

HART

JAPAN

After 30 years inventing rods, Hart has gone one step further with the development of these jewels made in Japan. Built in high modulus carbon and equipped with the the best Fuji components, the MJ rod design has incorporated every little detail to meet the needs of the most technical and demanding anglers. Super lightweight sensitive and reactive rods, for an unbelievable fishing experience!!!

MJ LIGHT SPIN 80ML

This rod is ideal for technical spinning enthusiasts. The ultra-light, high-modulus carbon blank construction assures unrivalled sensitivity, accompanied by an incredible power reserve, making this rod simply perfect for technical fishing with small, lightweight lures of little more than 5 or 6 grams, achieving unbelievable casting distances.

Even so, this rod will stand up to everything and will respond perfectly on days when you need to fish with large minnows weighing more than 20 grams. All in all, it's the ideal rod for lightweight spinning and darting pros.

Blank made from 40 Tn high modulus carbon. Mounted with FUJI K SIC guides. FUJI TVS reel seat with custom carbon insert. Padded mesh rod bag.

MJ EGI 86M

Eging rod offering the perfect compromise between responsiveness, power and lightness. Its high modulus carbon blank features a progressive action that is perfect for working egi from 2.5 to 4.0, catapulting the lure to distances far beyond those achieved by other rods. Its extremely sensitive tip will let you feel even the gentlest of takes by squid and cuttlefish and, thanks to the great power reserve of its blank, you'll easily be able to hook and work your catch, no matter how big! Blank made from 40 Tn high modulus carbon. Mounted with FUJI K SIC guides. FUJI TVS reel seat with custom carbon insert. Padded mesh rod bag.

25S

To celebrate the 25th anniversary of HART, we've created a series of very special rods.

Combining the best carbons, great elasticity and high strength of 30 and 40 tons, Built with Fuji K series SIC guides, ion-plated frames, etc.

We've selected top-of-the-range materials to make an exclusive series, for the ultimate fishing experience!

25S IKA 83

25S OFFSHORE 9'

25S POPPING

25S IKA 83

Eging rod for even the most demanding anglers. The great power and progressive action of its high modulus carbon blank, added to its spliced-in tip, make this rod a real joy for eging enthusiasts. Capable of catapulting heavy 3.5 Egis in any fishing conditions while it can also detect even the slightest squid bites. Mounted with fuji k sic guides. Fuji tvstk reel seat with customised carbon handle. Padded mesh rod bag.

25S POPPING 7.10

Fighting tuna is child's play!

This popping rod is ideal for on-board spinning anglers, for fighting tuna. Being compact and lightweight, thanks to the use of carbons of up to 40 Tn, it's perfect for tough fishing. With its sensitive tip and Fuji K SIC guides, it's possible to cast small 20 to 30 gram spinners, when the fish are eating small anchovies. Yet, it can easily cast large poppers or stickbaits on those days when the water's boiling...

Impressive power reserve in the butt, something which is essential for tackling powerful tuna. Mounted with FUJI K SIC guides. FUJI DPS reel seat with a BACK STOP™ mechanism for the locking thread. Padded mesh rod bag.

series

BLOODY TATAKI 80

BLOODY IKA 83

BLOODY TATAKI 80

Eging rod specially designed for handling large egis and tataki rigs. The power and progressive action of its blank are smoothly transmitted to its sensitive tip, for perfect handling of egis from 2.5 to 3.5. Its semiparabolic action will help you combat even the largest squid, avoiding tearing. Mounted with FUJI K ALCONITE guides. FUJI VSSM/B+TVSK reel seat with carbon clamp. Padded mesh rod bag.

| DHBIK83 | 8'3" - 2.51m | 129cm | 2 | 8/25g | 129 | 2.0 - 3.5 | 159,00 |

BLOODY EGI 81

Lightweight technical rod for summer and autumn eging enthusiasts. Thanks to its progressive action and the exceptional sensitivity of its spliced-in solid carbon tip, this rod provides great bite detection for fishing baby squid in summer, while the exceptional flexibility of its blank and good power reserve allow for the perfect casting of small 1.2 and 1.5 egis during the summer and guarantee successful fishing of large-sized squid and even hard-to-catch cuttlefish in autumn. Tubular blank made from high-modulus carbon, featuring a moncoque handle and solid carbon hybrid tip. Mounted with FUJI K ALCONITE guides. FUJI VSSM/B+TVSK reel seat. Padded mesh rod bag.

| REF. | | | | | | | € |

BLOODY EGI TRS

NEW

Special rod for lightweight and medium squid drift fishing using the Tip Run technique. Perfect for fishing with egis of up to 4.0 with bucktail jigs weighing as much as 25 to 30 grams. Versatility, lightness and a great power reserve to easily handle good-sized squid with no tearing. Tubular blank made from 40TN high-modulus carbon, featuring an ultra-sensitive tip. Mounted with FUJI K Alconite guides. FUJI VSSM/B+TVSK reel seat. Padded mesh rod bag.

| REF. | | | | | | | € |

| DHBETRS68 | 6'8" - 2.03m | 100cm | 2 | 18/50g | 117 | Max 4.0 | 136,00 |

BLOODY EGI TIP RUN

Rod specifically designed for catching squid using drift eging, known as Tip Run eging. Use this rod to work 2.5 to 4.0 egi, often with an added lead weight on the head, so that they weigh from 30 to 40 grams. Thanks to the incredible sensitivity of its ultra flexible tip and the exceptional power of its butt, you'll get the perfect hookset, with no tearing of the squid during retrieve (you need to keep in mind that, for drift fishing, the current will pull you in the opposite direction to that of the squid...). Tubular blank made from high modulus carbon, featuring an ultrasensible tip. Mounted with FUJI K ALCONITE guides. FUJI VSSM/B+TVSK reel seat. Padded mesh rod bag.

| REF. | | | | | | | € |

BLOODY MATCH JIG

Because the classics never go out of fashion, this is the perfect speed jigging rod for working with 200 gram "bars". This single section rod is not excessively short and features a parabolic action and an enormous power reserve. With this rod, you can "fool around" for hours on end without putting too much strain on your back, scraping the bottom at depths of between 40 to 70 metres, seeking snappers, dentex gibbosus and other good size predators. 12 kilo maximum braking power at a 55° angle.

Blank made from 40 Tn high modulus carbon. Mounted with FUJI K ALCONITE guides. FUJI DPS reel seat. Metal gimbal butt Padded mesh rod bag.

| REF. | | | | | | | | | |
|----------|--------------|-------|---|------|-----|---------|-----|--------|--|
| DHBMAJ58 | 5'8" - 1.73m | 174cm | 1 | 200g | 5.0 | 30/50Lb | 292 | 172,00 | |

BLOODY VIOLENCE

An extreme jigging rod with super progressive action. Perfect for those who love to experience great sensations!

The construction of its high-resistance carbon blank and latest generation Fuji K rings gives it impressive action, being able to animate really heavy jigs at an astonishing speed.

Ideal for expert anglers for fishing in the Straits, Canary Islands and Tropical destinations.

15 kilo maximum braking power.

Mounted with FUJI Alconite K guides. FUJI DPS reel seat. Padded mesh rod bag.

| REF. | | | | | | | | | |

BLOODY SLOW JIG 64C

BLOODY BRAZIL SLOW JIG 65C

BLOODY BRAZIL SLOW JIG 63C

BLOODY SLOW ULTRA JIG 63C

BLOODY SLOW POWER JIG 63C

Single section casting rod designed for tough fishing using slow jigging. Its extremely powerful blank can easily work jigs of more than 300 grams. You can use this rod to fish at great depths or in places with a strong current where other rods are not up to the job...

Mounted with FUJI K ALCONITE guides. FUJI PTSMPJK reel seat with BACK STOP™ mechanism. Padded mesh rod bag.

BLOODY SLOW PITCH JIG 67C

Casting rod specially designed for vertical fishing in slow pitch jigging.

One-piece, extremely lightweight blank mounted with small, accurate Fuji guides, allowing you to work with jigs of more than 200 grams for hours on end, for guaranteed success when tackling fish. Mounted with FUJI K Alconite guides. FUJI PTSMPJK reel seat with BACK STOP™ mechanism. Padded mesh rod bag.

