Select is a young brand of fishing tackle. Its wide product range, striking design and affordable price allow any angler to fully cover all the needs in fishing gear.

The company offers fishing rods, reels, lines, lures, clothing, various accessories and consumable items. Soft lures have won a special place in the product range, showing their efficacy in many different conditions during numerous fishing trips.

First and foremost, Select products will be attractive to the beginners and those looking for great price-performance ratio when choosing fishing tackle. With Select fishing is available to anyone!

## Freek

Cost-effective spinning rod with an excellent casting dynamic. It is capable of reaching a remarkable distance even with light wobblers for chub fishing. In our conditions, it can catch any predator fish: be it a pike from the shore or a boat, or a zander along with perch on a jig head.

Carbon fiber modulus is 24T. Rod action is close to fast, during the jig head tracing the tip is working mostly, whereas during the wrestling the entire blank is involved. Freek is equipped with modern guides and tip, designed to prevent line entanglement. KT running guides are used. For a better visual control of the tracing, the tip winding is bright orange. The split grip handle is made of the EVA material

The rod is perfect not only for beginners, but also for leisure fishermen: those who need a good tackle for a reasonable price.

## Ritmix

Ultralight fishing rod with a solid tip for microjig fishing.

The blank is pretty stiff throughout the entire length, but the insert is considerably soft. This particular design enables comfortable manipulation of the tiniest baits and visual control of bait's contact with the bottom.

The spinning rod is equipped with modern streamlined guides getting smaller in size closer to the tip to ensure the correct performance of the blank. The split grip EVA handle pairs nicely with the classic screw reel seat for comfortable rod holding. Ritmix will help novice anglers to master perch, pike and zander fishing on small soft lures. And for those fishermen using micro lure in rare occasions it will become a good alternative for a reasonable price during the spring spawning season, when it's prohibited to fish.

## Force

Fast, light and balanced rod. It has a strict modern minimalistic design in matte black, its blank is manufactured from a combination of two types of Carbon - 24T and 30T. The split grip handle is made out of EVA material. Guides are shaped to prevent line entanglement and are also equipped with ceramic inserts. For better visual control of the tracing the tip winding is bright orange color. The spinning rod has decent sensitivity to be able to feel the bottom with the lure, and it also provides a good casting so you can reach the fish stock.

Model number Force has 13 fishing rods with tests from 3-14 g to 10-32 g, where every fisherman can choose the right rod for different styles of fishing: soft lure fishing, wobbler twitching or fishing with lures and cranks.

## Basher

NEW

Extremely powerful spinning rod with a significant strength reserve designed in a classic clean style. It has a fast 24T Modulus Carbon blank and enhanced capacity hardware, the first three guides are set on a three-legged frame.

The rod, first of all, will be appropriate for trolling big and large baits. It can be either specialized wobblers with a long «spatula», or a large soft lure with a heavy weight for bottom fishing.

Trolling is not the only application of this model. Basher can easily cope with such challenges as swim baits pike fishing with lures averaging from 80 to 100 grams. In addition to large pike, this spinning rod can also catch catfish, for example, the short model is good for fishing from the boat, and the long one can be used from the shore for a version of bottom fishing.

# Nitro

The main designation of this fishing rod is soft lure fishing, but some models can be used for twitching minnow 110-130mm. The blank has high sensitivity, great throwing capacity and power reserve. It is made out of 30T Modulus Carbon. Nitro utilizes high quality modern hardware, it is equipped with analogs of the Fuji KL-guides arranged according to the KR-concept technology. High-performance reel seat is remarkably well-matched to a split grip EVA handle.

Nitro is intended to become the basic tool for versatile anglers who believe that the best way to catch predator fish is as much from the shore, as from the boat, with a variety of baits and ways of their manipulation. A wide range of models covers most of the conditions in which our local fishermen fish for the predator.

## Freek

The reel fully meets the basic minimum requirements for comfortable fishing: it has a light, smooth motion, metal spool, an immediate anti-reverse lever stopper and precise friction adjustment.

Freek works equally well both with lines and cords.

It has 3+1 bearings, but all of them are installed on the main pair, which is responsible for the reel performance and duration of its operation. Freek is equipped with only one basic deep spool. The line consists of 4 sizes: 2000, 2500, 3000, 4000. And this ensures that you can easily select the suitable option both for a spinning rod, and for a feeder.

Model/Size	Weight, g	Line capacity (PE #/M)	Ball bearings	Gear ratio	Code
2000	255	0.6/450, 0.8/350	3+1	5.2:1	18703508
2500	264	0.8/480, 1.0/380	3+1	5.2:1	18703509
3000	269	1.0/350, 1.5/210	3+1	5.2:1	18703510
4000	375	1.2/350, 2.0/200	3+1	5.2:1	18703511

## Swift

Budget-friendly professional reel, which has all the necessary features for successful and comfortable fishing.

