats and is not only ideal for casting and calm retrieval, but can also be easily twitched. It is also very popular for trolling behind a downrigger or trolling lead since it will swim at a constant depth behind the lead without deviating.

**ACC-TRAC**

A floating wobbler with a fixed diving depth that you can rely on 100%! The lure is equipped with the unique 'Acc-Trac-System'. A self-adjusting attachment eye on the lip of the wobbler ensures that the Acc-Trac is always accurate and swims in its lane without breaking off. The Modell 35 swims at a maximum water depth of just over a metre! The Modell 79 swims at a water depth of up to 3 metres and is a genuine all-rounder that shot to fame when it was used to commemorate the 40th anniversary of Fisch & Fang magazine! The Modell 11-13 is ideally suited to swimming at a depth of 3 to 3.5 metres and no deeper, guaranteed!

**TWINLER**

It's back! By unprecedented demand for a pike lure – the original Mann's Twinler! This unique pike magnet is available from retailers once again. The same assortment in eight attractive colours. Often imitated, the Twinler's action is completely unique. Whether cast out and trolled or steadily retrieved, the highly stable action of the soft lure and alternating wiggles of the sickle tail make this lure a one-off. No other double-tailed twister has accounted for so many monster pike. Why not try it for yourself?

**YOLO CURLY SHAD**

The YOLO Curly Shad is a lure developed by the entire Quantum predator team specifically for targeting large fish. The sickle tail, which is specially adjusted to the body size, creates lateral movement of the entire body even in the slow sinking phase. The YOLO Curly Shad also has the huge plus point that, unlike many other large twisters on the market, its low weight allows fatigue-free fishing all day long without making compromises on lure size or requiring a special heavy rod and reel combination.

**YOLO SWIM SHAD**

A newly designed catching machine in 6 attractive decorations for active fishing for pike above weed and obstacles or in shallow water. With its internal floating device, the slow-sinking Yolo Swim Shad is an irresistible delicacy. Whether retrieved quickly or slowly, the paddle tail always moves tantalisingly while the intelligently designed, internal floating device provides the necessary stability. The option to attach the treble hook to an eye on the top allows lure retrieval on weedy waters, which is normally where the target fish are lurking.

**HAIRY MARY**

Innovative fringed jig in three sizes and eight highly attractive designs. The rubber compound impresses with its shimmering colours and extreme softness. At the leading edge of the Hairy Mary is a neat hollowed-out channel designed for optimal hook presentation. Both sizes come with a groove along the stomach for use with offset hooks (e.g. when dropshot fishing). Holographic eyes complete the alluring package. In testing, the Hairy Mary, with its partly contrasting, moving fringes, demonstrated its extreme attraction to perch and zander while the larger of the two designs proved a hit with pike.

**PELAGIC SHAD**

The largest predators in our waters, whether monster zander or giant pike, spend the majority of the year living an inconspicuous, shadowy existence in the pelagic water column of our stillwaters. Catching such predators purposefully in mid-water requires expensively produced extreme lures that imitate typical prey down to the last detail. As one of the first manufacturers of „pelagic“ vertical lures in Europe, we present the Pelagic Shad from Quantum. Whether jigged vertically in open water or traditionally on the bottom – the Pelagic Shad is the key to your dream fish. During the revolutionary development phase, Fredrik Harbort and his friends outwitted countless open water giants in several countries around Europe with the lure. Besides the realistic design, the ultra-sensitive action also plays an essential role in successful mid-water angling. Those who are familiar with this type of fishing will quickly appreciate the benefits. The rules of open water just changed.

Trade Pack 10 Pieces

“Mr. Pike” is the perfect range for all seasoned predator anglers which prefer to fish for bigfish with deadbaits. A classical method – interpreted in a modern fashion and perfectly delivered. That’s what “Mr. Pike” is all about.

Mr. Pike – “traditional pike shing spot on!”

Our new product range “Mr. Pike” is the perfect range for all seasoned predator anglers who still rely on deadbaits. Here you can find a straightforward range of rigged-up pike traces made from the finest multistrand American Fishing Wire (AFW) with an inconspicuous “Camo”-coated surface. A material that is one third thinner than conventional steel trace material and that adapts perfectly to water coloration and the bottom of the swim, resulting in clearly improved catches when compared to black wire, for example.