BLOODY SLOW JIG 64C

Casting rod specially designed for slow jigging. Its one piece blank, mounted with small casting guides, allows for hours of enjoyable fishing, and even lets you tackle large fish with no problem at all.

Mounted with FUJI K Alconite guides. FUJI PTSMPJK reel seat with BACK STOP™ mechanism. Padded mesh rod bag.

BLOODY BRAZIL SLOW JIG 65C

Super technical rod for vertical fishing with the slow & pitch jigging technique. Thanks to its innovative spiral or Brazilian guides, you can fight your catch with no problem of the line tangling with the blank, as the the guides that work the most during the fishing action are located under the rod. Mounted with FUJI K ALCONITE guides. FUJI PTSMPJK reel seat with BACK STOP™ mechanism. Padded mesh rod bag.

BLOODY BRAZIL SLOW JIG 63C

Ultra-tech casting rod for vertical fishing with the slow & pitch jigging technique, mounted with spiral guides (snake guides), allowing you to easily fight the big fish yet preventing the line from contacting the blank, given that the guides that take the greatest stress during combat are on the underside of the blank. Thanks to its powerful, parabolic action, you can easily handle jigs of up to 300 grams and fight the big fish. Its offset design makes it easy to transport in your car and, it can also be easily stowed in your boat locker.

Blank made from 40 Tn high modulus carbon. Mounted with FUJI K ALCONITE guides. FUJI PTSMPJK reel seat with BACK STOP™ mechanism. Padded mesh rod bag.

BLOODY SLOW ULTRA JIG 63C

Super lightweight casting rod with offset mounting for slow & pitch jigging fishing. Thanks to its parabolic action and good reserve of power, this rod allows you to easily fish for hours on end with lightweight and medium weight jigs and skirts. Mounted with FUJI K ALCONITE guides. FUJI PTSMPJK reel seat with BACK STOP™ mechanism. Padded mesh rod bag.

BOUSHIDO CARNA C72H

BOUSHIDO CARNA C75XH

BOUSHIDO CARNA C76XXH

BOUSHIDO CARNA

BOUSHIDO CARNA C70M

A sweet rod, yet with sufficient power reserve to fight even the largest bass. Ultra-precise casting and ideal for rapid explorations with medium sized spinners and minnows. Mounted with FUJI K ALCONITE guides. FUJI SKELETON casting reel seat with carbon clamp. Padded mesh rod bag.

BOUSHIDO CARNA C70MH

Extremely versatile casting rod for those anglers who appreciate quality yet with no complications. Fast regular action, sensitive yet powerful, ideal for jigs, spinners, Texas rigs and small cranks. Mounted with FUJI K ALCONITE guides. FUJI SKELETON casting reel seat with carbon clamp. Padded mesh rod bag.

BOUSHIDO CARNA C72H

Single section casting rod, specially designed for handling jigs. Its extra fast tip action and great power reserve will allow you to handle ½ and ¾ oz. jigs just how you like, feeling safe even with heavy 1 ½ or 2 oz. jigs.

It's also perfect for fishing with Texas rigs and scraping the bottom with large, soft swimbaits in search of the big fish.

Blank made from 40 Tn high modulus carbon. Mounted with FUJI K ALCONITE guides.

FUJI SKELETON reel seat with custom carbon insert. Padded mesh rod bag.

BOUSHIDO CARNA C75XH

A powerful rod with a marked tip action, allowing you to easily cast jigs of up to 3 ounces.

Perfect for enticing large pike with swim baits.

Ideal for Big Baits and Deep Cranks.

Mounted with FUJI K ALCONITE guides. FUJI SKELETON casting reel seat with carbon clamp. Padded mesh rod bag.

NEW

BOUSHIDO CARNA C76XXH

BACK STOP

This single-section casting rod is lightweight yet really powerful, with an apparently endless reserve. Perfect for fishing large pike and catfish from a boat or float tube. Mounted with FUJI K Alconite guides. FUJI PTS reel seat, featuring a BACK STOP™ mechanism for the lock nut. Padded mesh rod bag.

NEW

BOUSHIDO SWIM BAIT S80M

Spinning rod specifically designed for fishing with vinyl swimbaits. Thanks to the sensitivity of its tip and to its great power reserve, it is perfectly able to handle your soft swimbaits and to easily hook fish, even when the lure is rigged with a concealed texas rig. Tubular blank made from 40TN high modulus carbon. Mounted with FUJI K Alconite guides. FUJI TVS reel seat with custom carbon insert. Padded mesh rod bag.

BOUSHIDO FINESSE 71

Single-section rod, with normal-fast action for Finesse specialists.

Thanks to the sensitivity of its tip, you can work small vinyls perfectly, weighted or unweighted, minnows and other lures. Perfect for Wacky, Shaky or even drop shot.

You can even fish with a fine line, given that the sweetness of its blank will cushion the thrashing head movements of the fighting bass.

Blank made from 40 Tn high modulus carbon.

Mounted with FUJI K ALCONITE guides. FUJI TVS reel seat with custom carbon insert.

Padded mesh rod bag.

TORO CODE

This series of two-section spinning rods will help you to cover all the predator fishing requirements when shore and inshore fishing. Its fast, lightweight blanks, made from 24 and 30 Tn carbons, are perfectly adapted to the harshest lure fishing conditions. Mounted with lightweight Fuji guides, they will help you to long cast weighted vinyls and also minnows or light jigs. These rods can be used for all types of spinning, jerking, darting or shore jigging.

7M: The ideal rod for fishing with light, weighted vinyls either offshore or inshore.

8 MH: Mixed, for either boat or shore fishing.

9 MH: A classic for rock spinning.

10 MH: For beach spinning enthusiasts or for days with rough seas in the rocky areas.

Tubular carbon blank. Mounted with FUJI O Ring guides. TVS type reel seat. Cloth rod bag.

STAINLESS STEEL BB

CARNA

An innovative design to achieve a powerful, fast, lightweight metal casting reel. One piece aluminium body with built-in support arm and extra-strong graphite sideplates. Machined shallow aluminium spool. Stainless steel bearings.

Micro-click drag star with carbon discs and micrometric adjustment for extremely precise drag settings. 30-point adjustable system for magnetic cast control. 10 bearing technology: 1 infinite anti-reverse bearing and 9 stainless steel bearings. High quality stainless steel gearing and shafts.

Robust metal handle. Super ergonomic flat grips for greater comfort and power transfer during retrieve.

Access port on the side plate for fast spool changes.

MJ Braid PINK

PE 8X braided line, made in Japan, specially designed for eging. Perfectly rounded shape and smooth coating, achieves a fantastic cast with a nylon behaviour while going through the rings. Thanks to its hi-vis pink colour, you will be able to locate your line at all times, so that you won't miss a bite.

Supplied in 150 m spools. Pack of 6 spools.

Price per spool.

MJ Braid MULTICOLOR

NEW SIZES

PE 8X braided line, made in Japan, specially designed for light and medium vertical fishing in slow jigging, pitching or controlled drift fishing. Its coating ensures that it glides extremely delicately through the guide rings, even under maximum tension, avoiding annoying whistling when working the fish. Thanks to the colour change every 10 meters and its line marking at one-meter intervals, you get total accuracy when sinking your lure, allowing you to fish in the right depth range.

Supplied in 300 m and 3600 m spools. Pack of 6 spools.

Price per spool.

MJ 100% FLUOROCARBON

100% fluorocarbon line, made in Japan, featuring some outstanding qualities. Its refractive index makes it completely invisible underwater.

The special structure and polymer chain framework achieved during the extrusion process give this line optimal elasticity and a supple and malleable touch when tying terminal tackle or lures as well as great impact absorption during the hook set and when fighting fish.

Perfect and steadfast for saltwater and freshwater alike.

Supplied in 50 and 100 m spools. Pack of 6 spools.

Price per spool.

INVERT

Next Generation Fishing

LURES TECHNOLOGY

T-BALLS

Tungsten balls, an ideal material for distributing weight in a lure, providing each with its own swimming action.

BLACK NICKEL HOOKS

Extra-strong and light hooks with great effectiveness and resistance to corrosion.

SALTWATER HOOKS

Extra-strong hooks (1x to 4x) with soldered finish resistant to marine erosion. Specially designed points to not scratch the lure.