Strong plastic body is resistant to shocks. Metal spool is manufactured using the «Longcast» technology, beveled rim allows the line to fly more easily during casting. The reel is equipped with 5 ball bearings and an immediate anti-reverse switch system, which is supported by an additional roller bearing. This guarantees a smooth and constant rotation as well as high durability.

CNC metal handle with a flat EVA knob is easy to grip. Swift works well with thin lines, has a smooth motion and easy friction adjustment.

First of all, the model is designed for spinning rod fishing, but they can also be used for non-predatory fish, for example, for bolognese and match fishing, or light feeder.

Model/Size	Weight, g	Line capacity (PE #/M)	Ball bearings	Gear ratio	Code
2000M	227	0.4/200, 0.6/180	5+1	5.0:1	18703214
2500M	269	0.8/200, 1.0/180	5+1	5.0:1	18703215
4000M	284	1.0/200, 1.2/180	5+1	5.0:1	18703216

Extra spool	Code
2000M	18703222
2500M	18703223
4000M	18703224

## Beast

The body of the reel is made of metal, which makes it more reliable and durable. The handle is also metal, screwed into the main pair, minimizing the backlash in this assembly.

This model is equipped with 5+1 bearings, including those in the line roller. Available in 4 sizes: 2000M, 2500M, 3000M, 4000M. The set includes one metal spool of medium line capacity.

Beast can be successfully used for different styles of fishing. All the basic features in combination with the modern design make it a great addition to any fishing rod.

Model/Size	Weight, g	Line capacity (PE #/M)	Ball bearings	Gear ratio	Code
2000M	286	0.6/180, 0.8/140	5+1	5.2:1	18703512
2500M	304	0.8/190, 1.0/150	5+1	5.2:1	18703513
3000M	317	1.0/170, 1.2/140	5+1	5.2:1	18703514
4000M	425	1.2/180, 2.0/150	5+1	5.2:1	18703515

## Nitro

Modern stylish design, smooth motion and good winding - that's what this reel excels at, obviously, without taking into account its affordable price.

The reel has a lighter metal spool due to the new design and the openings on the front part. The size of the spool is M - medium. Therefore, the capacity of the spool is less than that of classic reels, but it is deeper than low-profile analogs.

Nitro has a neat thin handle, which is screwed into the main pair and a compact, ergonomic T-shaped knob. It is equipped with 7+1 bearings, located only in the places where they are most needed. The line consists of three sizes: 2000M, 2500M, 4000M. Smaller sizes are suitable for ultra-light and light. 4000M can be used for heavier baits.

Model/Size	Weight, g	Line capacity (PE #/M)	Ball bearings	Gear ratio	Code
2000M	240	0.4/270, 0.6/235	7+1	5.1:1	18703211
2500M	250	0.8/270, 1.0/235	7+1	5.1:1	18703212
4000M	290	1.0/270, 1.5/235	7+1	5.1:1	18703213

Extra spool	Code
2000M	18703225
2500M	18703226
4000M	18703227

## Basic PE

Versatile affordable line for constant use in a variety of fishing conditions. Works good not solely with predatory fish, but also with non-predatory.

Manufactured from durable Dyneema material. Basic PE is round, slippery, has a good sensitivity, is resistant to abrasions. A wide range of sizes allows to select the best option for tackle from ultra-light to heavy.

## Basic PE 8x

Versatile eight-strand line with an excellent price-performance ratio. The fibers are manufactured from modern material - high-modulus polyethylene (Dyneema), woven into a braid, which has a maximum circular overlap and outstanding smoothness. As a result, the line is very strong, soft, easily flies out of the reel spool, is highly informative and resistant to abrasions. Recommended for those types of fishing, where far casting distance and sensitivity are required, e.g. in spinning rod or feeder fishing.

Japan number, #	Strength, lb	Strength, kg	Diameter, mm	Length, m	Code Light Green	Code Dark Green	Code Multicolor

# Master PE

Resistant to tearing, quite stiff four-strand line with high resistance to abrasion. Recommended for challenging fishing conditions - soft lure fishing with medium and heavy jig heads in the roots, trolling, and as a shock leader for feeder fishing. Suitable for common use.

## Fluorocarbon Master FC

High-quality fishing string, suitable both for line and shock leaders for catching non-predatory fish and angling for predators. Furthermore, in the largest diameters can be used for pike fishing. Material is 100% fluorocarbon, it stands out for its superior strength, increased damage resistance and low visibility in the water. Works well with most of the well-known fishing nodes.

## Fluorocarbon Basic FC

NEW

Modern Japanese wire material, designed to assemble the leader wire and all kinds of appliances. Remarkable for its good resistance to abrasions and strength at the widest range of knots. A broad range of diameters allows selecting the best thickness for the most diverse tasks, for predatory and non-predatory fish.