The range also includes the corresponding small materials and a fully compatible selection of perfectly balanced baits for all sizes of bait and any kind of presentation. This very special range is highlighted by four extraordinary rods for pike and zander fishing from the bank or boat. And, last but not least, clothing and practical bags for storing the traces, rigged-up rods and tackle together with frozen deadbaits.

**MR. PIKE PENCIL SLIDER**

When it comes to deadbait floats, it has to be the Mr. Pike 'Pencil Slider'! Optimal line flow, very low water displacement on a bite and optimal visibility in all weather conditions - what more could you want from a perfect predator float? Produced from indestructible Rohacell - made in Germany!

Code	Length	BS	Colour
5240 001	95 mm	10 g	black
5240 002	135 mm	20 g	black
5240 003	170 mm	30 g	black

Trade Pack 5 Pieces

**MR. PIKE FAT SLIDER**

Typical inline pike float! The slightly stocky float body of the Mr. Pike 'Fat Slider' is extremely stable in the wind and waves and highly visible in the water. Despite the rather small and compact body, the float is very buoyant, which makes it a true all-rounder. Produced from indestructible Rohacell - made in Germany!

Trade Pack 5 Pieces

**MR. PIKE TROLLING FLOAT**

A must for every seasoned pike angler - the Mr. Pike 'Trolling Float'! This ideal trolling float for deadbaiting behind a boat is equipped with an integrated self-clamping device that prevents the main line from running through the float when pull is applied. This ensures that the baitfish always remains at the depth pre-determined by the angler and does not wander upwards through the line stopper. Produced from indestructible Rohacell - made in Germany!

Code	Length	BS	Colour
5244 001	125 mm	30 g	black
5244 002	125 mm	40 g	black

Trade Pack 5 Pieces

**MR. PIKE ZANDER FLOAT**

A Dutch classic! A faithful reproduction of the most popular zander float of Dutch 'Snoekbaars' experts. Holds firm in the wind yet indicates even the finest bites from these cautious predators. Innovation: the snaplight option on the sensitive antenna! Produced from indestructible Rohacell - made in Germany!

Code	Length	BS	Colour

5242 003	125 mm	40 g	black

Trade Pack 5 Pieces

**MR. PIKE PENCIL LOADED**

Sometimes, anglers are forced to present their deadbait either on or off the bottom with a float rig rather than legering due to the amount of vegetation. This is where the Mr. Pike 'Pencil Loaded' float comes into its own. Produced from indestructible Rohacell - made in Germany! Lead-free!

Code	Length	BS	Colour

Trade Pack 5 Pieces

**MR. PIKE BAIT POP UP KIT**

Three intelligently designed floating devices for every conceivable application on the water. The round ball is designed for offering floating whole deadbaits, the half ball allows a half deadbait or large deadbait chunks to be presented tantalisingly off the bottom and the drop-shaped floating device presents smaller deadbaits attractively on a leger rig. The integrated supporting bar allows the 'Bait Pop Ups' to be fixed simply and securely.

Code	Content	Colour
6240 001	3 pcs	red

Trade Pack 5 Pieces

**MR. PIKE PENCIL**

The typical English pike float for fishing with deadbaits on the bottom. The Mr. Pike Pencil is not loaded and has a low buoyancy of just 10 g. The rig is set up so that the bait lies on the bottom and the stopper keeps the Mr. Pike Pencil half sticking out of the water. When a fish bites, the float either disappears or comes up out of the water and lies flat before quickly diving to the depths. Made in Germany from Rohacell, the float is easily visible over long distances.

MADE IN GERMANY

**MR. PIKE INLINE TUBE**

The snaplight float with a modern design has been specially developed for night fishing for big predators. With the clear line flow, the float is ideal for fishing at all water depths and allows the angler to respond quickly to changing conditions. In addition, the floating body has a snaplight insert with a large attachment that allows the angler to easily spot the float over long distances. The cone shape impresses with its long-range, precise casting qualities that set it apart as a perfect predator float.

AMERICAN FISHING WIRE

**MR. PIKE CAMO COATED LEADER MATERIAL**

In American Fishing Wire, Mr. Pike brings a camo-coated steel leader material to the market which is up to a third thinner in diameter than comparable nylon-coated steel leaders available. The coating has a genuine camouflage effect since the leader adapts to the natural colour of the bottom of the water. In countless field tests, anglers have not only hooked significantly more fish with the camo steel leader but also larger and shyer predators. The Mr. Pike 'Camo Leader' material is available on 10-metre spools in a variety of breaking strains for fine zander and eel to large pike fishing.