MOBILE BALLS

Mobile balls that move to the rear of the lure to facilitate the casting action, helping the lure to be thrown further.

MAGNET

Magnetic weight transfer system to achieve a perfect cast and balance.

MOBILE PISTON

Mobile piston that multiplies the lures inertia when casting.

OVAL FLAT RING

Extra-flat stainless oval ring.

3D LASER EYES

Three-dimensional eyes with shiny effect.

G-BALLS

Glass balls with rattle effect.

Anti-obstacles cutting system thanks to the abrasive fiber blade.

Swimming balance fixed weight.

Exclusive cutting system to protect the bait from hooking in grass.

DESIGNED BY

Mark Hart

INVERT JERK BAIT 110

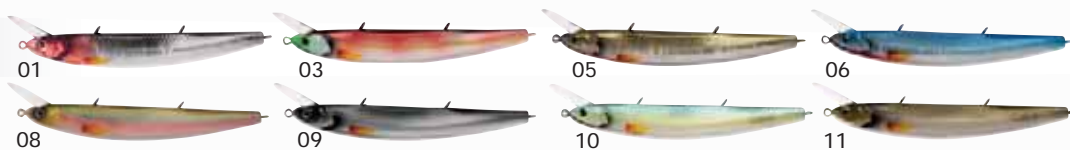

Lightweight, streamlined jerk bait with an outstanding casting distance thanks to its internal ball weight transfer system. A medium-sized lure set to delight predator fishermen.

With its realistic swimming and suspended action, working it with a few short jerks, accompanied by 2 to 3 second pauses, will provoke ferocious attacks.

During line retrieval, it offers a tight rapid rolling movement accompanied by a slight rear wobbling, making it irresistible. It is equally effective with inland predators (black bass, etc.) and with elusive sea bass.

JERK BAIT 110

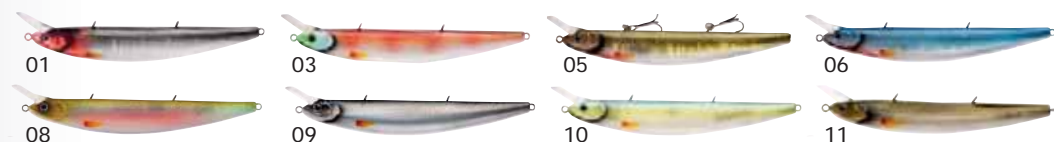

INVERT JERK BAIT 130

JERK BAIT 130

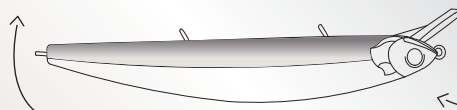

Lightweight, streamlined suspending jerkbait with outstanding castability thanks to its internal ball transfer system. During line retrieval it has a frantic swimming action with tight rolling accompanied by a slight wobbling. Expert fishermen leave it motionless, suspended in mid-water for a few seconds, then give a sharp twitch to awaken the predatory instinct of even the most wary bass. It is also a deadly lure for bass at river mouths and estuaries.

In nature, the weakest is the one who first ends up in the predator's jaws. Ill or wounded fish tend to float upside down and predators are aware of this....

INVERT LURE CONCEPT

The colours of the flank and belly have been inverted in order to imitate a dying fish.

Inverted design to simulate a wounded fish, floating belly up.

Inverted position of the eyes and mouth to make it more realistic.

INVERT POP 105

Small popper with a high specific weight and great castability. Featuring a rapid tight walking action, including splashing... puff!!!

The swimming response is immediate, right from the very first jerks to the rod, it starts a zigzagging that proves irresistible to all kinds of predators, in fresh and saltwater alike.

An absolute must for the summer months and shallow waters.

POP 125

INVERT POP 125

Popper with a high specific weight and great castability. Its resting position in the water, with its tail underwater and its head out of the water, rapidly changes with the first jerks of the rod, with a perfectly controlled zigzagging action that is set to attract even the most inactive predators.

Perfect for prospecting in wide water areas, in freshwater and saltwater alike.

JERK-M 92SP

Small suspending jerkbait offering great castability despite being lightweight.

Easy working in line retrievals, where the lure offers a rapid, tight rolling motion, accompanied by a slight rear wobbling. Really deadly if worked with slight jerks, stopping for a few seconds, then starting again... A guaranteed bite!

DOUBLE WISHER 100F

This stylised propeller features two blades, one on the tail and the other on the head, frantically splashing water to attract its targets. When fishing in very open areas, these splashes will even be captured by fish from a long distance away. The best way to work it is with a jerking movement with short stops, although it will also work perfectly in line retrieve. Ideally, alternate different types of movement to see how the fish react.

OKASHI 30S SOLID

Small minnow designed to catch fish in very harsh conditions. Ideal lure for common river trout, pike, walleyes and rainbow trout in stocked areas.

During line retrieve it perfectly maintains its swimming depth.

The OKASHI 30S is a micro sinking minnow with a solid body. It looks just like a real baitfish and features a very tight action. Despite its small body, its thick lip makes for a smooth start to the swimming movement.

Sencho 95s

As it can move its triple tail towards its belly, this sinking pencil offers an alternative use as a bait with magnificent castability or for vertical fishing or drift fishing from a boat.

For vertical fishing (triple on the belly) when sinking it will shake from side to side in order to attract the largest fish in all water levels.

For casting (triple on the tail) the jerking action combined with small twitches generates a swimming action that is characteristic of a wounded fish, attracting large predators.

NEW

Powerful sinking pencil, ideal for fishing on really windy days, thanks to its high specific weight and great castability.

Its jerking action combined with small twitches generates a swimming action that is characteristic of a wounded fish, attracting large predators.

Its tight wobbling during line retrieval is ideal for fishing in shallow waters.

Designed to be the definitive bait for prospecting wide, unknown fishing areas. Offering great castability thanks to its internal weight transfer system. Immediate dog-walking with small twitches, with the possibility to change it to skating by lengthening the twitching, so that more water is covered and more fish are caught. With its realistic 3D eyes, gill plates, scales and excellent paintwork, this lure is set to become a favourite in your fishing box.

MAGNET

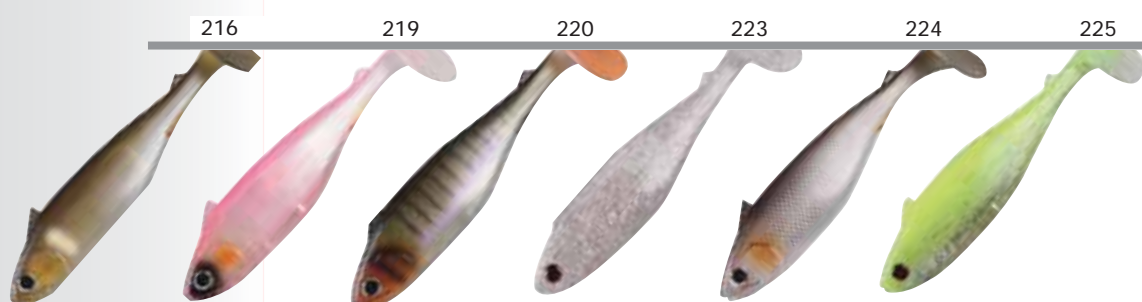

A lure with a "magnetic" power of attraction!

This powerful vinyl swimbait has a hidden hook, stuck to a magnet. While swimming, the hook remains hidden in its body and, when the hook is set, it comes out of a slot in the shoulder and you can work the fish perfectly. The swimming action, even at really slow retrieval speeds, is really realistic, perfectly imitating a small baitfish.

Basses and pikes will be unable to resist its charms.

UV

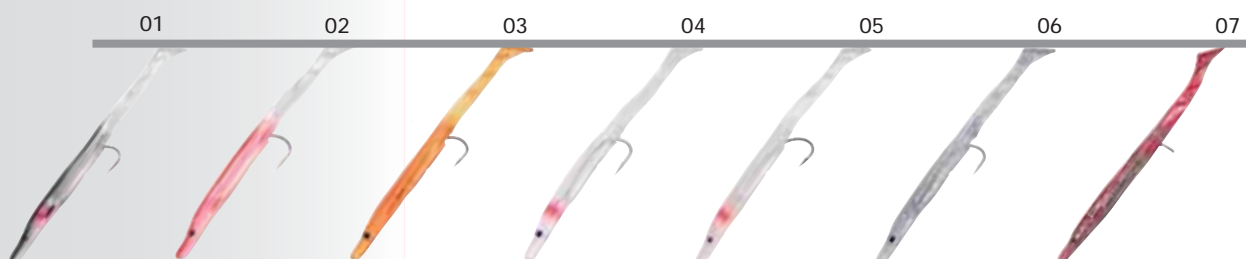

X-GILL

Lure of proven effectiveness, for casting and trolling alike.