Diameter, mm	Strength, lb	Strength, kg	Abwickeln, m	Code

0.68	35	15.8	10	18706503

## Fluorocarbon leader wire

Produced from high quality fluorocarbon Hi Seas (USA), resistant to abrasion, does not change its properties at temperatures from  $-40^{\circ}\text{C}$  to  $+160^{\circ}\text{C}$ . Fluorocarbon leader is almost invisible in the water, because it has the same coefficient of fracture. This makes it irreplaceable when fishing for cautious fish in clear waters.

## Braided leader wire

Depending on the model is made of 7, 19 or 49 stainless steel fibers (Stainless Steel Leader Wire), produced by the American factory AFW, with anti-corrosion coating, applied by anodizing. Combines high strength with small diameter with high elasticity. Recommended for all kind of lure fishing.

## Leader wire String No. 1 and No. 2

Manufactured from unique dark-colored material (Stainless Steel Single), developed and produced by AFW (USA). Its elasticity, small diameter and light weight allows the fisherman to constantly feel the contact with the bait. It is not susceptible to corrosion. Due to the design without the fastener and swivel lure entanglement is minimized. Recommended for fishing twitching style. The #1 has one end sealed, and the #2 - two ends unsealed.

## Green leader wire

Classic universal model, made of 7 steel fiber threads in a nylon cover. As a result it has increased stiffness and abrasion resistance. Used in all types of spinning rod fishing. Highly recommended for beginners and those who ignore the diameter of the leader wire. For ease of mounting and changing the bait, equipped with a swivel and a clasp.

# Boozer

A large soft lure shad with a massive body and a distinctive play for catching predatory fush under various conditions. The geometry of the lure is designed in a way to easily engage in the work, even with a slow conduct and light weight. Boozer is made of new very durable «edible» material, preserving its qualities even in the cold season. This soft lure shad is simple in manipulation, you can conduct it slowly and evenly, using a classic «step» style, or in a swift aggressive jerk style. And the most effective mounting is a hard jig head or a «screw» with a treble hook, as these options allow the bait to fully show itself.

# Fetish

The entire body of this soft lure shad is covered with soft ribs. They create additional vibrations that attract the fish. During biting the ribs are easily crumpled and start to actively produce flavoring agents contained in silicone. The lure works well not only under usual bottom jigging, but also when dragged along the bottom. Fetish 2" works great with light and ultra-light.

# FatFish

Soft lure shad with an elongated shape and covered with soft ribs. During conduct the lure's tail swings extensively from side to side, attracting fish with vibrations. Besides the usual bottom jigging, Fatfish works effectively when dragged along the bottom. The attractive wiggling of the whole body and mud, lifted from the bottom by the jig head, actively attracts the attention of the fish.

## Shad Up

The soft lure shad type bait, made of high quality edible silicone. It has a unique body shape with a quite robust front part and a thinning before the tail. Works perfectly under very slow conduct with minimum weight, creating an extensive play.

Model	Quantity
Shad Up 3.5"	5 pcs/pack

## X-Shake

The soft lure shad with a body, similar to the Shad bait.

X-Shake is manufactured of soft plastic and operates well even under very slow conduct. Good for catching zander and pike on the rivers and water reservoirs.

Model	Quantity
X-Shake 4"	5 pcs/pack
X-Shake 6"	4 pcs/pack

## Target

The body of the bait is made of edible material and is shaped like a fry. This tiny soft lure shad shows excellent results when fishing with micro jigs. Target works amazingly with classic jig heads, but hinged mounts are also possible, making the play of the bait more extensive. Ideal for perch fishing, but pike and zander may also bite.