**MR. PIKE DROP BACK INDICATOR**

Even large pike can sometimes be prudish! They often just play with your baitfish, scarcely moving off the spot. The Mr. Pike Drop Back Indicator prevents these fish from devouring your baitfish unnoticed! A vigilant bite indicator that does not miss a thing. It is mounted on the rear bank stick. The twist-on connector fits any stick diameter. The bite indicator is the plastic egg that you can open and adjust internally with weights according to the wind and current. The arm moves freely, indicating both runs and drop-back bites. A finely adjustable plastic clamp can also be adapted to the main line diameter, ensuring that the line is pulled off without resistance. With snaplight insert. Includes: 2 plastic bite indicators with line clamps (bright white and fluorescent orange), 3 counter-weights and a stainless steel bar with a screw clamp.

**MR. PIKE KWIK CHANGE SWIVEL KIT**

Incredibly practical to use, particularly when unhooking a landed fish. The intelligent Mr. Pike 'Kwik Change' carabiner at the end of the swivel enables rapid removal of the steel leader even in the landing net. Protects both the fish and your rig. The kit comprises the Kwik Change swivel and matching Safety Sleeves that act like a second skin around the individual rig components. The Mr. Pike 'Safety Sleeves' come in a light sand-camo colour that perfectly matches our camo leader material.

**MR. PIKE FIRE-BALL JIGHEAD**

When it comes to presenting deadbaits actively and attractively, the Fireball Jig is in its element! Whether vertical fishing beneath the boat or using a drifting rig combined with a float. The Mr. Pike Fireball Jigs are decorated in an irresistible, UV-active 'Firetiger' design and, unlike many other jig heads, have an oversized, needle-sharp, wide-gape hook. This allows even large deadbaits to be mounted at the front via the mouth. And they are not only ideal for attaching baits, they also take a perfect hold in the hard mouths of pike when the angler strikes! Equipped with a robust fixing eye for the leader as well as a second eye for the stinger.

**MR. PIKE PIKE SCOOPER**

Room for a monster! A landing net with floating devices on both corners combined with a robust full metal frame including an extra-long thread - a must for every big pike angler. The extremely robust landing net handle provides sufficient support and stability to land fish of any size. The protective rubber net with its flat bottom rounds off the attractive design.

**MR. PIKE ROD CASE**

Secure and reliable on the water. The upholstered rod holdall in single sleeve design offers sufficient storage even for long-cast rods with large rings. A smart extra for documenting your large catches is the printed tape measure on the rear of the bag. The Mr. Pike 'Rod Case' is equipped with a robust zip fastener and is loaded with rigged-up rods and reels from above. With shoulder strap. Material: 100% Polyester

**MR. PIKE TRACE WALLET**

The perfect solution for kink-free storage of rigged pike leaders. Unlike a rig bin, the luxury rig wallet allows the steel leaders to be laid out in extended form as well as being easily removed and replaced after use. The robust foam panel of the Mr. Pike 'Trace Wallet' provides space for up to 24 ready-made pike leaders. Material: 100% Polyester

8517 067	65 cm	black

**MR. PIKE CARRYALL + FREEZER BAG**

An ingenious combination for all stationary predator anglers - a spacious shoulder bag for all kinds of tackle and accessories combined with a removable cool bag! The Mr. Pike 'Carryall' is designed to accommodate all conventional tackle boxes. The second section of the bag - the 'freezer bag' is equipped with a particularly thick iso-layer to ensure trouble-free storage of deadbaits over a long period. The freezer bag is also removable, allowing it to be stored separately while fishing and cleaned after use. Material: 100% Polyester

**SCREW IN BLADE**

Extra spinner blade that can be screwed easily into a deadbait or soft lure, providing additional temptation for predators to bite.

**CAST JIG 50 DEGREE**

No ordinary jig head - a smart jig head! The Cast-Jig is designed for slow and lazy retrieves as well as for jiggling soft lures from the bank! The 50-degree angle of the attachment eye makes it possible for the shad to rise immediately when twitched and to spin to the bottom for longer during the decisive sinking phase – a significant improvement on standard weight heads with a 90-degree attachment eye for vertical fishing! Other benefits include the stable and needle-sharp jig hook with the unique “shad holder” barb on the shank, which, together with the mini-ruffle, ensures a perfect hold of the soft lure without pulling out. In addition, the wide bend provides optimal grip in the predator’s mouth. Made exclusively for Quantum by VMC!