Its design and swimming action attract sea and fresh water predators. The red and orange tones give the best results for fishing on the surface (up to a depth of 3m on cloudy days and 5m on clear days). Clear, natural tones are more suitable for cloudy days, deep or turbid waters.

Minnow specifically rigged for dart fishing. Its sharp, triangular head turns the jerks into a spectacular zigzagging that is so characteristic of this type of fishing. The shape of its tail and the stiffness of the material are essential for this type of fishing. Rigged with a triple ventral hook, for successful bites, time and time again.

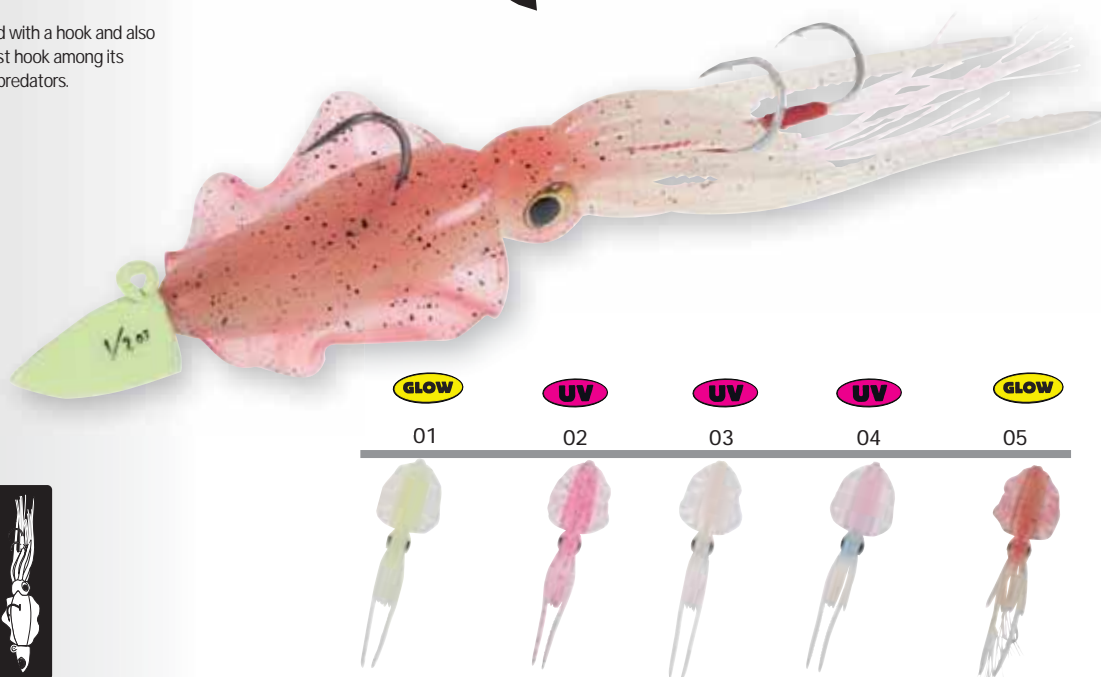

DARTY-M

This squid has a extremely realistic movement. Perfect for vertical fishing and drift fishing, for spinning fishing. The undulating movement of its fins and tentacles makes it an extremely attractive prey. Rigged with a sharp weighted head with a hook and also featuring an additional double assist hook among its tentacles to set the bites of large predators.

REMORA

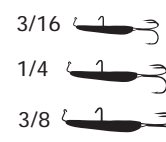

REMORA

This ingenious system is the modern version of the classic Drachkovitch rig for dead fish, but adapted for rigging with vinyl shads.

It consists in a weight that needs to be mounted in the vinyl's belly, anchored on two parts (to the lip and the paunch) and rigged with a rear triple to multiply the effectiveness of the hook hold.

As the weight is mounted on the vinyl bottom, you get greater mobility and a more natural action compared to the classic jig head rigs, ensuring better bites and losing fewer catches.

It is available either rigged on vinyl or separately.

MANOLO

HART

Designed in collaboration with Sergio Longas and Rubén Tarazona, the Hart MANOLO & Co is an innovative lure that creates the illusion of a school of baitfish. Its extremely simple design means that the lure is surprisingly lightweight and easy to move.

● MANOLO & CO

A simple and effective lure for continuous retrieves. Its attractive paddle tail movement is sufficient to entice prey fish in any situation.

● MANOLO underspin

We've included another blade under the belly of our manolo, adding the vibrations of the rotating blade tail to make the lure even more lifelike, creating a deadly combination.

● MANOLO naked

The "unaccompanied" version of the classic Manolo. An extra soft vinyl shad with a realistic swimming action that perfectly mimics a baitfish.

Tx

An innovative ultra-soft vinyl shad with a mobile Texas rig. The texture of its body, together with the inverted triangular shape of its head gives it an extremely lifelike swimming action. The wobbling produced by its powerful paddle tail, together with the rolling action afforded by its sharp head shape and triangular body, even at slow retrieval rates, make it a foolproof lure for the elusive sea bass, even on difficult days with a calm sea. Rigging with a specific Carolina hook for each particular size, offers the possibility of fishing by scraping the bottom of even the most tortuous beds, whilst minimising lure snags.

TX MAGNUM

This powerful vinyl shad rigged with a mobile Texas is set to become the star of deep waters. "Veracious predators" will be unable to resist its lethal movement produced by the wobbling of its paddle tail combined with the slight rolling action afforded by its sharp head. Fish by letting it drop to the bottom and then use continuous "ripping" movements. Thanks to the Texas rig, you can take risks yet minimising lure snags, even in the roughest beds.

80/120

J-FRANK

This blade-tail is a perfect hybrid with the body of a vinyl shad, a leaded head with a mobile hook and a large paddle for a tail. The perfect tandem: the attraction and life-like design of the vinyl plus the vibrations of the rotating paddle. Ideal for fishing in retreats with the pendulum technique. Equally effective with long casting and linear retrievals.

EEL

It comes in the shape of a small Sandeel, with dorsal and caudal fins, a ribbed body and a paddle tail providing vibrations, rolling and an extraordinarily lifelike movement. The Absolut Eel has a high-density vinyl injected bone, to provide strength, and a high gloss internal strip to simulate the eel's innards. Rigged with the jig head, this is the ideal vinyl for tackling sea bass.

SB DUSTER

This spinner bait is constructed with a fine but resistant wire, a Colorado and Willow blade. Its weight is distributed between its small head and body. Its long arm hook makes biting far easier. The long, bushy skirts produce extraordinary vibrations, maximising attacks by bass, driven to the river banks on exceedingly windy days.

SB DUSTER

PREDATOR-X 125

Fast sinking jerk bait with a high specific weight and offering a great casting capacity in any situation, even with a headwind. During line retrieval it features quite a pronounced rolling action and clings perfectly to the water, even from a height, thanks to its balanced internal counterweights and the shape of its powerful lip. It withstands fast jerking, becoming frantic and erratic, yet always maintaining composure and stability in the water. Perfect for fishing in rocky areas on days with a heavy sea, or for fishing from high spots.

PREDATOR-X 11 37 265 450 493 497 506 PS WF

SHL

This small jig-minnow has an exceptional weight for its small size. It's cast like a sinker, with a very fast dropping speed. Perfect for scraping the sandy bottoms from the boat or for fishing around rocks and rip rap on rough sea days.

SHL 37 265 495 497 506 546 547 548

OMOI

A real heavy weight, with spectacular casting in any conditions, thanks to the perfect balancing of its large fixed internal counterweights. During line retrieval, its smooth rolling action becomes frantic and erratic, like a wounded fish, aided by the angler's jerking. This provokes the immediate attack of predators.