Model	Quantity
Target 1.6"	10 pcs/pack

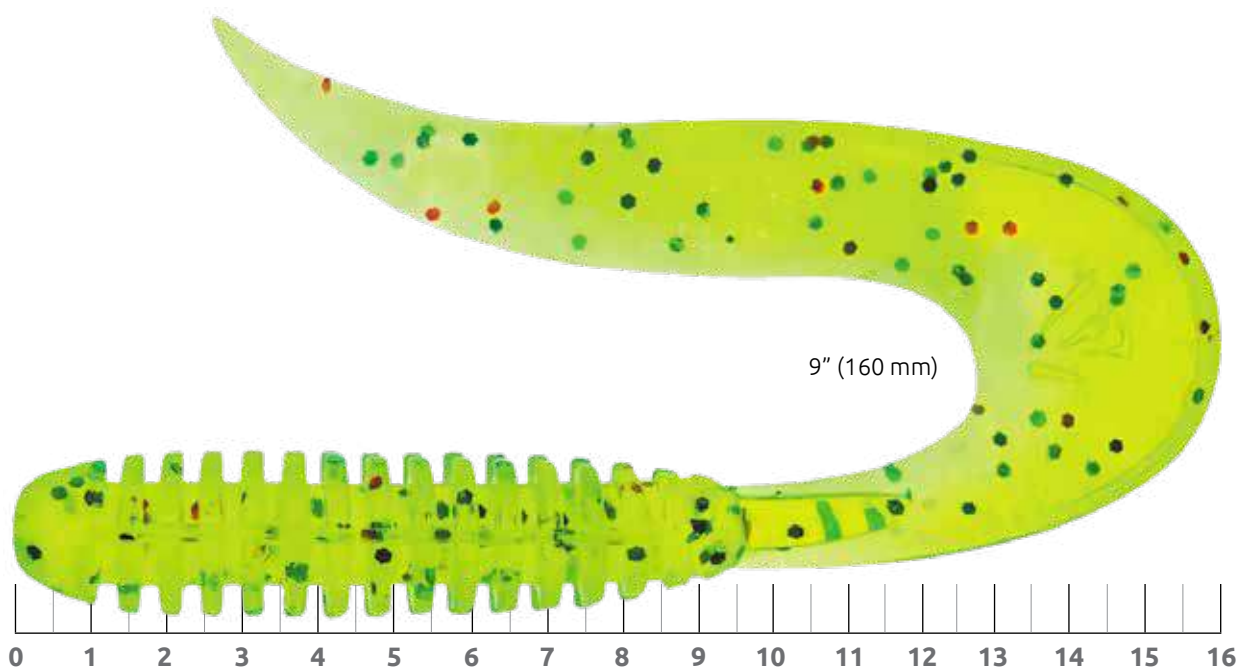

## Freek

Grub with a ribbed body and a long voluminous tail. Perfectly selected width of tail and thickness of the material provide for an immediate engagement of the grub in the work, regardless of the conduct phase, tossing or free fall. Freek is versatile in use, it can be applied to fish all species of predatory fish. Varying mounting options depend solely on the fishing conditions - it can be a jig head, as well as an offset or a double hook from a thin wire.

Model	Quantity
Freek 2.3"	8 pcs/pack
Freek 3.3"	7 pcs/pack
Freek 4.5"	5 pcs/pack

## Relax

A classic grub with a very soft wagging tail. The lure is made of edible material, soaked in a persistent attractant. The best option for fishing with soft lures and jig head tackles will be Relax in size 1". Also this grub may be used in the so-called «multi lure rig» for catching predators in shoals. Relax will be "tasty" for perch and white fish, sometimes for pike, sometimes for zander.

Model	Quantity
Relax 1"	10 pcs/pack
Relax 1.6"	8 pcs/pack
Relax 2.4"	6 pcs/pack

# Uran

It is a combination of active and passive lure, which allows to use Uran in various types of conduct. In case of classic jig it works best with a slow leading. Realistically imitates an insect or a fry, rummaging on the bottom. This lure can attract the perch of any size to bite, sometimes pike, zander and even white fish.

# Bugz

The lure with an active play. Uneven body, insect-like legs and tail create an attractive wobble for the predator. Tail of the lure is placed in the same plane with the body. Bugz is made of soft edible silicone. Suitable for fishing perch, zander and pike.

Model	Quantity
Bugz 1.8"	8 pcs/pack
Bugz 2.5"	6 pcs/pack
Bugz 3.2"	5 pcs/pack

# Crow-X

Imitation of a tiny creature, manufactured from edible silicone. Dragging along the bottom with small pulls and pauses will be effective. The claws of the lure create a strong vibration, attracting the predator. Crow-X in conjunction with a hinged mounting is suitable for use in shallow waters. The creature attracts perch, pike and zander.

Model	Quantity
Crow-X 2"	6 pcs/pack

# Kraken

Creature with active claws, playing very nicely under even conduct. However, long and smooth pulls with pauses near the bottom and classic animation with sharp short jerks will be the best for this bait. On the pauses, due to wide claws, Kraken will gradually descend to the bottom. Do not neglect the slow dragging of the bait along the bottom. This will be relevant for catching pike at shallow depths.

Kraken has a cut in the upper part of the body for offset hook, but sometimes jig-rig mount can also be effective.

Model	Quantity
Kraken 1.8"	7 pcs/pack
Kraken 3"	5 pcs/pack
Kraken-X 3.5"	4 pcs/pack

# Toxic

A bait for perch fishing enthusiasts. It is important to select the correct mounting weight and lure delivery. Even conduct will not show the desired results, but various jerks and pulls near the bottom will work out perfectly. At a pause, after one of the «steps», the legs need some time to return to its original position, it is at this moment that perch usually bite. Works also good when dragged along the bottom. Best mounting — hinged, classic or jig-rig. If you fish with the heavy cheb sinker, you can comfortably fish more deep places in search of zander.

# Air Tail

A ribbed worm with an antenna on the end of the tail. Due to its ribbed structure, Air Tail creates additional fluctuations. The lure is manufactured from soft edible silicone. It is recommended to equip the lure with a light hook. Note that the bait should hold a vertical position on the bottom.