Trade Pack 5 Pieces

The new YOLO Shad System is the innovation for all predator anglers who want to present their soft lures at all standard depths using just one rig! The weight head is divided into three parts, allowing the angler to fish with 8 different weights, and hence at the same number of depths or speeds, simply by rotating these parts. Equipped with two ultra-sharp carbon steel hooks, the rig ensures secure hooking and can be quickly and easily combined with a wide variety of soft lures.

**BIG PIKE OFFSET HOOK**

There is an abundance of weighted offset hooks on the market. Unfortunately, those designed for bass fishing are often too small for our European fish. Quantum has brought two new sizes to the market specifically for today's requirements, allowing the angler to fish with typical bait sizes in Europe without weed interfering.

**NEW**

### Q-STINGER

When a fish attacks a soft lure, the lure does not always lodge securely in its throat. When solid bites are difficult to come by, an extra treble hook always helps! The new Q-Stingers put the odds back in our favour. Thanks to the unique Q-treble with a claw on the side of the shank, all three hook tips of the treble are positioned perilously to the sides. No more precious hook tips sticking in the soft lure – now all three hooks are free to hook the fish! Produced to the highest quality in the most important shad lengths and with 28 kg AFW stainless steel and AFW sleeves. A particularly clever feature is a tough rubber tube above the loop for attachment, with which the stinger can either be attached via the jig hook or the line eye.

### Q-LEADER STAINLESS STEEL

Anglers who prefer to play it safe when spinning can always count on steel! And not just any material but AFW. That is why only AFW stainless steel and corresponding sleeves are used on each and every one of our leaders. The core comprises uncoated 1x19 camo-steel material. Enhanced with Q-Snaps and ring swivels as well as inconspicuous camo sleeves over the connections. No more annoying weed wrapping itself around your leader. Available in two strengths and leader lengths.

### Q-LEADER FLUORO CARBON

Many waters are becoming increasingly clear, causing more and more lure anglers to use 'inconspicuous' fluorocarbon leaders. We offer a selection of ready-tied leaders that will meet the toughest demands. Produced in original 'Hi-Seas' AFW fluorocarbon with their own matching pinch sleeves. The leader is enhanced with an original Q-Snap and special ring swivel. As a special feature, to make the leaders even more inconspicuous, we have fitted the connections with transparent sleeves that also protect the rig from weed.

### Q-LEADER HARD MOND TAPER LEADER

Made from nylon polymer, the surface of the hard monofilament leader is extremely durable without being stiff. The unique feature of the leader is its tapered design! This allows the thin end to be tied directly to the braided main line, ensuring a flawless transition to the braid which, in turn, creates optimal casting properties. Meanwhile, the thick end of the leader fitted with a Q-Snap ensures the necessary protection down near the lure! Ergonomically designed, transparent protection above the Q-Snap protects the leader from annoying weed. Suitable for both freshwater and saltwater.

Snugly warm with full protection against wind and rain! This two-piece winter suit not only keeps you warm and cosy, it also won't let wind or rain through. The high-quality "Waterproof Shell" material in timeless grey has a water column of 5000mm and sealed seams. An eye-catcher: The high-cut and fluffy warm collar with chin padding for best protection against icy winds. First-class fit and wearing comfort is also offered by the thermal dungarees, which ensure a perfect feeling of well-being thanks to their generously cut back section. Other extras: additional knee paddings, quality zipper and lined trouser pockets with zipper for warming up cold hands when fishing. The jacket has a padded, detachable hood with rain shield, practical inner and outer pockets and soft cuffs on the sleeves. Material: Shell: 210T polyester, poly chloride coating, 5.000 mm water resistance. Gram weight: 200 g/m<sup>2</sup>

**OUTDOOR JACKET**

The days when anglers sat at the water in second hand army clothes are over. Long sessions and inclement weather call for first class clothing. The new Quantum Outdoor clothing more than satisfies the requirements of a comfortable, contemporary design combined with modern materials and intelligently applied reinforcements. Our testers were particularly impressed with the completely wind and waterproof Water-X external material, which is breathable to prevent sweating. Watertightness: 20,000 mm water column. Material: Breathable, 100% Polyester. Gram weight: 130 g/m<sup>2</sup>

Code	Size	Colour