OMOI 11 265 490 491 492 493 494

PEJE 113S

This powerful jerkbait features an extra fast sinking action and is set to become our best friend when attracting fish in deep waters that are quite a distance away. Its perfectly balanced 50 grams with its fixed internal counterweights helps to catapult it like a rocket. Perfect for stop-and-go line retrievals.

SEX PISTON

Powerful floating jerk minnow featuring an internal mobile piston guided by a spring. Thanks to its mobile piston system, it can be cast very long distances, even in the worst conditions.

It is extremely simple to handle, given that in straight retrieves it has a marked rolling accompanied by a powerful wobbling. When this movement is used together with small stops and light flicks of the wrist, it becomes the natural enemy of sea bass.

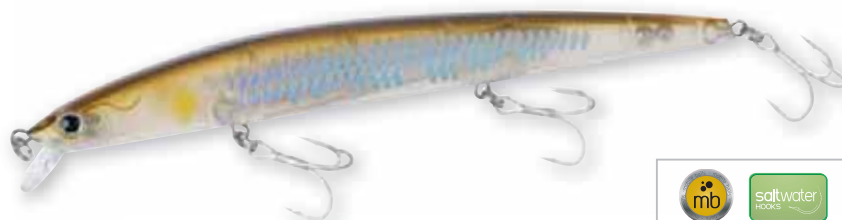

SEX PISTON 659 660 661 662 663 664

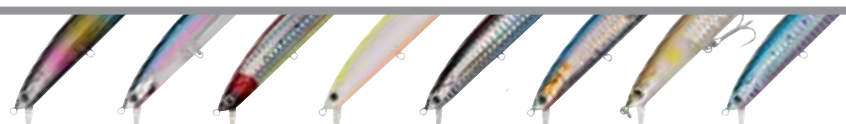

P.GASTI

Stylized and powerful Jerk Minnow, featuring a large internal magnetic weight transfer system. Spectacular launching, even with side or head winds, when other lures are impaired by the dreaded "helicopter" effect.

During line retrievals it features a highly pronounced front wobbling motion, making it an appetising morsel for the great wolves lying in wait at the breakers.

P.GASTI 054 405 495 518 567 570 662 B055

SLAM

Medium sized jerk minnow featuring some powerful internal balls for great long distance casting, even against the wind. It can be used to entice pike and bass near the coastline as well as the elusive sea bass, for either shore or boat fishing.

Featuring a marked wobbling action, accompanied by slight rolling, it can be used for straight retrieve accompanied by short pauses or with a light jerking action.

SLAM 030 265 276 492 495 662 B055

BULLET 95S

Small stick-bait with a sharp body. Thanks to its large internal counterweights and its streamlined design, it offers great casting power. Its sharp profile gives it a rapid, erratic sub-surface walk, capable of enraging and attracting even the laziest predator. Sea bass, mackerel and small tuna fish will be unable to resist its attraction.

BULLET 95S 006 007 012 019 265 652

TORITO

This small yet heavy pencil is set to be a nightmare for tuna on those days when they feed on small fish. Its interior is reinforced with a 50 lb continuous steel rod to allow it to withstand even the most powerful onslaughts. Its high specific weight means that it casts perfectly, even with heavy popping rods.

TORITO 12 30 405 495 497 506 CH G26 J569

TORO

TORO XH

TORO - TORO XH

TORO. Bulky, sturdy sinking pencil, designed for hunting the powerful Atlantic blue fin tuna. Tapered shape, heavily weighted to make it easy to cast over long distances even in adverse weather conditions. Reinforced body and powerful triple hooks to help take on even the largest tuna. To work it at its best, use small jerks alternating with short pauses.

TORO XH. A weightier version of Toro. Thanks to this increase in weight, you can increase the casting distance by almost 10 metres or use it with more powerful equipment when fishing for bigger fish, whilst maintaining a nice sub-surface walking action.

TORO- TORO XH 12 495 CH G26 J569 P056 S675 S676 S681 T583

MANAGATSUO

Popper with an over-sized head, producing outstanding water displacement with considerable turbulence and a great deal of splashing. Its special morphology, with the weight shifted to its tail, makes it great for long distance casting. Rigged with triple, reinforced hooks to withstand the brutal attacks of tuna and tropical fish.

MANAGATSUO J569 N407 N420 S676 T535 WF

Surface Vision 115F

A walker with a fast walking and sliding action. Spectacular casting, thanks to its design and to its internal round moving counterweights. It floats almost vertically in the water, quickly responding to the angler's jerking with a short, tight walking action.

SURFACE VISION 115F 037 079 265 G26

Spyder Crank

Innovative cranks with a coffin-shaped lip and skirts on the tail.

DEEP RUNNER: Perfect for deep fishing, its tilted swimming position, with the lip facing downwards, makes it easy to work, right on the bottom.

MEDIUM RUNNER: for frantic action in mid-water or just under the surface to tempt bass close to the bank or near areas of vegetation and submerged structures (walls, etc.).

SPYDER CRANK AL AY CB CS HC

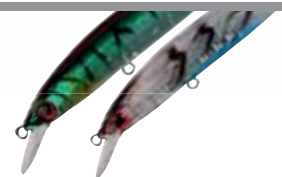

SMG

Enticingly shaped jerk with huge red eyes. Thanks to its internal spherical counterweights, it delivers exceptional casting, even on windy days. It features a pronounced, slightly delayed, wobbling action, accompanied by a subtle rolling, behaving like a weak, wounded prey fish ... the ideal food for any predator.

SMG S639 T538

SECATOR

SECATOR is no conventional chatterbait. Rigged with a reinforced hook and an exceedingly strong internal frame. Designed for fishing at depths of more than 2 metres, given the fact that it's far heavier than a traditional chatterbait. Surprising casting distance. SECATOR: a lethal weapon for tracking pike, bass and perch in the deepest grassy areas.

Matesito 60F

Lightweight jerk-crank with a long shank and frantic swimming action. Its swimming action and lowered head allows you to explore even the steepest beds, luring bass out of their hiding places.

MATESITO 60F 174 M050 M055 M073 SH376

Chippie

Pretuned for saltwater casting or moderate trolling, it features incredibly sculpted detail, lifelike prismatic eyes, and ultra-sharp corrosion resistant hooks. Full chart of highly realistic colours available with holographic and fluo finish. Saltwater Extra Strong (2X) hooks. Round shape stainless steel flat rings. High-density Tungsten sinkers.

CHIPPIE 10 45

SKIN BAIT

Ultimate technologies used by squid fishing lures have inspired the HART SKIN lures, covered with a cloth layer. This cloth skin can be printed and treated in a more realistic way than the traditional painted hard plastic lure. Due to its woven construction, SKIN allows it to be impregnated with long lasting flavours and scents, increasing again its attractiveness for predators.

POP-A-LOG

Noisy and irresistible, it is made from strong Jelutong hardwood - as all our HART "woodies" series- with thru-wire construction to ensure its lasting effectiveness, fish after fish.

Rigged with Extra-Strong (4X) Saltwater Tinned treble hooks. Stainless steel super strong rings with 3 loops.

POP-A-LOG L19 L20 S07 S13

TUNNUS

Powerful, floating pencil popper, with a heavy, rounded body. Although bulky, it has quite a tight walking action and perfectly responds to powerful popping rods. Perfect for tempting large surface tuna when the water is "boiling" under the aviary..

TUNNUS S626 S630 S634 S696

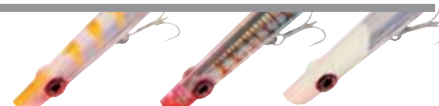

UMA

This powerful skipping lure offers exceptional casting thanks to its weighted tail and its aerodynamic shape. It's normally handled at high speeds, skipping across the surface of the water, causing frantic attacks by predators. It can also be used as a "Normal" walker with a smooth "walking the dog" motion. Highly effective and versatile.

SEURU

Though its centre of gravity is in the middle of this small jig, it offers an excellent flight distance and stable swimming action during continuous line retrieval. It offers the best performance in vertical fishing, when sinking and working it with the ripping technique.