Model	Quantity
Air Tail 2.5"	7 pcs/pack

# Snack NEW

A worm that has a very voluminous ribbed tail, which, due to the large number of segments, has a very realistic wobbling under conduct. The specific feature of this bait is that the body structure allows it to hold air bubbles in its deep ribs, they raise the tail of the lure almost vertically at a pause. The most efficient mounting for the Snack lure is a swivel with a single or offset hook. It is also possible to use relatively short double hook, preferably not out of a very thick wire, so as not to interfere with the movement of the worm. The fore part of the lure is very wide, basically preventing its «breaking» when placing it on a double hook, at the same time it makes it easier to use mounts with a screw.

The main trophies of this lure are perch and zander of different sizes. Therefore, do not forget about such montages as «dropshot» and carolina rig. The body of the lure has a special slot to keep the sting of the offset hook safe from roots during fishing in «challenging» places.

# Tsunik

Ultralight lure, made of soft edible silicone. It has a unique play due to the thickening on the tip of the tail. It is advisable to equip the bait with a light hardware. If you want to appreciate the advantages of Tsunik, it is important to ensure it takes a vertical position at the bottom. Besides the classic predators, non-predator fish also bites this bait.

# Javik

The lure is manufactured from edible material. The elongated body with thin partitions moves attractively along the bottom upon jerk style conduct, imitating an insect. It works great with hinged mounts with a single or an offset hook. If you prefer to fish on the carolina rig or drop-shot, Javik will feel itself great in these types of fishing too.

## Flash

A small classic walker for perch and asp. Easy to manipulate, moves effortlessly from side to side, causing zigzags on the water surface. You can use two leading styles: medium-fast - wobbler will rotate smoothly and produce broad turns, and fast - walker will produce very sharp turns more or less at a same spot. With Flash you can successfully fish both on rivers, and on lakes. Often an active predator can be found on the spits and shallow waters, and it is worth fishing in the areas with grass. You can also use walker, if within the casting range you can see splashes of fry on the surface of the water. Just throw the bait there and the attack of a perch or other predator will not make you wait long.

Model	Length, mm	Weight, g	Depth, m	Type	Floating type
70F	70	5.8	Topwater	Walker	Floating

## Splash

This popper can make your fishing trip very dynamic, emotional and unforgettable. It's great for attracting active perch, and it will also be good for catching pike amidst waterlilies. In the leading process, besides the splashes, the wobbler also splatters distinctively, additionally attracting a predator. Unlike the walker this lure can work the promising area more thoroughly. The popper gets attacked most often during the pause after a series of splatters with splashes. However, **Splash** also knows how to make walker-like zigzags. And this significantly increases the variety of conduct styles for its animation. Thanks to its streamlined shape and notable weight, the bait flies wonderfully.

Model	Length, mm	Weight, g	Depth, m	Type	Floating type
53F	53	5.8	Topwater	Popper	Floating

## Sprint

Miniature ultra-light crank. Offers a lot of applications, but its main focus is fishing for chub in small rivers. Wobbler holds the current and the given horizon well, and the color map was made with an emphasis on the strong and vivid fish. Except for the white predator, expect to meet a small perch or other small pike. And if you are fishing in the riffles of mountain rivers, trout will also appreciate this bait.

The Sprint is a suspender, providing more options for animation. In addition to the basic even conduct you can use a light twitching with small pauses. Such manipulation can provoke even a passive predator to attack.

Model	Length, mm	Weight, g	Depth, m	Type	Floating type
35SP	35	2.5	0.5-0.7	Crank	Suspender

## Reflex

It is essential that the angler's arsenal, apart from the minnow wobblers, should also include shads. Under certain conditions, this type can catch significantly better than the twitching minnows. Everything depends on what the predator feeds on at the moment. At steady conduct Reflex has a non-extensive play with frequent fluctuations. Therefore, the best leading style will be «stop and go» or short jerks with pauses. A gentle twitching makes the bait similar to a fidgety fish, realistically shimmering on the sides. That is why the pike reacts very willingly to this bait. In local conditions, the primary place for use are various types of shallow waters, reedbeds, old rivers, small streams and reservoirs, as well as small rivers with a moderate current.

The Reflex is equipped with a magnet system for farther and more precise casting.

Model	Length, mm	Weight, g	Depth, m	Type	Floating type
70SP	70	8.7	1-1.5	Shad	Suspender

## Drastic

This minnow can catch practically all our local predators: perch, pike, asp, chub, ide, and even trout. Wobbler works wonderfully in standing waters and in moderate currents. It has a distinctive play, making it possible to successfully operate it in even conduction. But, nevertheless, the most effective manipulation for this type is, of course, twitching. During jerks Drastick imitates a wounded fry, but at intervals hovers wobbling in the water, it is at these moments the predator most frequently attacks a weakened fish.

The bait is equipped with a magnetic system of distant casting, making it possible to maximize effective fishing in the area. Map of colors for this model is selected so that you can easily find the desired color for any fish.