SEURU 01 59 70 71 72

REAL-A

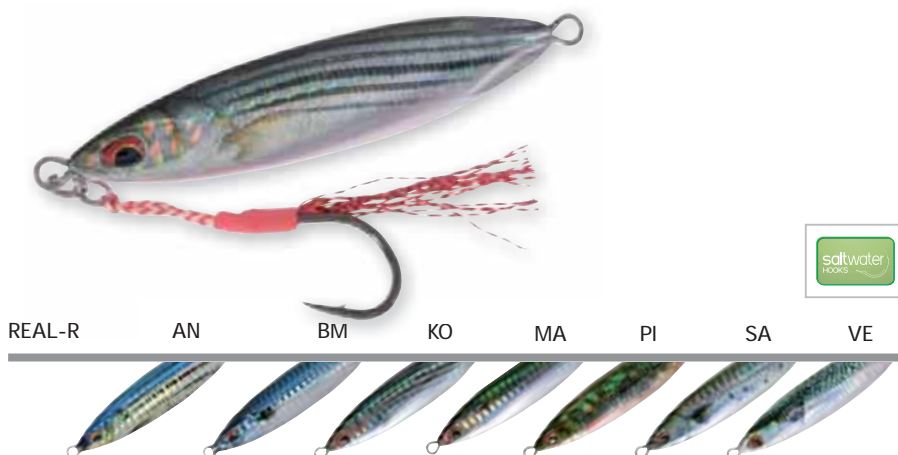

This small asymmetrical jig is perfect for light slow jigging and can also be used for casting. Thanks to its peculiar shaped body, it has an erratic fall that is really characteristic of a small wounded fish, driving predators crazy. Rigged with a front assist.

REAL-a AN BM KO MA PI SA VE

REAL-R

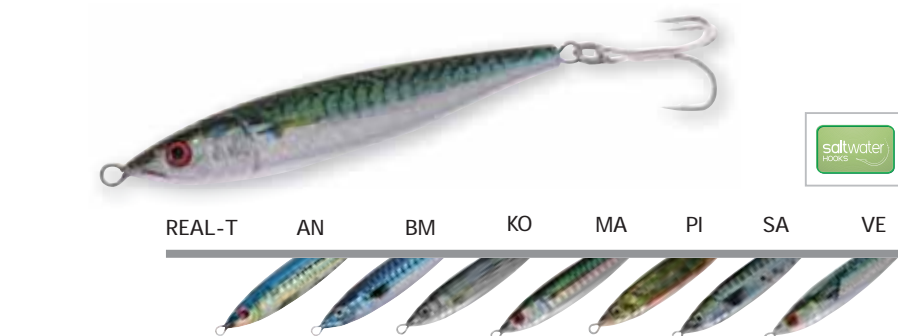

This small, asymmetrical jig is perfect for enticing predators, either casting or vertical fishing. For casting, use lineal retrieve interspersed with stops, or ripping retrieval. For slow jigging fishing it will drop slowly, like a wounded fish, retrieving it with rhythmic jerks of the rod to provoke the ferocious predators. Rigged with a powerful front assist hook.

REAL-R AN BM KO MA PI SA VE

REAL-T

Jig in the shape of a small fish, perfect for casting. Handle it by giving light jerks of the rod, alternating with short stops in which you let it drop erratically towards the bottom, and then repeat the jerks. You need to be very alert, because many bites are made as it drops down. Rigged with a powerful rear triple hook.

B-RUNNER

Perfect jig for those who want to start in the productive and fun modality of slow jigging. Its teardrop shape with centered weight and its asymmetric body give it a lethal swimming for predators. It is supplied rigged with an assist in head and tail.

B-RUNNER 2082 2083 5020 BG PG SG

X-DART

Teardrop shaped jig, short and asymmetrical, perfect for our slow pitch jigging fishing. Balanced weight in the center and perfect reaction to the movements of the tip of our rod. Supplied unriggered, it is recommended to rigged with an assist in head and tail.

X-DART 5009 5020 5021 BG PG PUG

CYBORG

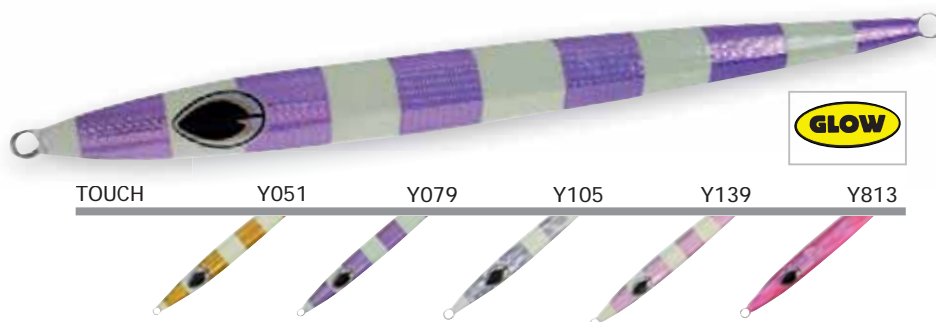

Specific jig for the practice of slow pitch jigging. Its teardrop shape with centered weight gives it a perfect balance and its lateral asymmetry gives it an erratic movement, very provocative for predators. Supplied unriggered, it is recommended to rigged with an assist in head and tail.

CYBORG 2075 2196 PUG

TOUCH

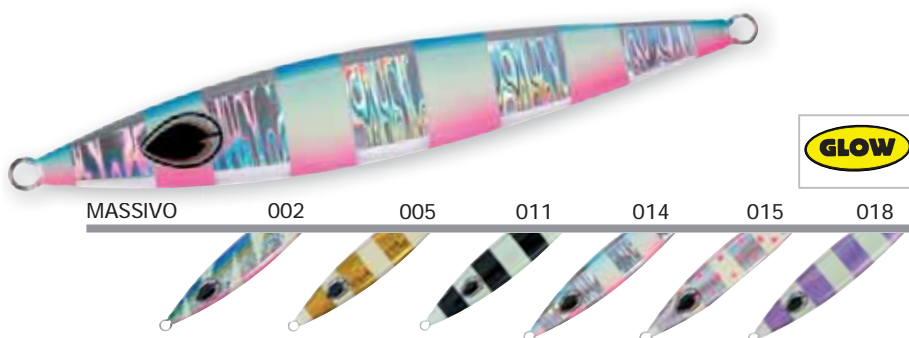

This sleek slow jig is perfect for high pitch techniques. Its elongated, asymmetric shape means that it drops very quickly and erratically and that its side movements, in response to our jerks, are ample, covering a large amount of water when fishing with it. It demonstrates great effectiveness at times of much fish activity and is perfect for spots with strong currents. Sea bream, red snappers and groupers are its preferred prey.

TOUCH Y051 Y079 Y105 Y139 Y813

MASSIVO

Powerful, asymmetrical slow jig, with an intermediate shape between the "tears" and "long jigs". The quill on its belly makes it asymmetrical and gives it a fast, erratic, zigzagging fall. Perfect for fishing in deep places with currents, large predators such as pink dentex, amberjacks and groupers.

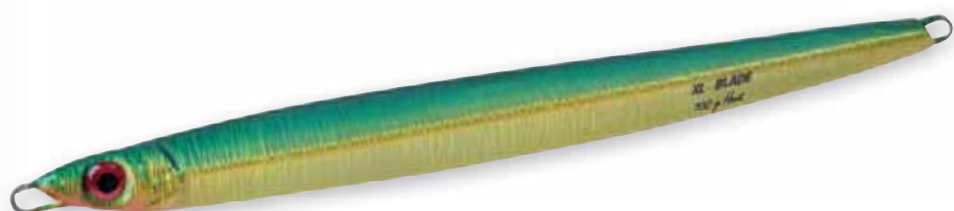

MASSIVO 002 005 011 014 015 018

XL - BLADE

Our XL-BLADE jigging lure shows an amazing dart action when one-pitch jerking. Its asymmetrical delta-shaped body ensures fast diving and winding-by-jerking speeds. Its sharp nose reduces water resistance to movement. The laser layers on the body generate attractive reflection even with little light.