Model	Length, mm	Weight, g	Depth, m	Type	Floating type
56SP	56	3.1	0.7 - 1	Minnow	Suspender

## Insider

This is probably the most versatile twitch type wobbler for pike. On jerks Insider chaotically moves from side to side, sometimes rotating by 180°. He is simple in the manipulation and works well at any pace of jerk style conduction, both with aggressive and gentle twitching. It has excellent casting characteristics, not only because of the elongated compact shape, but also because of the far casting system. The Insider is a suspender, it hovers in the water at a break and keeps nearly horizontal position. Apart from pike, perch of various sizes react well to this type of bait. The main places of application of the Insider are small ponds and ditches with a depth of 1.5 - 3 meters, and it is desirable that there is grass nearby. And size 80 is also suitable for zander fishing in the night on shallow water spits and in the coastal waters.

This model is available in two sizes: 80SP and 110SP.

Model	Length, mm	Weight, g	Depth, m	Type	Floating type
80SP	80	8.1	0.8-1	Minnow	Suspender
110SP	110	17.2	0.8-1.2	Minnow	Suspender

## Dementor

Wobbler, that easily and confidently provokes the predator to attack, is good for fishing in the wide areas of water reservoirs, as well as on small rivers or lakes. At a steady lead Dementor has its own pronounced play, but for greater efficiency it is better to use twitching. When jerked moves in different directions, the sides are convulsively flickering, like a wounded fish, and at a pause hovers in the water. It is at this moment that the attack occurs most often. The Dementor does not always need an aggressive and sharp twitch, sometimes short, easy jerks with very long pauses are more effective. This animation is able to attract a pike even from significant depths.

The Dementor has three metal balls inside, shifting from the working position towards the tail while casting, thus changing the center of the weight. This makes the wobbler fly well and is very suitable for fishing in large bodies of water. During the conduction of the lure, the balls produce the effect of the rattle, which makes the lure even more noticeable in the water.

Model	Length, mm	Weight, g	Depth, m	Type	Floating type
130SP	130	21	1.5-1.8	Minnow	Suspender

## Tail spinner

The lure combines a spinner, a pilker and a rattlin, and simultaneously is something unique and unlike anything else. Heavy compact lead body in the form of a fish allows to make the farthest casts. The headwind, or sidewind, will not become an obstacle. This tail spinner uses a standard drop-like petal mounted on a swivel with a bearing, providing an easy launch and stable operation of the lure. Turbo can easily be called a bottom spinner. Because its main working horizon is the bottom areas. Another advantage of this lure - it does not spin the line at all. Recommended fishing period for this lure begins in the second half of spring and ends in late fall. The most popular trophy is certainly the perch. But it is also appropriate for catching zander, asp and other species of fish.

## Omega

The bait with the most distant action in the Select line. Thanks to its long and narrow body it shows good results on the current, especially when it is necessary to reach the cautious fish from afar. But with the same success works on waters with standing water.

Model	Length, mm
Omega 2.8	34

## Delta

It has a classic body with an extended shape. Delta's mid-amplitude and powerful vibrations are able to attract a predator from a great distance. Recommended for fishing of middle and near-surface waters, shows good results in trout fishing in area ponds.

Model	Length, mm
Delta 2.6	31

## Deeper Lakes & Rivers

A series of spoons specially designed for fishing the most popular predators of local waters — perch, pike, zander and chub. Wide body of the bait makes it possible to cause a large-scale play during leading, while the speed of the reel handle winding can be at a minimum. At a pause smoothly sinks to the bottom, thus additionally tempting the predator to bite. All the baits of the series are equipped with sharp red treble hooks.

Model	Length, mm
Deeper 5	36
Deeper 7	42

## Deeper

Wide-bodied bait with an accelerating play. Creates a powerful wobble during leading, attracting fish at great distances and provoking the predator to attack. The **Deeper** allows to fish different horizons. It is versatile both in terms of targets and conditions of use.

Model	Length, mm
Deeper 2.5	28
Deeper 3.5	35

## Dancer

This bait has a truly high-amplitude play. Narrow tail and a wide head create a unique «drawing» upon leading and a fluttering effect at a break. Due to this, Dancer will not be missed even by a passive predator.

Model	Length, mm
Dancer 2	27
Dancer 2.5	31
Dancer 3	31

## Target

The bait with an easily recognizable shape. Easily «breaks through» the wind while flying. The Target is good for fishing different horizons. It showed itself well in trout fishing under rough fishing conditions.

Model	Length, mm
Target 2.2	31
Target 2.8	31

## Winner

One of the most popular models of microspoons among professionals and enthusiasts of trout fishing. The bait does not «flip» after being cast, therefore it flies accurately and far. Enables fishing at distances unreachable for wide baits. The Winner's unique play is able to provoke even very passive fish.

Model	Length, mm

## WH-11

The hook is used to equip thin and narrow bodied soft lures. A slight bend is evenly positioned against the body of the lure and at any moment after the bite it quickly releases the tip for a solid hooking. Manufactured of high-strength high-carbon steel with forged additional sides at the bending spot.

## WH-110

A series of offset hooks with a wide bend and a point directed towards the center. This shape is perfect for grubs and small soft lure shads. The specific feature of this model is an enlarged diameter of the eye, due to which the offset moves freely on the sinker regardless of the thickness of the wire used, and can also be fastened through the guiding ring. WH-110 is suitable for pike, perch, zander and other local waters predator fish fishing.

## WH-22

Offset hook designed for small size soft baits. Its shape is designed in a way to fit grubs, soft lure shads and creatures with a short and moderately high body perfectly. The point of the hook, directed downwards, adheres to the bait, thus eliminating the possibility of getting snagged by underwater obstacles.

## WH-93

Offset hook for equipping large soft lures. The broad radius of the bend does not interfere with the penetration of the hook point as the fish bites. The WH-93 is made of high-quality high-carbon steel with forged edges, enabling it to withstand great stresses and maintain sharpness for a long time.

## WH-190

Offset hook of versatile shape. Due to the use of a smaller diameter wire, it allows the lure to move more naturally under water, pierces the fish easier and at a high pressure can unbend, thus avoiding loss of the whole tackle. Nevertheless, its strength is sufficient to firmly hold a large fish. The WH-190 are manufactured from high-carbon steel and have a laser sharpened point.

## DH-21

Thanks to zonal forging and cryogenic hardening, it was possible to significantly reduce the brittleness of the shank and to increase the point firmness. Double oxidizing of the DH-21 prolongs their service and protects them from corrosion. Perfect for the creation of various fishing equipment.

## DH-22L

Model with an increased shank length, intended for the installation of soft lures. The double hooks are made of high strength carbon steel, have a laser sharpened point and a sufficient capacity for holding large fish. The double oxidized coating of the hooks protects them from oxidation even during constant use. The DH-22L is ideal for fishing with soft lures and jig head for pike, zander, perch and catfish.

## TH-31

Manufactured from high-carbon steel with the use of cryogenic hardening and zonal wire forging, making them extra strong. Double oxidation protects the metal from corrosion. A distinctive feature of this model is the special shape of the tip, which is slightly curved to the center, and the special laser sharpening of the triangular shape. Thanks to this, the fish is more easily hooked and firmly seized on the hook.

## TH-36

The treble hooks are made of high-carbon Japanese steel with the use of zonal forging and cryogenic hardening. Thus, it was possible to increase the toughness of the point and significantly reduce the brittleness of the shank. A double oxidation protects against corrosion and prolongs the service time of the hooks.

The TH-36RD comes in red.

## Kulya (bullet) sinker

Perfectly suited for fishing in conditions of increased risk of hook snagging. Also it is possible to attach an offset hook to the «Kulya» sinker without using a guide ring. The brace is made of stainless steel wire.

## «Vuhastyk» ball sinker

Ball lead sinker with removable frame. Used for equipping soft lures during jig fishing. Modular construction allows to quickly replace the sinker without using the split rings. As a resilient steel wire is used in the manufacture, the possibility of its spontaneous unbending in the process of fish withdrawal is almost eliminated.

## Tungsten ball sinker

Serves for equipping soft and other jig baits for predatory fish hunting. Tungsten ball sinker is made of tungsten, which has a greater net weight and increased firmness in comparison with their lead counterparts. At the same mass it has smaller dimensions, which in turn affects the throwing range and the speed of sinking into the water.

## «Vuhastyk» — screw

Used in fishing with softbait and jig head as soft lure equipment. The modular construction allows for quick replacement of the load without the use of split rings. The screw firmly secures and holds the soft lure even after several bites of the fish. It is best suited if the bait is equipped with a treble hook or a stinger gear with hooks, located in the back.

## Extractor

Typically used by spinning rod fishermen to safely remove the hook from the fish's mouth. It allows to avoid hands tearing against the teeth of pike if the fish has grasped the bait deeply, and gently detach the hook without harming the trophy.

Made of durable high-carbon steel with soft anti-slit linings on the handles. Special toothed lock allows to secure the hook reliably during removal.

## Fish gripper

Manufactured from high-strength plastic. It reliably fetches the lip of the fish and does not allow even the slightest loosening of the fixation. The grip is floating, but for convenience a hand strap is provided.

Model	Sizes, mm	Weight, g	Code
SL-LG08	210	75	18703875

## Magnet with carabiner

A small but very useful fishing tool. It makes it easy to attach pliers, lipgrip, extractor, scales, or other fishing tools to a bag or a belt. The maximum load the magnet can bear may reach up to 4 kg.

Model	Code
SL-MGN	18703877

## Retriever

Plastic retriever with aluminum carabiner on one end and a ring on the other will help secure the equipment to your belt, bag or boat. Perfect for attaching pliers, lipgrip, extractor, or other fishing tools.