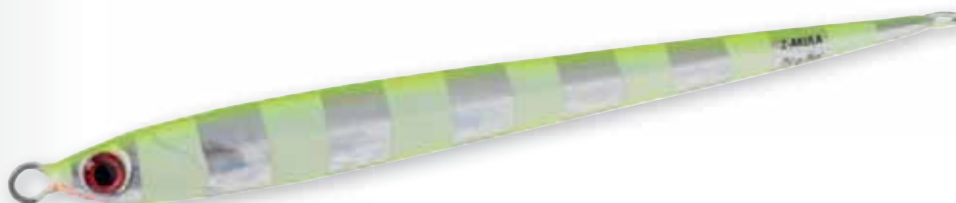

XL-BLADE 001 005 2075 2092 5060 SB04

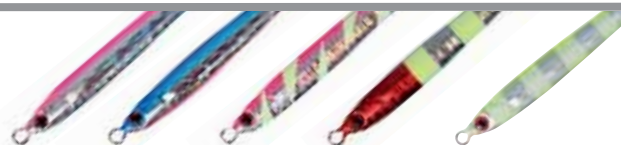

Z-AKULA

The needle fish shape of the Z-AKULA lure enables it to descend rapidly; even in areas with a strong current it reaches great depths. When tugging on the line, the asymmetric distribution of weight in the Z-AKULA generates an irregular action, which draws the attention of predators.

Z-AKULA 2024 2092 5016 5048R 5060

X-WEEPY

X-WEEPY's unique tear-drop shape causes an amazing irregular action, looking as if it were escaping from predators, stimulating attacks even from low-active targets. It is attractive to big ones that live in the depths.

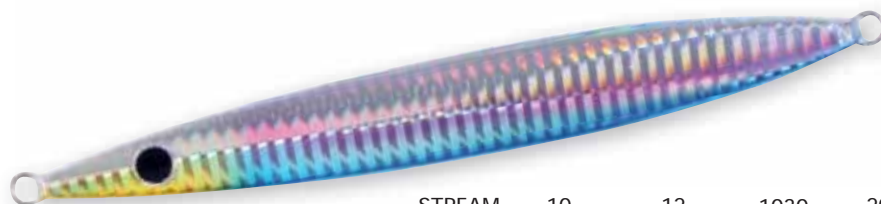

X-WEEPY 2024 2092 5016 5060

STREAM

Jig with an innovative, asymmetrical Japanese style design. Specifically designed for rapid fishing at great depths. Thanks to its sharp hydrodynamic shape, it can be rapidly and easily moved close to the bottom, for hours of effortless fishing.

STREAM 10 12 1030 2024

INCHIKU 30-06

This Inchiku or bullet jig is like a bullet equipped with a vibrant vinyl tail rigged with an Asari Double Assist Hook.

It does not sink straight down like a conventional jig, but gradually glides down. Retrieval is more horizontal than vertical. When sinking down, the skirt folds over the bullet and, when coming up, it remains underneath, generating an irresistible action for predators.

Lure retrieval must be slow and paused, interspersed with a brief, light wrist action.

INCHIKU 30-06 01 02 03 04

ASSIST INCHIKU

Extra strong Assists to strengthen the power of your INCHIKUs when dealing with more powerful prey. YGK Japanese braided line and Asari Francky hooks.

ASSIST INCHIKU 01 02 03 04

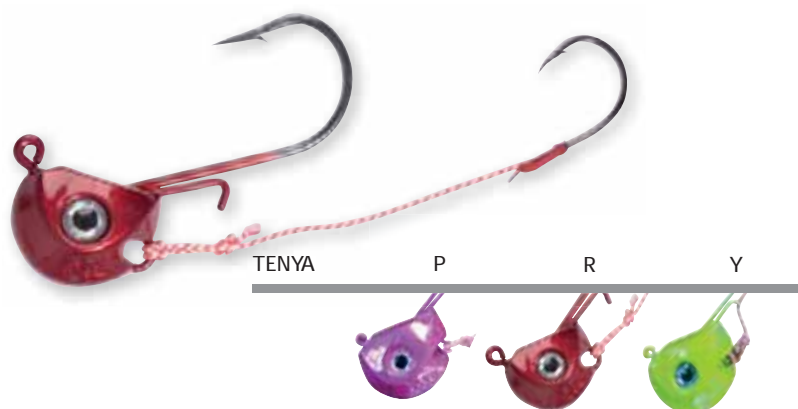

TENYA

Lure design according to a centuries-old fishing technique practised in Japan. It is based on the handling of natural bait (normally a prawn) as if it were an artificial bait.

To use it, mount the bait (prawn or small squid) on the fixed hook and with the assist hook secured to the head.

Thanks to its tapered shape, our Tenya is perfect for vertical fishing, making the most of the drifting of the boat. Let the lure drop to the bottom, lifting it with long, smooth jerks and then leaving it to drop down again.

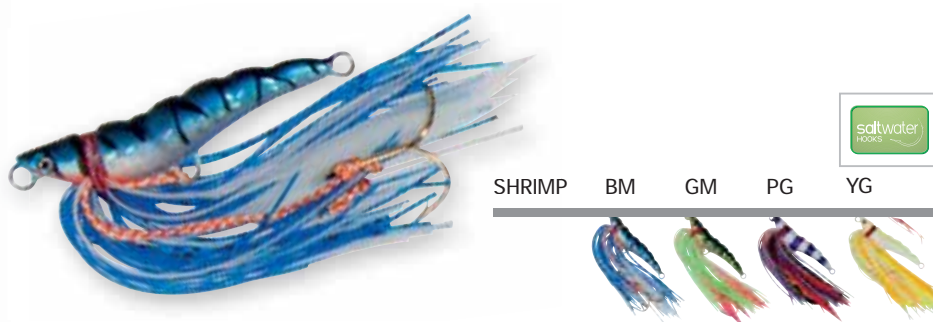

Sea bream, dorados, white sea bream, haddock and bottom fish are the main prey.

TENYA P R Y

SHRIMP

A life-like prawn-shaped weighted lure. A cross between the traditional jig and an Inchiku, featuring skirts and rigged with a double assist. Perfect for tempting amberjacks and sea bream, working slowly and alternating with sharp tugs from time to time. Simply deadly!!

FLAT FIGHTER

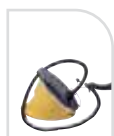

NEW

Hybrid float tube made from 1,200 denier PVC. Reinforced with an additional PVC sheet to prevent damage on the surface and for enhanced strength and durability. The float interior comprises a rigid polyester mesh that retains the air, gives body to the structure and prevents it from rounding out like a ball when inflated. In this way the float is much less bulky and offers more usable space than conventional ones. Thanks to this construction, the float tube can be inflated at a greater pressure than a standard PVC float, up to a maximum of 15 Psi (1.03 bar). All these features combined give a float tube that is sturdier, faster and easier to navigate, with a greater loading capacity than a standard PVC float. It is equipped with a high-pressure seat, large capacity rigid PVC pockets, aluminium reinforcement bar and oars. It also features a rear mount for an electric motor and keels for improved stability and manoeuvrability. Supplied with a high-volume foot pump and carry bag.

160 CM.

THE SIKKARIO V-SAIL

Innovative float tube made from heavy-duty PVC with reinforced, heat-sealed seams.

Manufactured with HART PVC-BYLAYER technology that incorporates a 1000 denier polyester inner lining that enhances its strength and durability.

Thanks to its truly innovative shape, with a longer and more pointed bow than a traditional float tube and the fact that it is also equipped with a powerful keel in the front, the travelling speed is far greater than other floats, given that it has a much more streamlined shape and a much higher length/width ratio.

It is equipped with a high-pressure 12 centimetre floor (50% thicker than a traditional float tube) that is bonded to the bottom of the tubes, giving it a completely flat base that glides rapidly through the water. You'll get to the fishing spots much earlier, having more time to fish and, therefore, getting more catches.

Its two large padded side pockets allow you to conveniently carry all your bait and accessories.

It features 2 reinforced handles (2 on the tubes and 1 on the bow) making it easy to carry from your car to the water and back again.

It includes sports paddles finished in black aluminium, for enhanced performance.

Supplied with a high volume foot pump, carrying bag and front net.

max
Kg. 210

Kg. 13,35

THE SIKKARIO X-TUBE

Constructed from high strength PVC with reinforced, heat-sealed seams.

The HART PVC-BYLAYER technology incorporates a 1000 denier polyester interior coating that enhances its strength and durability. High-pressure seat and floor.

2 valves located in the rear of the tubes, freeing-up the front part to easily mount the probe and other accessories. 1 valve for the seat and 1 valve for the floor. It comes with 3 waterproof pockets made from PVC. Two 500x230x150 mm side pockets and a third 380x230x240 mm tapered pocket that is mounted in the front part of the float tube.