Model	Sizes, mm	Code
SL-RCR	120	18703874

## Pliers NEW

Multi-functional pliers, which can easily penetrate not only the hair, but also the cord and fluorocarbon. They have a highly sharpened cutting edge and a needle to detangle the line. Will be at hand when fishing and during pre-fishing preparations.

Model	Sizes, mm	Code
SL-Z03B	52	18703872

SL-SJ05

## Multitool NEW

Portable Multitool, which combines 10 tools (knife, toothed knife, wire cutters, slotted and Phillips screwdriver, pliers, sharpener, bottle opener, awl, and a split ring unclenching tool). Needed in fishing, and in everyday life. Compact and easy to use. Manufactured from durable and strong stainless steel.

Model	Sizes, mm	Code
SL-MT01	100x45	18703876

## SL-YP05 Pliers NEW

Multi-functional pliers. Crafted from strong stainless steel, featuring ergonomic handles, including a folding knife in one of them. Also features a folded toothed knife, wire cutters, and a tool to unclench split rings.

The pliers will be useful in removing the hook from the mouth of the fish, keeping your hands safe from sharp teeth.

Model	Sizes, mm	Code
SL-YP05	162x53	18703870

## SL-YP09 Pliers NEW

These fishing pliers will make it easy to work with the smallest of split rings, and will also be useful if you need to remove the hook from the mouth of a fish. The pliers are made of strong and durable stainless steel and have practical, anatomically shaped handles which can be secured for the period when the tool is not in use. Also may act as a wire cutter.

Model	Sizes, mm	Code
SL-YP09	125x47	18703871

## MFP-01 Pliers

First and foremost, these are classic high-carbon steel pliers with a retracted working part for effortless hook extraction from the fish's mouth. There is a special hook at the end to unclench the split rings, allowing you to easily replace the treble hook on the bait. Also function as a clipper and have a gadgets for crimp tubes fixation for self-made wire leads. The spring-loaded handles can easily be operated with one hand and are equipped with ergonomic pads made of non-slip rubber.

Model	Sizes, mm	Weight, g	Code
MFP-01	178	137	18702743

# Lure Box

Lure Boxes are optimized for storage of baits and fishing accessories. They are made of practical plastic which can withstand moderate shock impacts and does not react with any other silicone. A broad range of models in different sizes and various combinations of inner compartments will help you select the box for the storage of almost any size baits.

## Profish Box

Functional organizer for baits and minnows of small sizes. It is a rigid two-sided case, solid plastic body of which protects the lures from damage during transportation. Four EVA padding strips on both sides of the case are secured with Velcro. They are adjustable for any size of bait. Internal silicone partition does not allow the lure to move across the box, get tangled between each other and scratch the coating.

There is a set of interchangeable dividers, that you can use to replace the worn out ones or add extra to your box.

### PRF-1914

19.8 x 14.3 x 3.3 cm

### Стрічка EVA для PRF-EVAT1

18703044

18.8 x 1.0 x 0.8 cm

## Reversible Box

A box for convenient storing and transporting minnows. The double-sided design and triangle compartments allow a large number of baits to be stored in the box. Moreover, treble hooks fit in a specialized socket and do not scuff the coating of the minnows. It has ventilation holes through which the moisture accumulated after fishing will evaporate preventing oxidation of the hooks.

Reversible is made of durable and elastic plastic, equipped with reliable lockers.

## Terminal Tackle Box

Designed to store a variety of fishing accessories and equipment elements: hooks, carabiners, swivels, split rings, etc. Due to the use of modern plastics, it does not lose its functionality for a long time and is easy to use. The Terminal Tackle Box series includes several models, each of which has its own advantages for storing various accessories.

## Reel case

Protects reels from impacts during transportation. Made of durable and practical polyester with inserts of soft foamed material.

Sizes, mm	Code	Number of coils
190x190x120	18701997	1
300x190x120	18701998	2

## Rod tube

Universal low-cost tube for rod transportation. Is extra thick at both ends of the tube to protect the rod from damages. Equipped with a zipper and a handle for easy use.

Sizes, mm	Code
110x7.5	18700094
120x7.5	18700095
130x11	18700902
130x7.5	18700096
150x11	18700903
150x7.5	18700097

## Gloves

Protect the skin from sun exposure or exposure to wind during fishing. Made of soft and elastic fabric that does not constrain the skin and absolutely does not obstruct the movement. Palms have a textured anti-slip coating for a secure grip on a rod while fishing.

# Sunglasses

Polarizing Select lenses are a combination of a stylish accessory and sun protection. Lenses with UV 400 fully protect your eyes against harmful UV radiation, and anti-reflective properties help you see more clearly everything that is under the water surface. The design of the glasses goes perfectly with the fishing equipment, and the choice of shapes and colors of the frames allows each angler to choose the perfect model.

The glasses are equipped with a cleaning cover for the lenses and a hard case with a carabiner.