This pocket is intended to store bulky items that are not used when fishing. The float tube is equipped with a torpedo electric motor support on the bottom. It features three reinforced handles for ease of transport: 2 on the tubes and 1 on the front.

It also includes padded backpacking shoulder straps to comfortably carry it on your back for longer journeys.

It includes oars finished in black aluminium, as is the front stabilizer bar.

Supplied with a high volume foot pump, carrying bag and front net.

max
Kg. 200

Kg. 15

REF. YHKXT 595,00 €

THE SIKKARIO X-BLACK

Third generation of the mythical Sikkario, which includes a number of improvements.

Constructed from high strength PVC with reinforced, heat-sealed seams. The HART PVC-BYLAYER technology incorporates a 1000 denier polyester interior coating that improves its strength and durability.

High-pressure seat and floor.

2 valves located in the rear of the tubes, freeing-up the front part to easily mount the probe and other accessories. 1 valve for the seat and 1 valve for the floor.

It includes oars and a front stabilizer bar now in black aluminium, bringing a touch of quality to the design.

2 improved large velcro-positionable side pockets and new oar lock position, to be easily adapted to the size and taste of each user so that rowing is always comfortable.

It features 3 reinforced handles for ease of transport:

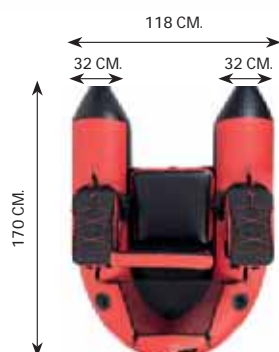

2 on the tubes and 1 on the bow. It also includes padded backpacking shoulder straps to comfortably carry it on your back for longer journeys. Supplied with a high volume foot pump, carrying bag and front net.

THE SIKKARIO X-FAST

NEW

The float tube for those who are looking for one that is lightweight and easy-to-handle yet still maintaining the quality and features of a SIKKARIO. Its design is similar to the other SIKKARIOS yet without the rigid floor, to make it more lightweight. The right height and fishing position are maintained thanks to its 16 cm thick raised seat.

The X-Fast is designed for those anglers who enjoy "being high up" or who are going to add an electric motor so that they can be first at the fishing sport. With this in mind, the oars have been eliminated and a motor mount has been added to the bottom of the float tube.

Supplied with a high volume foot pump, carrying bag and front net.

max
Kg. 170

Kg. 12

REF. YHKXS 420,00 €

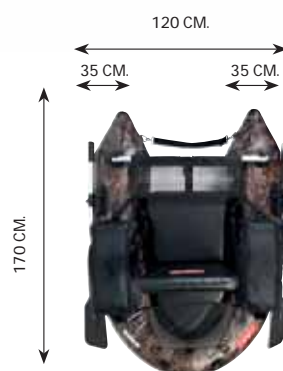

THE GUARDIAN

Float tube made entirely of 1000 denier PVC coated polyester. The thickness of its covering is over-sized, up to 1.1mm (compared to the 0.7 mm of standard float tubes) and it comes "tattooed" with a nice camouflage. This thick skin affords excellent protection against snags, tears and punctures. The tubes have been over-sized at the front, up to 35 cm in diameter, thereby preventing the "tips" from sinking. This achieves greater floatability to this part of the float, when leaning forward during the fishing action. Its large side pockets are spacious enough to easily load all your bait and accessories.

It comes with a high pressure floor for enhanced floatability, oars and a front aluminium bar for improved handling of large fish.

Supplied with a high volume foot pump, carrying bag and front net.

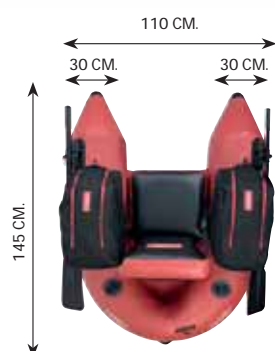

max
Kg. 200

Kg. 17

REF. Y780 590,00 €

THE VENDETTA PRO

The perfect float for those who want a compact float tube together with the convenience of oars to cover long distances.

Constructed from high strength PVC with reinforced, heat-sealed seams.

The HART PVC-BY LAYER technology incorporates a 1000 denier polyester interior coating that improves its strength and durability.

High pressure 50 cm wide and 16 cm thick seat, for maximum comfort and perfect view during the fishing action.

2 valves located in the rear of the tubes, freeing-up the front part to easily mount the probe and other accessories. 1 valve for the seat.

With a length of 145 cm and a width of 110 cm, this "toy" is really easy to handle. The 30 cm diameter tubes give it great floatability and stability.

You will find it really easy to load all your things thanks to its two enormous 50 cm side storage pockets and with vislon plastic zips.

It features 3 reinforced handles for ease of transport: 2 on the tubes and 1 on the bow.

Supplied with oars, a high volume foot pump and carrying bag.

max
Kg. 130

Kg. 9

REF. YHTP 399,00 €

THE VENDETTA

The ideal float for anglers looking for a small PVC bladderless float tube. Constructed from high strength PVC with reinforced, heat-sealed seams. The HART PVC-BYLAYER technology incorporates a 1000 denier polyester interior coating that improves its strength and durability. 2 valves located in the rear of the tubes, freeing-up the front part to easily mount the probe and other accessories.

Seat and back rest of high density foam, both with 900 denier polyester covers. With a useful seat width of 50 cm and a thickness of 16 cm, this gives a raised position to perfectly control the water during the fishing action. With a length of 145 cm and a width of 110 cm, this "toy" is really easy to handle. The 30 cm diameter tubes give it great floatability and stability.

You will find it really easy to load all your things thanks to its two enormous 50 cm side storage pockets and with vison plastic zips.

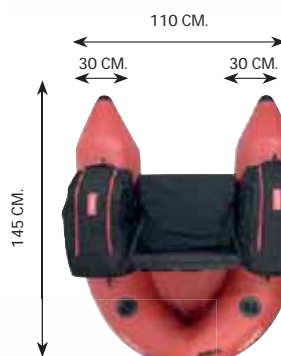

It features 3 reinforced handles for ease of transport: 2 on the tubes and 1 on the bow.

DRIVE MOTORS

Thanks to its simple mounting and dismantling system, it takes just a few seconds to install it on your float tube. It mounts on a keel support base (not included) which must be bonded to the floor of the PVC float tube.

To maintain stability at full power, the motor is equipped with a detachable keel that can be easily installed on the bottom of the float tube.

Really easy to operate thanks to its handy remote control, allowing you to easily adjust its speed and direction (forward and reverse settings).

4-blade, 116 mm diameter propeller protected with a housing to protect against impacts with obstacles or cuts due to close proximity.

Who has never thought about... "that backwater that's full of fish, but it's really too far to go...". Well, with the DRIVE electric motor, nothing is too far away! You can get to any place you want, fish for longer and, therefore, get more catches.

NEW

DRIVE 600 PACK

- Set comprising: torpedo type electric motor for fishing from a float tube + 24V / 30 Ah rechargeable battery.
- The motor has a power of 600 watts and a thrust of 28 pounds (14 Ah maximum consumption).
- A 1.6 metre cable connects it to the battery and it is operated by remote control.
- The 22.2 volt, 30 amp lithium-ion battery is housed in a waterproof box that also contains the remote control receiver.
- It includes a "Man overboard" magnetic safety device.
- It is suitable for use in freshwater and saltwater alike (IP68). (Following use in saltwater, it is recommended to rinse it thoroughly with freshwater).

DRIVE 380

- Torpedo electric motor specifically designed for fishing from a float tube.
- Lightweight (1.6 kg), silent, emission free, and environmentally-friendly.
- Simply use the quick connection cable to connect it to the battery (not included) and you're ready to fish!
- The motor has a power of 380 watts and a thrust of 18 pounds. (18 Ah maximum consumption).
- In order to use the motor, you need to connect it to a 12 volt battery with at least 20 Amps (the greater the battery amperage the longer the motor will run).
- Thanks to its composition and waterproof rating (IP68) it is suitable for use in freshwater and saltwater alike. (After use in saltwater it is advisable wash it thoroughly with fresh water)
